

OVER THE PROVINCES.

A-SUMMARY OF EVENTS AT HOME AND ABROAD.

What is going on Among Ourselves—The Daily Doings of Our Neighbors Talked About—People you know or of Whom have heard.

Monrovia, H. S. Scott & Co., of St. John, have opened a general store in this town, under the management of Mr. Geo. Hankinson—Weymouth Free Press.

Ottawa, June 30 (Special)—Patrick Baskerville, member for Ottawa in the Ontario legislature, died Saturday afternoon.

The sudden death occurred Friday night of June 29, of Alex. Bank, of St. Mary's. Death resulted from heart failure and was hastened, it is thought, by fear during the tempest which prevailed about midnight. Deceased was in the 78th year of his age and leaves one son, Thompson Bank, with whom she resided.

Toronto, June 30 (Special)—The Orange Grand Lodge of British North America met at Toronto, July 23, negotiations for the Winnipeg meeting having failed. Grand Master Clarke Wallace says the railways have been arbitrary and exorbitant and he refused to accept dictation of the combine and cancelled the Winnipeg meeting.

Montreal, June 28 (Special)—The provincial health officers have quarantined the Roman Catholic church at La Prairie and issued instructions that the church be kept closed until further notice. About a week ago one of the clergymen of the presbytery was attacked by smallpox and afterwards travelled to Joliette, where he attended the closing exercises of the college. The disease is very prevalent but of a mild type.

Sussex, June 29—The meeting of the board of trade called for last evening to discuss the old home week excursions, was postponed until Friday, July 5, when it is hoped that there will be a full attendance of the members.

A strawberry festival is to be held at the Guild hall, Apolago, on Tuesday evening, July 2.

The garden party, last evening, held on the grounds of C. T. White, Church avenue, was a pronounced success, both in attendance and financially.

Brookville, Ont., June 29—Mr. Allan, son of the late Sir Hugh Allan, died suddenly at his home here this morning. He had been ill for some time, but was not thought to be seriously ill. About midnight, however, acute kidney trouble developed and he passed away a few hours later. He was born in Montreal 55 years ago and settled in Brookville 23 years ago when he married Miss Eva Fraser, of this place. He leaves a widow, one son, T. Allan, of the bank of Montreal, Montreal.

Toronto, June 29—Mr. Thomas Galt, late chief justice of the court of common pleas, died this morning at his home, 99 Penrose street. For weeks he had been in a very feeble state and death was not unexpected. He was born in 1815 and was a son of the late John Galt, the Scottish novelist. He was married to the Canadian lady in 1845 and appointed a justice of the peace in 1860. He was appointed chief justice in 1887 and knighted in 1890. He leaves four daughters—Mrs. Oliver, wife of Dr. Oliver, Halifax; Mrs. Stewart, wife of Dr. Stewart, St. John; Mrs. Tupper, of Winnipeg; and two unmarried.

St. John, N. B., June 28—The steamer "Albatross," which was returning from the scene of the wreck of the Orient, arrived here last night. The steamer was loaded with the bodies of the crew and passengers. The bodies were taken to the morgue and the survivors were taken to the hospital.

Woodstock, N. B., June 28 (Special)—A terrible lightning storm struck the town of Woodstock last night, but luckily the lightning did very little damage. The thermometer has been in the 90's all week.

A farmers' institute, No. 40, was organized in town last night. A. Alward, from the office of the commissioner of agriculture, was present and gave the opening address. The institute will be held on the 10th of August.

Ottawa, June 30 (Special)—A man named Wilson has been arrested at Osgoode Station, on the C. P. R. line to Prescott, for alleged threatening to murder new hands employed as trackmen. It is said he asked them just to quit work and when they refused produced a small coffin on the inside of which were the names of each.

The minister of militia says he hopes the Canadian government will be able to retain the services of Major General O'Grady-Haley as general officer commanding the Canadian militia, as the tenure of the cable message from the war office extending his tenure as commander three months till September was misinterpreted. The appointment was for one year but he has no reason to believe that it will not be renewed.

Digby, June 29—A letter has been received from Toledo, Ohio, stating that Dr. Robert Hueston Timpany, Jr., died in the city June 17 of pneumonia, aged 36 years. The deceased was ill only a few days. He was a man of great ability and a son of the late Dr. Hueston Timpany and a grandson of the late Kingling Timpany, Digby, where many relatives still reside.

