[From the New York Journal of Commerce.] STANZAS.

By MS. L. N. GARDINER.

The sky is troubled in the sumy West.—

Dark shadows larger 'round the mountain's cress

The rolling billows marmaring lash the shore,

And the broad Ocean awells its sullen roar.

What mean these omens? Why this marky air? Why start the wild beasts from the wooded lair? Why look they forth from off the eragey height, Why stops, the eagle, 'anid his airy flight?'

Hark I on the breeze is heard the bugle note!
See high in air-like waying banners float!
List! cannons echo--ratting builter dy-And drums sound out to drown each maddening cry

Each mad'ning cry 1. Yes, see the red stream flow ! See brothers meet, and strike the fatal blow! Brothers, imburcing in each other's blood. Their hostile hands, reddening the limpid flood.

Can fancy frame a more appalling scene, Than battle fields or hosts of armed men? Than headless trunks, limbs shatter'd, broken Say, is this glory? this, oh war, thy charms?

The sons they loved, slain on the ensanguined plain.

The for Tat.—It will be noticed in our Legislative proceedings, that petitions have been presented, asking for a new law, requiring that Patent Medicines, sold in the States should have a printed card accompanying them, giving the ingredients of which they are composed. A committee was accordingly raised, to whom these petitions have been referred. Well, Mr. John G. Corning, and others, immediately started another petition, which has been presented and referred to the same committee, asking for a law, requiring Physicians to make out all their prescriptions in the English language; and the apothecary to affix a label setting forth the contents of what he puts up. This may be called cross-firing, or tit for tat.—Middle-Joun (Ct.) Senlinel, Wednesday.

SANDS' SARSAPARILLA.

The fame of this preparation is not confined to the limits of our own country, but by its powerful agency in arresting and curing disease, has won its way successfully into different countries in Europe, as the following unsolicited testimonials from individuals of the highest respectability shows in the most conclusive and satisfactory manner. The same happy success has attended its use there, which has always marked its course where ever adopted, and diseases have yielded to its health restoring influence which Medical Men of profound skill had pronounced incurable. The most potent simples of the vegetable kingdom are united in this preparation, and the combination is such that one modifies and improves the other, and under the name of Sands' Sarsuparilla, is presented a compound differing entirely in its character and properties from any other preparation, and unrivalled in its operation on the system when laboring under disease. Its approval by Physicians and men of Science, and the uniform success which has marked its use, furnishes proof sufficient to convince every candid and discerning mind of its great superiority and value.

Legation United States, Bertin, Prussia, April 8, 1846. Messrs, A. B. & D. Sands:

Gentlemen—Having seen your Sarsaparilla used in this City with great effect in a severe case of Scrofula, I have been requested to order three down.

The citizens of New England are respectively in-

of science, and the ultiform success which has marked its use, furnishes proof sufficient to convince every canded and discerning mind of its great superiority and value.
