The year 1892 was a red letter year in the history of the SUN LIFE. The new business was not only greater than that secured by the Company during any previous twelve-month of its history, but also greater than that secured by any other Canadian company in this or any other year. The increase in the new business of the SUN LIFE beyond the figures of 1891, exceeds the corresponding increase of all the other Canadian companies combined. The income was about \$4,000 for every working day of the year. The assets also increased by over half a million dollars. But even more important than the wonderful growth in size is the highly satisfactory and profitable nature of the business transacted. The death claims were \$16,537.72 less than the previous year, although the sums assured had increased by nearly \$4,500,000. The Company, moreover, divided nearly \$200,000 of cash profits to its policy-holders during the year, and yet shows a surplus, according to the Dominion Government Standard, of \$244,928.73 over all liabilities and capital stock. The fact that the greater part of this large amount has thus been accumulated from the operations of one year alone, cannot fail to be highly gratifying to our members, as it is an evidence that the profit distributions of the past will in all probability be not only maintained but largely increased.
