

In the department for diseases of women, the various gynæcological operations are frequently performed. The large number of successful abdominal sections which have occurred in this institution has afforded abundant opportunities for witnessing the recent advances in abdominal surgery. Members of the staff are in attendance daily at 12 noon, at which hour clinics are held which afford special advantages to students desirous of successfully studying uterine and other diseases peculiar to women, and general medical and surgical cases.

In the departments for diseases of the eye, ear, nose and throat and of the skin, ample opportunities are afforded for studying these specialties in the out-door department. The large number of patients enables the physicians in attendance to impart instruction, by selecting cases for demonstration, presenting points for comparison and contrast. Practice can be obtained in auscultation and other means of Physical Diagnosis.

The positions of resident House Surgeons are open to graduates of this College.

*The Women's Hospital* is entirely under the control of Bishop's College, and is directly under the superintendence of the Professor of Obstetrics, and from the large number of patients admitted affords greater facilities for acquiring a practical knowledge of midwifery than can be obtained in any other medical school in Canada.

The position of acting Resident Physician in this Department is open to senior students of Bishop's College.

*The Montreal General Hospital* (200 beds) is situated within a few minutes walk of the College, and is visited daily by two physicians and two surgeons, besides two ophthalmic surgeons, two gynæcologists and two laryngologists. This is essentially a hospital for acute diseases, as evidenced by the large number of patients treated annually—2553 Medical and Surgical, besides an out-door attendance of 13,000 per annum. It affords equal advantages to students of all medical colleges for obtaining a practical knowledge in every department of Medicine and Surgery. A wing used as a Children's Hospital will also greatly assist students in the study of diseases of children. A special department for the treatment of the diseases of the eye and ear, under the care of the Ophthalmic Surgeons, affords students facilities
