TROUT
MezzcWork

The undersigned have received from
Mr. Nash of Maine the agency for New
Brunswick for his famous trout mezzc-
work. A trout mezzc is one half the fish
so mounted upon a convex elliptical panel
as to stand the fish out in bold relief,
giving the effect of an oil painting or
while a carved fish, with the real thing to
show it your prowess. The process of
preserving fish in this artistic way was
discovered by Mr. Nash in 1900, and
patented by him.

TUMORS CONQUERED
SERIOUS OPERATIONS AVOIDED

Unqualified Success of Lydia E. Pinkham's Vegetable Compound in the Case of Mrs. Fannie D. Fox.

One of the greatest triumphs of Lydia E. Pinkham's Vegetable Compound is the conquering of woman's dread enemy, Tumor.

The growth of a tumor is so slowly that frequently its presence is not suspected until it is far advanced.

So-called "wandering pains" may come from their early stages, or the presence of danger may be made manifest by profuse monthly periods, accompanied by unusual pain, from the abdomen through the groin and thighs.

If you have mysterious pains, if there are indications of inflammation or displacement, secure Lydia E. Pinkham's Vegetable Compound right away and begin its use.

Mrs. Fannie D. Fox, of Lynn, Mass., will give you her advice if you will write her about yourself. She is the daughter-in-law of Lydia E. Pinkham, and for twenty-five years has been advising sick women free of charge.

Dear Mrs. Pinkham:—
"I take the liberty to congratulate you on the success I have had with your wonderful medicine. Eighteen months ago my periods stopped. Shortly after I felt so badly that I submitted to a thorough examination by a physician and was told that I had a tumor and would have to undergo an operation."

"Soon after I read one of your advertisements and decided to give Lydia E. Pinkham's Vegetable Compound a trial. After trying five bottles as directed the tumor is entirely gone. I have been examined by a physician and he says I have no sign of a tumor now. It has also brought my periods around once more, and I am entirely well."—Fannie D. Fox, 7 Chestnut Street, Bradford, Pa.

"Yes, Rounder was addicted to poker and cocktails before the marriage. She told him it was never too late to mend, and he reformed."

"That was fine."
"Yes, but he is telling her it is never too late to mend."
"In what way?"
"Why, he keeps her up till long after midnight mending his shirts and stockings."

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CHENEY & CO., Toledo, Ohio.

Sold by Druggists, 75c.
Take Hall's Family Pills for constipation.

"I know how America was made," said the youthful prodigy.

"North America is made out of solid stuff through and through."

"And how about South and Central America?" asked the proud father, why they are made out of scraps."

MONUMENT MAY
TUMBLE DOWN.

Montreal, Sept. 7.—The park superintendent has reported to the civic authorities that the magnificent monument to Sir John A. Macdonald on Dominion Square, near the Windsor Hotel, is in danger of collapsing owing to deterioration of foundation through dampness.

RAINBOW FLOUR

is a promise of good things on baking day.

Made from the best Manitoba hard wheat,

"Rainbow Flour" is strong in gluten—the part of the wheat that builds brawn and tissue.

TILLSONS MAKE IT.

FISH CULTIVATION
ON NORTH SHORE

The Salmon Fishers Promise a Good Season—Illicit Traffic in Sea Trout has Disastrous Effect.

"Our Medicine Bag," in the September Rod and Gun, has the following talk:

Mr. G. D. Smith, the Fishery Commissioner for New Brunswick, has kindly supplemented the account we gave in the June number of his experience in fish cultivation by further particulars which we are sure will be of particular interest to the great body of our readers. He says:

"There is no question as to the advantages of planting wall eyed ova either salmon or trout instead of keeping them in the hatchery to develop to the fry stage before distributing. In May, I placed nearly 200,000 trout ova in natural waters where I would have, later, placed the resultant fry, 15,000 of them being put where Mr. Alex. Johnston, the well known Loch Lomond Fishery Guardian, could daily note their development. These eggs were packed at the New Brunswick Government's hatchery, Bartibog, in boxes designed and made by myself, the whole lot, including their envelope of moss and snow, weighing only 160 lbs. I transported them 200 miles—twenty-six by railway. The loss in transit was less than one-tenth of the per cent, and between the time of planting and hatching the mortality was even less than that. Mr. Johnston weekly reports to me until the fry had absorbed their sacca, where hatching, that the experiment was an unqualified success. In this quantity of ova, which was not half a load for a single horse buckboard wagon, had been kept in the troughs until hatched out, the resulting fry would have required at least forty cans for their transportation to the planting places, and these cans, with the necessary water, ice, etc., would be carried in at least five double express wagons. The experiment has therefore demonstrated that the loss by this method of planting is very much less than when the work is done in the fry stage, while the expense is, comparatively, only nominal."