Two Tiverton deaths are reported this week. H. M. Ruggles, formerly keeper of the Head light, and Mrs. Fritz Oseba. The former leaves three sons and two daughters and the latter leaves a husband, mother and 10 children.

Mrs. Leonard Thibault died at Westport Thursday, aged 81 years. Her remains were taken to Freeport for burial.

INDIAN TROUBLES.

Department at Ottawa Called to Take Action.

Ottawa, June 28 (Special)—The department of Indian affairs has had more or less trouble with the Indians for some years past. Two years ago the Indian commissioner of police shot and killed an Indian in self-defence while patrolling a disturbance amongst them. The department has been dealing gently with them all along and now the Indians are beginning to think they can do as they please. In fact they are imposing upon the good nature of the officers of the department. The latest move made by the Indians was to take the law into their own hands and attack lease holders who have held the lands for 100 or 150 years. The leases of these parties were held good by the British government before confederation. Subsequently, the same class of leases were referred to a commission and destroyed by commission.

One of the Indians has moved on to an island known as Colquhoun Island and is determined to live there. But the Indians are still going further. The chief met in council and issued notices which have been served on these lease holders directing them to appear before the council. Generally these Indians have been acting in an illegal and high-handed manner. The secretary of the department of Indian affairs has been sent down by Mr. Sifton to see that steps are taken to make the Indians comply with the law. It is the intention of the department to see that the Indians will do this in the future.

Mrs. Florence Gough, of Montreal, will apply for divorce next session from her husband, Charles Arthur Gough, of the same city. The divorce is being sought on the ground of desertion. Notice will appear in tomorrow's Gazette.

The department of militia has given notice that the usual annual salutes may be fired on Dominion day.

W. L. King, deputy minister of labor, today arrived back from Sydney, C. B., where he went at the request of the Nova Scotia Steel Company. Mr. King was successful in bringing about an adjustment of the trouble within 24 hours of his arrival. He conferred with both sides, ascertained what the company was prepared to grant and the men to accept and proposed. His success in effecting the settlement of the labor trouble is considered a considerable achievement.

Hamilton, Ont., July 1 (Special)—The Canada cup challenges invader, Captain James, were defeated by the Walker cup today. The invader led the way, finishing 18 minutes ahead of Canadian and Beaver third, four minutes behind Canadian.

Frederickton, N. B., July 1 (Special)—N. B. Fuller, ledger keeper in the Bank of Montreal here, has been transferred to Montreal.

Will D. McKay, son of Jos. D. McKay, and Jennie Gurn, daughter of Wilmet Guin, were married at the residence of the bride's father, Mr. J. D. McKay, on the evening of June 28, by Rev. Mr. Sykes.

Point Greville, N. S., June 1 (Special)—Dominion day was grandly observed here. Over 1,000 were present at the launch of the new schooner, built by H. Elderkin & Company. The schooner, a splendid vessel, was a grand launch. H. J. Logan, the popular representative of the present, and people from Parrsboro, Amherst and all surrounding towns. The afternoon was taken up with sports greatly enjoyed.

Norfolk, June 30—The diphtheria is rapidly disappearing through the skilful treatment of Dr. Bishop. Dr. Wetmore, chairman of the board of health, was in the city yesterday, looking after the epidemic, and the excitement is about at an end.

Henry Griffith, of this place, is at the head of the son, Frank Griffith, who had the misfortune to lose his leg while shunting in Amherst. I. C. R. yard a day or two ago. It was reported last night that another amputation would have to take place.

Carleton, June 29—Last evening a splendid concert was given at the convent of the Sisters of Notre Dame in this parish. The music and singing was first class, being surprisingly good from such young children. All the priests of the lower part of the county were present. O. Turgeon, the popular member for Gloucester, was present and made a very fine address congratulating and encouraging the good work of the students. He spoke heartily of the educational and commercial future of Carleton. The gathering was exceedingly well pleased with the performance and the speakers. Many could not gain admittance to the hall.

Chatham, N. B., June 29 (Special)—Fifty Italians are to arrive here tonight to work on the sewerage system. The local workmen refused to go to work on Thursday unless their pay was increased. This their contractor refused to do, and at once sent for Italian. One of the hundred more are to arrive next week.

The thermometer registered 90 at 3 o'clock and not a breath of wind blowing. The S. S. Neibohring, which is running between Miramichi and Liverpool under charter of M. S. Fife Company, broke one of the blades of her propeller on the voyage. A survey was held Friday and a new blade has been bolted on. She is loading pulp and spoil wood.

