MISS

Roland

Arthur

When Miss Mabel first dawned on the office, John Henry, instead of patronizing the crap game in the noon hour, bought two cream puffs and a salt pickle from Dago Charley around in Exchange place, then dodged into the nearest barber's for a hair cut. The following morning he astonished his mother by voluntarily donning a clean collar, and for the first time since infancy she discovered that his morning ablutions had extended below the collar line usually referred to by John's associates as the "high water mark." Change of Time Saturday when he received his pay envelope he caused further remark by investing in a highly colored and highly

SOMETHING IN THE LAD'S EARNEST TONES

CONVINCED STANTON. scented bottle of hair oil, and thereafter he presented himself at the office with his ruddy locks properly slicked

down. Only the junior partner noticed the metamorphosis and laughingly remarked to the head bookkeeper that John Henry was evidently "mashed" on the new typewriter. Gregory Ellis merely frowned over the long rows of figures he was adding up, and the junfor partner, finding his joke unappreciated, went to tell it elsewhere.

John Henry was not the only attendant in the office who had fallen under the spell of Mabel Moorfield, for Ellis had looked with approval on her trim figure ever since she had timidly presented herself at the office with a letter from the typewriter company and had quietly taken her place at the little desk by the window. Unlike John Henry, however, he was not disposed to wear his heart upon his sleeve, and even Miss Moorfield was unconscious of the spell she had cast over the chief accountant, whose only love appeared to be his books.

John Henry was an ardent wooer. No country school mistress ever received a more regular tribute of fruit, and no one in the office could induce John Henry to move as quickly as when he was on an errand for Miss Mabel. He was the office boy in the great brokerage concern of Stanton & Stangefield, and, unlike the messengers, his duties were confined to the office, where he could feast his eyes upon the dark brown head always industriously bent over its work. For several months Join Henry was apparently alone in his devotion. Then, with mingled disgust and delight, he observed that Ellis was his rival.

The disgust was occasioned by the fact that Ellis' attentions were received with a quiet appreciation which indicated that they were not unweicome. But even in the face of this rivalry John Henry realized that the course of true love never did run smooth and that all the heroes of the lurid fiction he affected won their ladyloves in the face of the most strenuous opposition. Often as he sat at his desk by the gate he called to mind the nonchalant fashion in which Diamond Dick and other half dime heroes had disposed of all opposition, and he had sought to decide the manner in which he would by some brilliant maneuver cut out Ellis and win Miss Mabel's hand and beart. He had about decided that he would rescue her from the burning building. in spite of the fact that the structure was supposed to be fireproof, when a new element was forced into the situation.

This was nothing less than Stangefield's sudden interest in the new typewriter. As the junior partner he was at liberty to call upon Miss Moorfield's services, and several times John Henry observed that she made her exit from Stangefield's private office with flushed cheeks and angry eyes, Worldly wise as most Wall street office boys are, he realized that Stangefield was probably forcing his unwelcome attentions upon Miss Moorfield, and he vainly cudgeled his brain for some scheme by which he might foil the villain and at the same time retain his position. A villain and a rival were possibilities that brought joy to John Henry's heart -loy tempered only by a realization that the loss of his position would not only cut him off from all contact with Miss Mabel, but would undoubtedly result in an unpleasant condition of affairs at home. Therefore he discarded his plans for summary vengeance and

called into Stanton's office. John Henry knew "the old man" well, and there was a look in his eye that boded no good to Miss Mabel. Stanton closed the door as Miss Moorfield entered, and John Henry, carelessiy leaning against the door jamb, could hear the conversation as easily as though he were actu-

ally in the room. 'Miss Moorfield," the senior partner began sternly, "the letter to Coulter that I dictated to you yesterday afternoon is being acted on in the market this morning. No one in the office besides yourself knew the contents of this letter, and unless you can explain how this information leaked out I shall not only find it necessary to discharge you, but to write the firm recommending you that you are utterly unreliable." That was enough for John Henry.

Regardless of consequences, he dashed into the chief's room and confronted that surprised individual. Miss Mabel's honor, Miss Mabel's position, were at stake, and in a torrent of words in which the English language was strangely mixed with expressions from the current slang and excerpts from the Diamond Dick Library he explained to Stanton how Stangefield, who had been operating on his own account through Cross & Sturgis, had read Coulter's letter stealthily over the typewriter's shoulder and, going directly to his room, had notified Cross to act on the information of the corner that was to be operated on the following day. Had not he, John Henry, substituting for Jack Symonds at the telephone switchboard in the office, heard the en-tire conversation? And Stangefield had told Cross that this deal would square his private indebtedness. Something in the lad's earnest tones con-Miss Moorfield came out of Stantonia office, she stooped and kissed John Henry full upon the mouth.

"Johnny," she said, "you're a hero! Mr. Stanton is going to raise Mr. Ellis' salary, and then-then we can furnish a flat!"

