Local Briefs

++++++++++++++++++

There are two bad holes on Kent street near Head street. These are respectfully called to the attention of the Board of Works.

Jame Hardy has laid a charge of criminal assault against a young man named Travis. Travis was arraigned te-day and remanded till August 12th. The parties live in Buxton.

The St. Thomas lacrosse team say that the Tecumsehs' winning streak is over, and they intend to win the game here Monday. The Chatham spectators should turn out and keep the local boys on to victory.

Jack Higden was arrested yesterday on a charge of assaulting Chas. Siddals. It is alleged that he, too, threw a stone and struck Siddals about noon on the first of August. He was remanded till the 10th for trial. P. C. Dizelia made the arrest. He also arrested Jno. Dean. The latter is charged with drawing a knife in the Park House bar.

BUSINESS CHANGE

Primeau and Peltier Dissolve Partnership-Geo Richardson Buys out Mr. Peltier's Interest.

There has been a change in the firm at the Urban Store. Eugene Peltier has disposed of his interest in retter has disposed of his interest in the business to George Richardson, formerly of the Gordon Store. Mr. Richardson has had a large and extensive experience in the ready to ware and mantel business. For the past few years he has had charge of the buying and has managed the mantel department in the Gordon Store.

mantel department in the Gordon Store.

"Yes, I have d'sposed of my interest to Lir. Richardson," Said Mr. Peltier this morning. "I heve stores at Lucan, Ont., and Ferne, B. C., and a farm in Dover, and they pretty nearly take all my time to look after. I will stay in Chatham for the present. Mesgrs. Primeau & Richardson should make a success of the business, for you couldn't get two men who more thoroughly understand it. "They worked side by side in the Gordon Store for 14 years, and their experience in the business is all that could be desired. They are both splend'd and reliable business men and I predict a successful future for them."

Henry Primeau will still look after the fundamental process of the original plans, was too large for Chatham and view the accommodation asked for by the officers of the Rigimal hand size, keeping in view the accommodation asked for by the officers of the Rigimal hand size, keeping in view the accommodation asked for by the officers of the Rigimal hand size, keeping in view the accommodation asked for by the officers of the Rigimal hand, size, keeping in view the accommodation asked for by the officers of the Rigimal hand; when the ingress of the Rigimal hand; their stay provision for brass and bugle bands and for the learly addition of the original blands and for the learly addition of the original blands and for the real store say, making provision for brass and bugle bands and for the learly addition of the officers of the Rigimal hand; their officers of the Rigimal hand; their officers of the Rigimal hand; their officers of the Rigimal hand; the officers of the Rigimal hand; in their officers of the Rigimal hand; their

I don't know anything about it. Earth has been furnished for filling in and levelling up the new walks on the street. This has to be done Earth has been furn shed for filling in and levelling up the new walks on the street. This has to be done anyway, and where citizens are willing to take the earth and pay for the work themselves, it has been permitted instead of the city doing the work and charging the cost up under the local improvement act. The city is responsible for these walks for 15 pears or until the debentures are paid, and if the walks are damaged then the city has to repair them at the public's expense. Anything that, paid, and if the walks are damaged then the city has to repair them at the public's expense. Anything that will prevent the walk being washed out and keep it in repair should be approved of by the city, and every possible assistance should be accorded those who are anxious to do such work. That is all that the Board of Works is doing."

Successful Quest of Colonel Rankin to Ottawa-Government Will Act.

TO BE LARGE

THE ARMORIES

New Plans of Reduced Size to be Abolished-Larger Accommodation Assured.

Lt.-Col. J. B. Rink'n, K. C., reurned last even ng from Ottawa, where he has been interviewing the M'nister of Public Works and the M'nister of Militia, in reference to the plans for the armories and drill hall, which will be erected on Tecum. seh Park. Or g'nal plans were submitted to Colonel Rakin and the citizens of Chatham by the Government Architect for public buildings and they were approved of. New plans on a smaller scale were then submitted and these were disapproved of and at a meeting of the officers it was unanimously decided to send the Colonel to Ottawa to interview the authorities in reference to the matter.

In an interview with a Planet reporter Colonel Runk'n said in reference to his trip-

"On Wednesday in company with the member, Mr. Geo. Stephens, we interviewed the Minister of Militia and the Minister of Pub ic Works and after considerable discussion it was agreed that the second plans for the armories only should not be adopted. The former plans for armories and the large dr.ll hall were then considered and the ministers came to the conclusion, that the dr.ll shed part of it was nearly as large as that of the city of Ottawa and was n consequence too large for the city of Chatham.

"The Architect for the department was sent for and Mr. Stephens contended if any plan was accepted by the M nister of Public Works it should

be the first plan which was submitted to the catzens and also to the officers of the Ragment.

"The Ministers, however, thought that the building, according to the plans, was too large for Chatham and should be reduced in size, keeping in

in the Gordon Store for 14 years, and their experience in the business is all that could be desired. They are both splend and reliable business men and I predict a successful future for them."

Henry Primeau will still look after the fur department of the Urban Store.

SAVING CITY FUNDS

Chairman McCoig, of the Board of Works: "I see that some person is complaining that people are using earth from the city's lot for fixing up their lawns. If this has been done, I don't know anything about it. Earth has been furnished for filling in and levelling up the new walks in the foundation will be rand of bringing this matter to a result which is hoped to be satisfactured.

sung by nearly every member in the House.

He also had the pleasure of meeting Nathaniel Mills, the past master of

the House of Commons, and he accom-panied Mr. Tankin to the House of Commons and also took him to the Senate Chamber, where he heard an interesting discussion and the ruling

of the chair.

Colonel Rankin was accompanied home by Mrs. Rankin, who has been visiting Mrs. Shortt, the wife of Prof. Shortt, of Kingston.

Mrs. Dewer, who has been visiting here for a few days, has returned to Toronto.

A very successful social under the auspices of the Methodist Church here was held on the lawn of Mr. Allan last evening. The fne, village band was in attendance and rendered some good musical serections, which were much enjoyed by the many people present.

What might have proved a serious accident occurred last evening while Mr. O. Owens, was returning home from the Bay. The horse, which he was driving took fright at the corner and over-turned the rig, in which Mr. and Mrs. Owens and Lewis were. They were thrown out, Mrs. Owens being badly bruised. The horse escaped without injury but the rig was badly smashed.

Mrs. Cartwright and sons Roland and Gordon, of Chatham, are visiting here.

PIOTURES BY WIRE

It has long been the dream of electricians to transmit pictures by wire, and several good attempts have been made to realize it. The lutest is by a German physicist named Korn. His t system, which is briefly descriped in The Electrician, like most of those that have preceded it, depen is on the tremarkable property of selen um of permitting or resisting the passage of an electric current, according to the amount of light falling upon it. At the end of the wire a negative photographic film of the design to be forwarded is mounted on a glass cylintricians to transmit pictures by wire,

warded is mounted on a glass cylin-der. As this cylinder revolves a spot of light travels over the surface of the film and illumines a selenium cell behind it. When the beam strikes a behind it. When the beam strikes a transparent part of the negative the selenium being strongly lighted sends a strong electric current, and on the contrary the current is weakened when the light falls on a darker part of the film. At the receiving station, by a reverse arrangement, the sensitive search on a corresponding rotate. by a reverse arrangement, the sensitive paper on a corresponding rotating glass cylinder is traversed by a fluctuating beam of light, which thus produces a photographic record resembling in light and shade the original design. The apparatus can, it is claimed, be employed to transmit photographs and drawings.—London Telegraph
