### The Horse Supply.

(Contributed by T. S. B.)

ALL who know anything about the situation are wailing over the poverty-stricken condition of England with regard to the supply of horses for the army.

The war drum is throbbing all over the European continent, and any moment we may hear the big drum of Russia, France, or Germany give the "boom" which will be the signal for the *pas de charge*.

In what state of preparation is England if the whirlwind of war draws her in? Fairly well off for men, but woefully deficient in horses.

If she had to put two army corps in the field she would require at least 20,000 horses of the proper stamp, and if the war lasted six months
