Furniture Value Means "Quality" at Low Prices Low price by itself is not inducement enough for you to buy your furniture from any particular store. Neither can you afford to go to any one house that offers only "quality," as inducement. But when you find a store offering LOW PRICES ON HIGH QUALITY FURNITURE, that is the store you should visit before you even think of buying elsewhere. For man years we have had the reputation of selling all that is good in quality furniture, and our prices have always been such that we absolutely defy competition, even from houses who handle only the cheapest grade of goods.
