Canadian Dairy Supply Co.,
327 Commissioners Street Montreal.

Please Consider :::

the modern necessities of scientific butter-making. If you are employing antiquated processes you cannot hope to meet the competition of the times.

You must make the maximum quantity and quality of butter that can be made from your milk supply. To do this you must

Have the Best Machinery

and operate it scientifically. In making your plans for this season do not overlook the Cream Ripening proposition.

The Farrington Cream Ripener

is the machine that enables you to secure the maximum yield from your milk and at the same time give it that fine aroma that is required to get the top price on a critical market. With this grade of butter you do not come into competition with "oleo" or "process." You will have and hold an exclusive market of your own. As we said at the start, **Please Consider.**

Creamery Package Manufacturing Company, Cowansville, Que.

Our Full Circle Steel Hay Press

Makes two strokes of plunger for each complete turn of horses, making bales 17 in. x 22 in., and any length desired. In ordinary hay can press from ten to fifteen tons per ten hours. Absolutely the best Press on the market. We put the hind wheels five inches wide when desired.