Bissid, June 28—A farmers' institute was held at Bissid on the 27th. Mr. Thompson, the delegate from the department of agriculture, met the farmers of this district at Bissid hall and explained the objects of the institute, and passed at the last session of the legislature; also, the advantages from the intended dissemination of agricultural education. A survey was held Friday and a new blade has been bolted on. She is loading pulp and spoil wood.

Norton, Kings Co., June 27—Wm. Fleming, section foreman of the I. C. R., has been laid up at his home for the past few days with diphtheria and his place has been filled by Henry White, of Sussex.

Geo. W. Robertson is remodeling the building which he recently purchased from Jas. Byrne, of Sussex, for a general store. He is also building at the rear a large warehouse. The building will be completed in a few weeks. Mr. Robertson has been in business in the Mercer Settlement for a number of years and his long experience will enable him to do a large business.

Peter Campbell, of Bloomfield, has carpenter making repairs on the Norton bridge across the Kennebec river. No more cases of diphtheria have been reported since Monday. All are doing well through the use of antitoxine.

A SUCCESSFUL SURGEON-DENTIST.

Department at Ottawa Called to Take Action.

(Continued from Page 2.)
The late Hon. James Mitchell, when Premier, wrote:
St. Stephen, N. B., April 12th, '97.
Dr. J. D. Maher:
Dear Sir—I am pleased to find attached to your testimonials some of the leading names in New Brunswick, recommendations from whom should be an honor to any young man. Your letter addressed to the Board of School Trustees of the city of St. John on the examination of children's teeth is worthy of due consideration.
Yours,
JAMES MITCHELL.

Hon. H. R. Emmerson, M. P., ex-Premier, writes:
Dorchester.
Dr. J. D. Maher, 827 Main St., St. John:
Dear Sir—I certainly have a very high appreciation of the value of your suggestions to the Board of School Trustees of your city. That more attention is not given to the subject by all of us is certainly a matter of some surprise, or at least should be. The value of your many testimonials as to the merits of the so-called "Hale Method" would indicate that had Burns lived in these days he never would have had occasion to try his feeling "Address to the Toothache." I sincerely trust that you may energetically pursue the path which you have so clearly mapped out; public attention will surely be attracted by the necessity of some action. It does not require a Shakespeare to teach us.
For there was never yet a philosopher
"That could endure the toothache patiently."
Although he took occasion to tell us so.
Yours faithfully,
H. R. EMMERSON.

HON. H. R. EMMERSON, M. P.

Hon. Judge Landry, of the Supreme Court, writes:
J. D. Maher, Esq., Dentist, etc.:
Dear Sir—It gives me pleasure to express to you my entire satisfaction with the result of the work you did for me and other members of my family. My experience in your dental chair has greatly diminished the fear and dread that always heretofore accompanied my visits to others for the same kind of work.
Yours very truly,
P. A. LANDRY.

Hon. C. H. Labllois, Chief of the Board of Works, writes:
Dahousie.
Dr. J. D. Maher, St. John, N. B.:
My Dear Sir—I have had the Hale Method used while having teeth extracted and suffered no pain whatever. I have recommended it to several of my friends since.
Yours truly,
C. H. LABILLOIS.

Hon. Judge McLeod, 23 Queen Square, writes:
Dear Dr. Maher, I am very much pleased indeed with the work performed for me at your office.
EZEKIEL MCLEOD.

Mayor's Office, St. John, N. B., Dec. 5th, 1896.
Dr. J. D. Maher, Boston Dental Parlors, City:
Dear Sir—I have much pleasure in thanking you for sample bottle of your delightful fragrant toothwash, and also for your most pamphlet on Painless Dentistry, which contains many testimonials from leading and well-known citizens, who have experienced the comfort and benefit of tooth extraction under the Hale Method. "Painless dentistry" is now exclusively used in your dental parlors.

The great improvements made in dentistry the past thirty or forty years is forcibly brought to my mind when I read the first tooth-drawing that I witnessed, viz: The sufferer was stretched on a table, the doctor, in shirt sleeves, with knee on the patient's breast, exerting his full powers, and amidst the groans of the sufferer, the tooth was finally wrenched from its socket. Testimonials were neither asked for nor given in those days and under the barbarous method. No wonder I read with pleasure your letter of the 13th April last on the examination of children's teeth, addressed to the Board of School Trustees of this city, and heartily concurring in the value of your suggestion that a dentist should be appointed by the board to examine the teeth of the school children at least once or twice a year, which would prove of great benefit to the physical welfare of the children. Physical culture is now recognized as not less important than mental culture; in fact, perfect culture cannot be reached without development of both. Your generous offer to fill the position gratis for three years will, I hope, receive the early consideration of the Board.

