

begin to run poor for a time, or heavier machinery be required, or other difficulties arise to cause a temporary stoppage, the works are too frequently abandoned altogether. I urge these points more particularly, feeling confident that, under patient and liberal management, no fear of failure need be apprehended as regards the Galway Mine.

E. J. CHAPMAN, Ph. D., &c.,

*Professor of Mineralogy and Geology in University College, Toronto,  
and Consulting Mining Engineer.*
