bushels. Stocks in store at Fort William, Port Arthur, Keewatin, Winnipeg and interior points are estimated approximately at 2,079,000 bushels, compared with 4,209,000 bushels a year ago, 5,800,000 bushels two years ago, 1,500,000 three years ago.

Grain and Milling Notes.

The Winnings Elevator Co. has commenced the erection of a big elevator at Pense, Assinibola. This makes two for the village and there is a prospect of a third one this fall.

Toronto grain men are dissatisfied with the market service being supplied on the board. The "ticker" has been removed and the market quotations are being posted from slips supplied by telegraph messages. There was much discussion of the matter to-day and some talk of the advisability of arealy correctly in a correct such as the service of the supplied of the advisability of arealy correctly in a correct such as the service of the supplied of again organi-ing a corn exchange. Duluth—There has been no market for cash seed at Duluth, says Monday's Oil, Paint and Drug Reporter, and September and October have been sparingly dealt in the September at \$1.36 and the October at \$1.38. The close was \$1.56 for cash and \$1.30 September. Some alarm was felt for the new crop early in the week on account of the dry weather in North Dakota, and it was feared the drought of last spring was to be repeated. Sonking rains throughout the Northwest later allayed these fears, and the conditions in that State are now highly favorable. There are sections in the Red River Valley where it may be necessary to delay sowing, owing to excessive moisture. Many predict that hot, dry summers follow cold and wet springs, and that hot summers mean early frosts, but it is yet too early to follow the weather prophets. Receipts for the week were 12 cars. Stocks decreased 224,156 bushels and are down to 95,000, as compared with 119,718 a year ago.

The London Mark Lane Express says from the present crop outlook there will be a large deficiency in both Germany and England, and a large surplus in the United States and Russia. The spread of rust in Hungary is serious and without early raims the crops will be gravely injured. In Austria the prospects are very unfavorable, and the agricultural affairs of the dual monarchy (Austria-Hungary) should be watched attentively, for the existent deterioration of French and Austrian-Hungarian prospects might, in the present state of trade, alter the balance of power and shift the concrol of the wheat and flour markets from the buyer to the seller.

The Modern Miller says' Wheat harvest advancing northward is now begun in Kansas, Missouri and Illinois, and is extending eastward. Threshing will begin the present week south of the Ohlo. Condition of winter wheat well maintained and large yield indicated. On the other hand, Abliene, Kas, letters say wheat going up badly; won't harvest more than haif a crop.

The production of flaxseed on an enter wheat well more than a crop. The London Mark Lane Express says

backward daily and fly damage showing up badly; won't harvest more thunhaif a crop.

The production of flaxseed on an important commercial scale is confined almost exclusively to four countries—Russia. British India, the United States and Argentine. Russia in average years produces from 40 to 50 percent of the world's crop, British India from 15 to 25 per cent, the United Scates from 10 to 20 per cent. and Argentina about 10 per cent. In a striking change in the relative position of these four countries as producers is apparent in 1859. In that year the United States rose to the first rank as a producer of this seed, with a crop of 20,084,000 bushels, against 18,022,000 bushels for Russia, 11,827,000 bushels for British India, and 3,000,000 bushels for Argentina; or about 20 per cent of the total world's crop in 1899 was the product of the Uniked States, against 26 pe. cent in Russia, 17 per cent in British India, and 13 per cent in Argentina.—Elevator and Grain Trade. The spring clean-up season was in full swing in all parts of the Klondike camp at date of last mail advices. Millions of dollars worth of gold dust has been washed from the pay dirt taken out by an array of toilling siners through the long weary months of winter. Withit a month \$3,000,000 or \$4,000,000 more will have to be taken out and the washing of winter dumps

will then be finished. The spring cleanup of the campl is estimated at \$15,
600,000 and the aummer output at \$10,
600,000. Gold dust is now coming into
Dawron at the rate of \$30,000 to \$46,
600 a day. After two or three weeks
the road will be dry and it will flow
in at a heavier rate. The banks here
are busier than they have been for
months buying ore and receiving dust
for storage. The big trading companles are receiving a great deal of dust
in payment for goods advanced to
miners during the winter. The camp
is in a flourishing condition and everywhere good feeling prevails. will then be finished. The spring cleanwhere good feeling prevails.