"Oh, fudge!" .retorted John Henry airily. "Hero nuthin'! Why, Daredevil Dick killed ten Indians and four cowboys for the sake of the girl he loved!"

Tune For a Fight. That "The Girl I Left Behind Me" is a more strenuous tune and fitter for army use than Siegfried's song of the sword is not to be gainsaid. The ear piercing fife calls the soldier to shot, shell and glory; "The Magic Flute," with all its magic, would move him not maidens may touch a warlike chord in the breasts of our more strenuous daughters, but they have thus far failed to inspire a troop of amazon rough riders. A performance of "Die Wal-throat in two minutes, and cures in a kure," of even the entire "Ring," likely, would not burry an army into action (though it might have that effect), for grand opera music "appeals to the intellect and moves nobody," whereas war and ballads "appeal to the heart and bring tears to the eyes." We are told that Greek music writers fired armies with courage by composing, in the Phrygian mode, equivalents for if you do. "The Girl I Left Behind Me" and secured the fidelity of the girl by the use of the Doric mode. No doubt by skillfully combining these modes they killed two birds with one stone-a feat that the composer of the American classic

How to Care For Parrots. The well known gray parrot is a most satisfactory and popular pet. The male and the female look exactly alike, and both will talk. The female talks ess, learning fewer words and phrases, but she pronounces with great distinct. ness. They are capital mimics and catch different tones of voice with nicety. In the very young gray parrot the iris is black. In the older birds it is yellow. The iris of the young bird's eyes changes gradually. The eyes are dark for about seven months. As the gray parrot is long lived and slowly reaches maturity the young ones must be fed and watched with special care.

hymn before action often, we fear,

came short of .- Harper's Weekly.

The only way to care for a very young parrot is to boil the corn which is fed it and make it into a pulp, putting it into the bird's beak or letting it feed from the owner's fingers as it would from the beaks of the parest birds. The feeding of young parrots must be done frequently or they will die of starvation. The gray parrot is fed practically like the others on hemp, sunflower seed, Indian corn, fresh fruit and some nuts. Almonds are not good for parrots. The bitter almonds make them ill. Parsley is a deadly poison.-Our Anima! Friends.

Money In China and Egypt.

Coins were made in China so long ago it is said, as the year 2250 B C., but they could not have been other than portions of metal cast into portable shape, such as were all the earliest moneys. In Egypt, the cradle of civilization and commerce, strange to say, there was no imperial coinage Copper. silver and gold were used as elsewhere, to indicate values but they were manufactured into lumps, shaped some times like brick, and in the case of gold and silver were molded in rings, like the ancient Irish money of ter centu-

ries ago. It appears almost inconceivable that people who created the pyramids and erected such magnificent templet should have been entirely ignorant of coins. Yet it is certain from the statements of Herodotus that such was the case. The first coinage of money in Egypt was not struck to assist the Egyptians themselves in their commercial dealings, but rather because the foreign merchants with whom they traded the Greeks and the Phœnicians, demanded some media which would have the guarantee of its value appar-It's time came sooner than he exA HOT WEATHER BREAKFAST

It Should be Comforting to the Stomach and Helpful to Digestion,

Malt Breakfast Food The Ideal Summer Breakfast Cereal is the True System Nourisher.

All experience goes to prove that a hot weather breakfast should be made of food that is comforting to the stoach, easily digested, readily absorbed by the system, and at the same time a true nourisher and builder of flesh, tissue and muscle. Mait Breakfast Food fulfils all these conditions perfectly. A dish of Malt Breakfast Food at the morning meal gives energy and vim for the day's work. Ask your grocer for it.

Truth is the golden chain which links the terrestial with the celestial, which sets the seal of heaven on the things of this earth and stamps them with immortality.

It is inhaled by the mouth and after spreading five or thirty feet from a standing through all the respiratory organs is start. exhaled through the nostrils. Catarrh-ozone kills the germs, heals the infew hours. Nothing is so effective, pleasant and simple as Catarrhozone, Two months' treatment \$1; small size, 25c. Druggists or N. C. Polson & Co., Kingston, Ont.

First Young Lady (in a quarrel)-I wonder if I shall lose my looks, too, when I get to be your age? Second Young Lady-You'll be lucky

Dear Sirs,-While in the country last summer I was badly bitten by mosquitoes—so badly that I thought would be disfigured for a couple of weeks. I was advised to try your Liniment to allay the irritation, and did so. The effect was more than I expected-a few applications completely curing the irritation, preventing the bites from becoming sore. MINARD'S LINIMENT is also a good article to land, heading directly for an island, keep off the mosquitoes.

Yours truly, W. A. OKE. Harbor Grace, Nfld., Jan. 8, 1898. "DRINK GRANO, CEREAL COF-

Silence is as deep as eternity, speech is as shallow as time. "DRINK GRANO, CEREAL COF-

This would be a better world if all persons took their own advice.

"DRINK GRANO, CEREAL COF-

A man never begins to rise in the world until after he settles down.