SALMON FISHING IN N. B.
The present season promises to be the record one for salmon in Northern New Brunswick for both anglers and netters. A number of the latter have taken more in a single night than during the whole of last season. All the rivers—the Restigouche, Upsalquitch, Jacquet, Nepisquit, Miramichi and smaller ones share in the great catches being made and which will no doubt exceed those of 1896, which has heretofore held the angling record.

SEA TROUT A FAILURE.
The run of sea trout in New Brunswick has on the other hand been a failure. It is stated that for some years the wholesale fish dealers have been carrying on an illicit traffic in the young of this valuable game fish. The shipments have been quite heavy to Canadian as well as to United States centres. The principal guilty parties—those who hire the pool hand to mouth fishermen of out-of-the-way places to scoop the fingerlings with bag nets—are persons of influence, and these men get transportation certificates to the effect that the contraband fish have been legally taken. A crusade was made against this traffic last winter, and it is hoped it will have a repressive effect. Prominent citizens ought to be ashamed to be detected in promoting and profiting from illegal traffic in baby fish, but those in the wholesale fish business are said to entertain no such sentiments.

GREAT FISH CENTRE.
The importance of the Miramichi, N. B., as a fresh fish shipping centre is strikingly illustrated by the railway returns of two stations in the parish of Chatham alone for three months of last winter. There was in the shipments about one car load of frozen salmon. With that exception the fish were the catch of the winter months named and consisted of smelts, tomcods (frost fish), flounders and eels. In December 619 1-4 tons were sent from Loggieville, and 252 1-4 tons from Chatham; in January 467 1-2 tons from Loggieville and 267 tons from Chatham; in February 436 1-2 tons from Loggieville and 205 1-2 tons from Chatham, making a total of 1532 1-4 tons from Loggieville and 725 1-4 tons from Chatham, a grand total of 2257 1-4 tons from both stations.

SHOULD WE SLEEP LONGER
Women Need Less Repose Than Men—Beerbohm Tree's Rest for a First Night.

"Women, I say without hesitation, need less sleep than men, and I say that after observation of many hundreds of them."

Dr. Josiah Oldfield, the well-known specialist, cannot account for the fact, but yesterday he told a daily Mail representative that, whether they are of the working classes or of higher station in life, women need, and their nature is satisfied with, less sleep than their husbands or other male relatives demand.

Meantime man differs as to what he needs. The following are experiences or advice as to the duration of sleep sent to the Daily Mail by distinguished men:—

The Bishop of Ripon: When young, take as much sleep as you need; when old, as much as you can get.

Sir Frederick Treves: The average amount of sleep for myself is seven to eight hours.

Sir George Lewis, the well-known solicitor: I think eight hours sufficient. I sleep nine hours.

Vincent Hill, general manager of the Southeastern railway: I think it is better that people should sleep as long as they can, and that is my practice.

Beerbohm Tree: I should say in my case eight hours' sleep is better than seven, and nine hours better than eight. I take nine hours' whenever I can, and invariably sleep for that period when on a holiday, and as near to it as possible at all times. Further, I consider sleep before any effort, with the power to go to sleep at any time, most valuable. I have cultivated that power, and invariably recuperate by its aid before the exhausting strain of a "first night," or before playing a new part.

Sir Edward Ward, permanent under-secretary for war: I find six and a half hours enough. I daresay I could manage nine or ten hours with an occasional wake up; but I should call that "slacking."

Dr. Josiah Oldfield: It is certain that every man must have a certain minimum of sleep per twenty-four hours. Most find that minimum eight hours, but an enormous number are satisfied with five and a half hours. I always sleep eight hours and regard that as, on the whole, the proper minimum for a man. Certainly five and a half hours is not enough.

Sir Robert Ball: Don't expect an astronomer to confess how many hours of the precious night he wastes by staying in bed.

The Earl of Aberdeen, Lord-lieutenant of Ireland: I find that much can be accomplished in either direction by training and habit. But as to the saying that one cannot burn a candle at both ends I heard the suggestion that it is one of the ways of making both ends meet.

During the six months which Charles Frohman, the theatre manager, spent in London recently, his hours of sleep averaged not more than five. He rose at 7.30 A. M., and rarely got to bed before 2 o'clock, sometimes later.

