

Children Cry for Fletcher's
CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrup. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; ridding Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

EDITORIAL NOTES

How do the teachers like having their ages suggested to the reading public by the computation of years they have been on the public school staffs? Shades of Mars but it will cause a stir.

That bear should have known enough not to come out when there were sun rays and shadows about.

One of the new aldermen is credited with having already acknowledged that one man in a City Council can't do everything no matter what his pre-election speeches contained. When this fact was mentioned prior to the election the same man felt that he could sweep all obstacles aside and make the wheels spin around with a whirl. Thus is a person disillusioned.

In the United States reputable doctors are to be furnished with whiskey for the "flu" cases. We haven't heard of Hon. Mr. Rowell making any such proposal for the patients in Canada.

Still the weeks go by and no step is taken by the Council to negotiate for railway extensions and improvements in this city, improvements that could be secured at an early date if the matter were pressed.

Seaforth failed to lift the Just Write Trophy from the St. Thomas curlers.

Society Woman's Shooting Unsolved

Police Call It Accident—Physician Say Patient Silent

CHICAGO, Feb. 2.—The mysterious shooting of Mrs. Richard S. Folsom, prominent Chicago society woman, who was taken to a hospital late Friday night with a bullet wound below the heart, remained to-day unexplained.

Mr. Folsom, a former city corporation counsel, and chief of Police J. J. Garrity, who was privately notified of the shooting and made an investigation, announced yesterday that Mrs. Folsom had been wounded by the accidental discharge of a revolver which she had taken from a dresser drawer. According to Mrs. Folsom's physician she had been suffering from influenza the night before the shooting.

Mrs. Folsom has made no statement regarding the shooting; the two physicians attending her said to-day. The physicians announced Mrs. Folsom probably would recover.

PARENT OBJECTS.

Editor of The Journal.
Sir, By the papers I notice that the Public School Board is granting a part holiday to pupils this week to go to a local theatre and see a picture put on by The Standard. This was done at the request of the paper in order that the pupils might see something of an "educational value."

As a parent who has children going to school I want to express through your columns, my objection to this proceeding. If I want my boy to see pictures I can take him at night and I don't think the School Boards should lend themselves to the pleas of newspaper owners who, however, public spirited though they may be, in bringing moving pictures here, bring them as business undertakings of their own. After a while we may have the managers of local theatres asking for part holidays to allow children to go to their houses and see pictures they are putting on at 15 cents a head, and in my judgment they would be perfectly entitled to do it, for they are in the picture business and have the same right to ask the Board for concessions as a newspaper. If sir, any more part holidays of this kind are granted I for one will appear before the Board and object. My children go to public school to be educated in those schools by the teachers.

Sincerely Yours,
Public School Supporter.

A PIMPLE REMOVER THAT NEVER FAILS

Dr. Hamilton Stands Behind His Formula.

Bad blood is always responsible for pimples, blackheads and humours. Pimples, eczema and boils are the common result.

I contend that to cure these ills, the liver, kidneys, and bowels must receive attention.

My remedy, known as Dr. Hamilton's Pills of Mandrake and Butter-nut, invariably reach the trouble.

For putting life into sluggish organs, for forcing out every kind of waste and foreign matter, for making health-sustaining blood, where can you find such efficiency as in Dr. Hamilton's Pills?

In a thousand cases I have demonstrated that Dr. Hamilton's Pills cure facial blemishes and skin diseases.

I look upon these pills as the best blood purifier and system builder of the age, and guarantee they will cure every complaint having its origin in a weak and debilitated blood supply.

If Dr. Hamilton's Pills will not cure that tired, rundown condition, if they will not change lack of force into energy and vim, then nothing will.

By creating an abundant supply of rich, nourishing blood, they maintain that standard of health so much desired by those participating in the strenuous life of life to-day.

Get Dr. Hamilton's Pills and prove their merit to-day, 25c. per box.

Peace Incomes and War Prices

TEN years ago a Canadian clergyman was forced by illness to retire from active work. The largest salary he had received in the forty years of his ministry was \$1000 and a furnished house. The average did not exceed \$800.

On this sum he had maintained and educated his family. He and his wife were given to frequent hospitality. They supported every good cause, and even contributed to the maintenance charges of the Church they served.

A Minister's Budget

Good management of their money, they were able to secure an endowment insurance policy, an assessment to their perannuation fund, and accumulate some small savings. When that clergyman was superannuated in 1909, he bought a house. His income during the first year of retirement was as follows:—

The retiring allowance from the Church, (being \$10 for each year of active work)	\$400.00
Interest from investments	100.00
Wedding fees and sundries	75.00
Summer supply work	100.00

Against this total of \$675 stood the charge for taxes, insurance and maintenance of the house; say, \$75, leaving a net annual income of \$600.