The mother who would be horrified at the thought of letting her daughter wander away to a strange coun try without guide or counsel, yet per mits her to enter that unknown land of womanhood without counsel or caution. Then, in utter ignorance, maiden must meet physical problems whose solution will affect her whole future life. Dr. Pierce's favorite Prescription has been well named a "Godsend to women." It corrects irregularities and imparts such vigorous vitality to the delicate womanly organs, as fits them for their important functions. Many a nervous, hysterical, peevish girl has been changed to a happy young woman after the use of "Favorite Prescription" has established the sound health of the organs peculiarly feminine.

Every woman should own a copy of the People's Common Sense Medical Adviser, sent free on receipt of 31 onecent stamps to pay expense of mailing and customs. The same book of 1008 pages in substantial cloth for 50 stamps. Address Dr. R. V. Pierce, Buffalo, N. Y.

'How is the earth divided?" asked pompous examiner, who had already worn out the patience of the class. "By earthquakes," replied one boy, after which the examiner found that he had had enough of that class

ELECTRICAL LEAKAGE.

One of the Great Dangers Which Threaten Men.

The greatest dangers which threaten nan are generally invisible to the victim, and among these none is more productive of disastreus consequences than "electrical lenkage," the selfsame leakage used by the natives of all hot climates to lower their temperatures. As no organic function can take place except by means of electrical currents, so it can be easily understood that if these currents leak from our bodies the loss of power must be distinctly harmful. A common instance of this loss of electricity from our bodies consists of what we call a nervous shock, the scientific explanation being that a sudden egress of electricity takes place owing to the violent mental impressions involuntarily foroing a current of power through channels which had not been previously open to receive them.

"This," remarked a scientist, "is but one case among a thousand of the ways in which we uselessly expend our vital power. The electrical waste of a person is entirely due to his surroundings -the seat upon which you sit, the table upon which you write, the floor, the ceiling, the fireplace, the rays and colors of light which surround you, all may be instrumental in absorbing your electricity, to the great detriment of your health. Red or yellow light waves excite electricity within you, blue and violet waves exhaust it, while green waves are practically neutral in their effect.

"The air you breathe places you in direct communication with the walls, windows or hearth of your room; if, owing to the manner in which they are constructed, they place you in electrical communication with the soil on which your house is built, an 'earth return' is formed, and the electricity in man's condenser-the brain-is drawn out of the body. When one stands in the vicinity of a place of electrical exhaustion one ought to face it, as the base of the skull and spine, being the center of the nervous system, are more sensitive to outside influences than is the more covered front of the body. This is why one feels so tired when sitting with one's back to a fire; the flames serve as conductors and extract the force from the exposed nervous centers."

NATURAL HISTORY.

an hour and a half.

A lion in a jungle will jump twenty-

A horsefly will live for hours after its head has been pulled off. The head of the mosquito hawk will continue eating its victim when separated from

Mud wasps manifest great ingenuity not only in building their nests, but in placing them in localities where they will not be injured by rain or preda-

cious animals. The gray buzzard is said to be the heaviest bird that flies, the young males when food is plentiful weigh-

ing nearly forty pounds. The bird is The wasp, like the bee and almost

every other insect, is infested with parasites. Wasps have been captured which had two or three dozen parasites clinging to their bodies.

The alligator never leaves fresh water, while the crocodile often goes to sen and in the West Indies has sometimes been found many miles from possibly out of sight.

The Tyranny of Trivial Things. The great emotional experiences of life are belittled by the same insistence upon the trivial. Life and love look into each other's eyes, a man and woman elect each other from all the world, but the joyful solemnity of marriage is ruffled by the details of the wedding, perhaps by family squabbles over flowers and gowns and invitations. Or great death comes in at the door, and the little human soul, overwhelmed with grief, appalled by the sudden opening of eternity before its eyes, yet fusses (there is no other word for it) over "mourning," over the width of the hem of the veil or the question of crape buttons or dull fet. This may be shocking or mournful or ludicroas, as one happens to look at it, but it is certainly uncivilized.

Pat's Test. A good story is told of an Irishman, nore patriotic than clever, who enlisted in one of the smart cavalry regiments. The fencing instructor had experienced rather a difficult job in the matter of explaining to him the varias ways of using the sword, "Now." he said, "how would you use the sword if your opponent feinted?" "Bedad," said Pat, with gleaming eyes, "I'd just tickle him with the point to see if he was shamming."

His Identity. Philip was saying his prayers before going to bed and ended his suppli ion with, "Amen, Philip Evans!" "Why, Philip, why did you say that?" asked his mother. "Well," he replied, "I didn't want God to mix me up with Brother Ed.

Early Explanation. "And she married Jaggers, did she? Well, well! How on earth did that come about?"

"So far as I can learn, it is owing to a mutual misunderstanding."

He does act so dreadfully!"

Carry enough sunlight in your life to last through the dark days .- School-
