

which led them on, and while we feel gratitude springing up in our bosoms to that God who watched over and protected them, recollect that the important duty has now devolved upon us to sustain, and, as far as possible, perfect the work which they have begun, and extend the privileges of our free government and the benefits of our glorious religion to every class of our citizens, irrespective of *color, caste or condition*.

Although we have protracted this notice more than we at first designed, yet we cannot close without recommending our friends who are in want of such a work which is peculiarly valuable as a reference book, to call and examine it at the bookstore of I. S. Boyd.

*From the N. H. Telegraph, Nashua, N. H.*

EARLY HISTORY OF NEW ENGLAND.—This is a neat, leather-bound volume compiled by the Rev. H. White of this State, containing 412 pages. This work has been examined by many gentlemen of literary taste, including several of the clergymen of this town, by whom it is regarded as an interesting and valuable work. It is rendered interesting and attractive by the many curious incidents, illustrating the hardships, sufferings, customs, and peculiarities of the early settlers of this Yankee land. Besides, oral tradition and selections have been made from near all the celebrated New England historians and biographers. The volume is valuable for the reason that it embraces so great an amount of historical research, which has become extremely difficult of access.