Yours sincerely,
GEORGE ROBERTSON,
Mayor.

Dr. Howard Fritz, the celebrated oculist and aurist, located at 72 Sydney street, writes:
Dr. Maher:
Dear Sir—I can truly and do cheerfully testify to the work done at your office.
Very truly yours,
H. S. FRITZ, M. D.

Main Street Baptist Church,
Rev. J. A. Gordon, M. A., Pastor.
Residence, 223 Sydney St., St. John, N. B., March 15th, 1897.
Dr. Maher:
Dear Sir—I have great pleasure in stating that the Hale Method is a most successful and reliable method of extracting teeth.

HON. A. T. DUNN.
St. John, N. B., 18th June, 1901.
Dr. Maher:
Dear Sir—I have much pleasure in testifying to the satisfaction given a member of my family through dental work done for her in your office.
Yours faithfully,
ALFRED MARKHAM.

Reflected at Father's, March 18, 1897.
Dr. J. D. Maher:
Dear Sir—I most heartily endorse the praises and recommendations contained in the foregoing testimonials, wishing you every success in your laudable enterprise.
E. M. WIGGILL, C. S. R.,
Rector St. Peter's Church.

Hon. A. G. Blair,
Minister of Railways and Canals.
This had said that Giovanni Javazzi, the principal of the school, had sent him one day to practice his art in the schools and when he returned in the evening, demanded all the articles which he had stolen. This seemed unjust to the young thief and in revenge he went to the police.

Hon. A. G. Blair,
Minister of Railways and Canals.
This had said that Giovanni Javazzi, the principal of the school, had sent him one day to practice his art in the schools and when he returned in the evening, demanded all the articles which he had stolen. This seemed unjust to the young thief and in revenge he went to the police.

OLD PERFUMES.

Perfumes Come Direct from Venus' Toilet.

It is difficult to realize how universal was the knowledge and use of scented in ancient times. Greek tradition avers that perfume came direct from Venus' toilet, and receipts for essences were inscribed on marble tablets all about the temples of the goddess. Egypt was a great source for all kinds of perfumes. Women made themselves beautiful through the use of essences, and guests were received in chambers strewn with flowers. Even the dead were not forgotten, for the embalmed mummy was saturated with perfumes and spices, and sweet scents were burned before their statues. Perfumes could not afford their painted sent bottles on their tombs. The ancients thought certain perfumes had medicinal value. They mention 35 remedies derived from rose, 32 from the rose, 41 from mint, 21 from the lily and 17 from the violet. Thyme has a tonic quality and lavender is soothing. Patchouli is stimulating, jasmine a clearing, while leiloupe is an irritant, unless used in small quantities. There are those in our day who think sandal for the skin is a virtue known to the Greeks, who anointed themselves with it for the Olympic games. The Jews' love of perfume was so great that morning and night they burned sweet incense of myrrh, and beds were perfumed with aloes and cinnamon. So indispensable were scents considered for the home, that the Jews would not allow the burial of a dead man in a house of late become so scarce that only the sultan can be supplied. The trade in perfumes was enormous in Greece. Like the Egyptians, they understood the fascination of flowers, and an Athenian not only perfumed his house, but scented his drinking vessels with myrrh, the gum of a tree which grows in Arabia. To such an extent was the love of perfumes carried that each part of the body had its peculiar anointing: the hair required cedar, the neck and knees wild thyme; the arms, balsam; the cheeks and breast, palm oil; and the feet and legs, sweet oil. Indeed, the perfume of the ancients was so great that morning and night they burned sweet incense of myrrh, and beds were perfumed with aloes and cinnamon. So indispensable were scents considered for the home, that the Jews would not allow the burial of a dead man in a house of late become so scarce that only the sultan can be supplied. The trade in perfumes was enormous in Greece. Like the Egyptians, they understood the fascination of flowers, and an Athenian not only perfumed his house, but scented his drinking vessels with myrrh, the gum of a tree which grows in Arabia. To such an extent was the love of perfumes carried that each part of the body had its peculiar anointing: the hair required cedar, the neck and knees wild thyme; the arms, balsam; the cheeks and breast, palm oil; and the feet and legs, sweet oil. Indeed, the perfume of the ancients was so great that morning and night they burned sweet incense of myrrh, and beds were perfumed with aloes and cinnamon.