At the Bank of England a high official said he liked twelve hours whenever he could get it—that is, between Saturday and Sunday. "Other days I don't get enough."

The principal of a leading firm of stockbrokers said: "Members of my profession sleep well because we have easy consciences. I myself find nine to ten hours sufficient."

WHEN SEVEN MEN DIE.
You know that at least one of them had Consumption. At first it was only catarrh—but it was neglected. When "Catarrh" cures so quickly it's foolish to suffer, it's a shame to keep on suffering and hawking. Catarrh goes direct to the cause of the disease, that's why it's so dead certain to cure. It stops the cough, prevents that disgusting discharge, clears phlegm out of the throat in five minutes. Very pleasant, and safe too; get Catarrh cures from your druggist to-day.

"There is such a difference between the classes in Russia," remarked the little man who always reads the little news over his breakfast food. "Now, the aristocracy over there own so many castles."

"That's nothing to the peasants, replied the tall boarder as he dissected a fish.

"Nothing to the peasants! Why what do the peasants own?"
"Why, they have castles to burn."

To Cure a Cold in One Day
Take LAXATIVE BROMO Quinine Tablets. Don't forget to get it if you have a cold. E. W. GROVES' Quinine Tablets.

RIFLE CLUB FORMED
AT REDBANK.

Membership of Forty-Three Enrolled and Much Interest Aroused—The Range Selected.

A rifle club was organized at Redbank recently. Forty-three members joined, and a great deal of interest is taken by the members. The officers elected were T. W. Lawlor, Captain; Dr. C. E. Coleman, 1st Lieut.; Rev. Geo. S. Mitchell, 2nd Lieut. The service roll will be forwarded to district headquarters at St. John, and is expected that the rifles will be received in time to have the first shoot on Sept. 15th. A range has been selected and approved, giving distances of from 200 to 600 yards.

The list of members is as follows:—Rev. Geo. Mitchell, Dr. Chas. E. Coleman, Harry A. Bryenton, Mr. J. C. Sutherland, Sidney Parks, Major T. W. Lawlor, Mark Sutherland, Stanley Parks, Wm. A. Travis, Wm. Ramsay, Elmer Parks, Chas. S. Hubbard, W. M. Sullivan, Arnold M. Parks, J. B. Sutherland, R. C. Keyes, James E. Keyes, Lawrence Power, John Sullivan, Wm. Lawlor, James Sheasgreen, F. J. McKinnon, J. H. Murphy, Rich. H. Hasty, John J. Wedden, James Matchett, John Copp, Frank Copp, John Hare, John F. Jardine, Wm. A. Bryenton, Robt. Burns, Marshall Bryenton, Burton O'Shea, Perley Bryenton, Louis S. Flam, James Lawlor, Joseph Kingstons, James Cain.

Anxious Mother—"Mr. Oldgold has asked for your hand in marriage, my dear."

Pretty Daughter—"But he is too old for me, mamma."

Anxious Mother—"The idea! Why, he isn't any older for you than he is for himself."

AN AMERICAN DISEASE.
Some doctors go as far as to say that indigestion is the national disease of America. There is but one national remedy for indigestion and that remedy is Dr. Hamilton's Pills which accelerate the action of the gastric glands and give tone to the digestive organs. They strengthen the kidneys and liver, cleanse and purify the blood and thus aid general tone to every organ of the body. Flush and strength are fast restored and the patient can eat and digest any food he pleases. Test Dr. Hamilton's Pills yourself—25c. per box or five boxes for \$1.00 at all dealers.

Mr. Urban—"Commuter's wife must be an earthly angel."

Mrs. Urban—"Why do you think so?"
"Mr. Urban—"He tells me they have had the same cook for three weeks."

Scribbles—"It's tough on the poets when eggs are cheap."

Drabbles—"How's that?"
Scribbles—"Their fresh lays are not remunerative."

THE TONIC OF HEALTH.
Must be more than a stimulant—must be a food as well. There is no medicine that is so rich a food and tonic, it aids digestion, promotes assimilation, converts food into nutrient that builds up nerves, blood and brain. That tonic is Ferrozone which contains exactly what a run-down system needs. Ferrozone supplies oxygen to purify the blood, phosphorus to develop the brain it is to harden the muscles. No wonder it makes such vigorous men and women. You feel a new, fresh, and better by using Ferrozone; try it now. Fifty cents buys a box of fifty chocolate coated Ferrozone tablets, at all dealers.

Her—"Miss Buddington has a complexion like a peach."

Her—"Why, how can you say so I don't think her face is at all fuzzy."
