

Wampole's Beef Juice.

(Anæmiol.)

A Distinctive Preparation of Beef, Containing Hæmoglobin and Albumin.

A highly nutritious and restorative food, and an iron tonic of much value, manufactured by a process original with us and containing all the albuminous constituents of meat tissue in an unaltered form.

The bright red arterial color of the preparation is due to Hæmoglobin, the natural proteid compound of iron contained in blood and meat, which has been proven by the most rigid clinical tests to be more readily and completely absorbed than any other form of iron known.

ANÆMIOL contains soluble Albumins and Hæmoglobin in a larger proportion than any similar preparation before the profession to-day—this fact may be determined by diluting a given quantity with eight (8) parts of water and boiling, the amount of precipitation approximately determining the percentage of coagulable constituents.

ANÆMIOL is readily and almost entirely digested and absorbed without forming hard fæces, making it especially useful in intestinal affections, like typhoid, fissure of the anus, chronic diarrhœa, etc.

It is highly recommended for the relief of nausea, due to gastric catarrh, sea-sickness, morning sickness of pregnancy, etc.

As a strengthening diet in prolonged illness, convalescence, and in phthisis and general debility, **WAMPOLE'S ANÆMIOL** will be found invaluable, being very agreeable and appetizing, and retained by the most delicate and enfeebled stomach, where other nutriments are rejected.

In post partum hæmorrhage it quickly restores the lost blood to the system.

As a **Nutritive Iron Tonic** it will be found of great value in the various forms of anæmia, chlorosis, etc., where iron is indicated, the proteid iron **Hæmoglobin**, being almost completely absorbed by the system, unlike the ordinary inorganic iron preparations usually prescribed.

It will be found very efficacious in relieving fatigue of mind and body, acting as a **nutrient, stimulant and tonic**, without any depressing after-effect.

On request we will gladly send to physicians or druggists a liberal sample of this preparation, as well as descriptive literature.
