**TEN MILLION OYSTER SHELLS.**

Oyster shells have of late become quite valuable. It has been discovered that they are excellent to build roads with; they are also used for fertilizers and the manufacture of buttons. Nowadays the oysterman saves his shells and sells them at a profit. The biggest pile of shells in the world is situated at Hampton, Va., on Chesapeake bay, the greatest of oyster waters. This miniature mountain is the product of one season's catch of one man, Frank Darling, the millionaire "King of the Oystermen." The pile is 50 feet high and 150 feet long, and contains about 200,000 bushels of shells, which yielded about 5,000,000 oysters. These shells will sell for \$10,000, and before the next season the pile will have disappeared, to make room for another as large. There are many oyster-shell hillocks in the Chesapeake bay region, the none quite so large as this.—Wide World Magazine.

**KNEW HIS WEAKNESS.**

Maudie was evidently feeling embarrassed about something, and she blushed prettily as she told the sister of her fiancé that she would like to buy a birthday present for him. "You know him better than I do," she said. "So I came to ask your advice."

"Yes?" said the future sister-in-law, inquiringly. "What?" went on the blushing Maudie, "would you advise me to get?" "Oh, I don't know," replied the other girl, carelessly. "I could only advise you in general terms. From what I know of him, I should say he would appreciate something that he could pawn easily."—Tit-Bits.
