

Carbon Deposit

How to Reduce it

Considerable nonsense is current about carbon deposit.

Any product that will burn must be largely carbonaceous.

Lubricating oil will burn and is therefore plainly carbonaceous. Non-carbon oil cannot exist.

But the amount of carbon deposit depends on the carburation and gasoline consumption, and on the character of the gasoline, as well as on the lubricating oil itself and its fitness for the car.

The presence or absence of carbon deposit in no way determines the lubricating efficiency of the oil.

Under identical conditions, however, some lubricating oils will give much more carbon deposit than others. This is due, in part, to three conditions:

- (1) The crude oil from which the lubricant was manufactured may have been unsuited to gas engine purposes.

- (2) The oil may have been improperly manufactured or filtered.

- (3) Its "body" may permit it to run too freely past the piston rings into the combustion chambers.

To reduce carbon deposit, it is absolutely necessary to use an oil whose "body" is suited to your piston clearance.

In the Chart of Recommendations (printed in part on the right) we specify oil of a "body" suited to the piston clearance and other lubricating conditions in each motor.

The oils themselves are scientifically manufactured, from the crude bases best suited to motor car lubrication. They are thoroughly filtered to remove free carbon and other impurities.

If you are particular about your fuel, and your carburetion and ignition, the grade of Gargoyle Mobiloils specified for your car will put an end to unnecessary carbon troubles.

Gargoyle Mobiloils are sold in 1 and 4-gallon cans, and in wood half-barrels and barrels.

Mobiloils
A grade for each type of motor

It is safest to purchase Gargoyle Mobiloils in the original package.

Correct Automobile Lubrication

In the chart below, the letter opposite the car indicates the grade of Gargoyle Mobiloil that should be used. For example, a means Gargoyle Mobiloil "A."

The chart below is a grid for recommending Gargoyle Mobiloil grades for various automobile models and manufacturers. The columns are labeled with letters (A through F) and numbers (1 through 5). Each row lists a manufacturer and model, with a letter indicating the recommended grade.

GILSON SILO FILLERS

THE GILSON SILO FILLER is the one blower which can be successfully operated with as little power as 4 h.p. There is a Gilson Silo Filler for every purpose—for the individual farmer, for the syndicate, and our large capacity machine for the custom jobber.

We guarantee every Gilson Silo Filler to cut and elevate more ensilage with the same power than any other blower cutter.

Will Silo Filling Time find you ready?
Write for catalogue to-day.

Gilson Mfg. Co. Ltd.
399 York St., Guelph Ont.

"The Wonderful Gilson"

This Silo Filler Will Cost You Nothing

You need a Silo Filler—get a Gilson on our easy payment plan, and it will pay for itself. You cannot afford to repeat your previous years' experience at silo filling time. Why wait for others to fill your silo when they are ready and thus lose a great part of the food value of your crop? Fill your silo when your corn is ready, when it will make the most nutritious and delicious ensilage, and the most money for you. Gilson Silo Filler.

The Wonderful Gilson has the largest sale of any silo filler under the British flag—it is absolutely guaranteed to be the lightest running blower cutter made. It has an overwhelming reputation for wonderful performance and staunch dependability. Prices of everything you have been buying have been soaring, but by careful management we are able to furnish Gilson Silo Fillers at remarkably low prices. Write to-day for catalogue, and easy payment plan, stating what size you are interested in.