The Shrinkage in Values

Before the war, the rise in the cost of living had necessitated careful management of this income. Today, the pressure is too great to be borne. If the statisticians are correct, the dollar of 1913 is worth now in purchasing power about 47c.

Therefore, the real income available to

maintain these people of refinement and culture is \$282 a year.

Do you say that this is an exceptional case? On the contrary, scores of retired clergymen are not so well situated as this one. Some are tasting the bitterness of destitution, since in a few instances no retiring allowances are provided for.

Veterans of the Cross

These men gave a lifetime of unselfish service for their Church, their country, their neighbors; visiting the sick, burying the dead, comforting the bereaved, preaching Christ crucified, and doing their part in making Canada "God's country." In a time when the payment of pensions to old employees is accepted as a reasonable thing by industrial firms, these veterans deserve more consideration than they have been getting from the Christian people of this Dominion.

The Forward Movements

The Superannuation, Beneficiary or pension funds of the five Communions co-operating in the United National Campaign must be largely increased to yield a reasonable and an adequate income for these old heroes of the pulpit.

They ARE heroes. They make no complaint. They still are found doing all that their strength will permit for the great and noble Cause to which they devoted their lives. They still are enduring hardness as good soldiers of Jesus Christ.

National Peace Thank-Offering

Simultaneous Every-Person Canvass by Each Communion
February 9-14

What Are You Going To Do About It?

This is not a question of Charity. It is a question of justice, of chivalry, of common honesty.

Your Church is seeking, through the Forward Movement, to do its full duty to the retired clergymen.

Your interest and your subscription are needed.

Tell your Church leaders where you stand. Do it NOW.

CONTAGIOUS ABORTION

A Too Common Trouble
Some Farm Mares.

Cause of the Disease Discovers
Method of Spreading Described
Measures for Control—Shell Bark Louse With Treatment.

(Contributed by Ontario Department of Agriculture, Toronto.)

CONTAGIOUS abortion of mares is due to a specific bacillus (Bacillus abortus equi) which gets established in the uterus, fetal membranes and placenta, setting up local inflammation leading to expulsion of the fetus dead or alive at any time during pregnancy. The symptoms of contagious abortion are not usually in evidence until just before abortion takes place. Then the animal is subject to colic pains, restlessness and swelling, and a swollen vulva with a mucous discharge is noticeable. Contagious abortion, the symptoms of which are specific. There is a chocolate-colored fluid discharge from vulva which has a typical offensive odor, and the fetal membranes are inclined to separate, thus necessitating artificial removal to prevent blood poisoning.

The disease has been known in Europe for many years, but was first found in the American continent until 1888 when it appeared in the Mississippi valley. Since then it has spread far and wide in the United States and Canada. Although many investigations were made in Europe and America, it was not until 1912 that the cause of the disease was discovered. In that year Dr. S. Good of Kentucky, discovered the bacillus which causes the disease. The same year Dr. Schofield, of Toronto, discovered the same bacillus in some cases of joint ill in mares which had developed in districts of Ontario where contagious abortion of mares was prevalent and the following year found the same bacillus in cases of contagious abortion of mares in Ontario.

Method of Spreading.—The disease is spread mainly by the discharge from the vulva of aborting mares. If a mare that has aborted is allowed to remain in the stable, she will be able to infect the mares which have passed and the great care has been efficiently disinfected, this stillon is liable to get contaminated with the bacillus and spread the disease to other mares which are subsequently served. If the discharge from an aborting mare are allowed to contaminate the bedding or other materials that other mares come in contact with, the mares are able to contract the disease. Discharges are allowed to contaminate water or food materials and give to other mares, the latter are liable to contract the disease.

Measures for Control.—1. The mares must elapse between abortion and subsequent breeding. 2. Mares that have aborted must not be bred if there is evidence of uterine catarrh, even after three months.

3. Mares that have aborted must only be bred at the end of the winter season.

4. Application of an efficient disinfectant to the external genitalia of the stallion after each service in the infected district.

Measures to be Employed at Time of, or Subsequent to Abortion: 1. Isolation of mare at first sign of approaching abortion.

2. After abortion the fetal membranes should be burned, if possible, or buried deeply in quicklime.

3. Those handling the fetus or mare should disinfect hands and clothing.

4. Bedding should be burned or the stall washed with a strong antiseptic.

5. External genitalia, thighs and tail of mares should be washed with a strong disinfectant. 1 per cent. bacterol, lysol, or cresol, is satisfactory for this purpose.

6. Isolation of mare should be maintained for at least a month until all evidence of uterine discharge has ceased.

Treating the animal with drugs: carbolic acid, bicarb. haw and iodoine blue, though popular in some districts, cannot be recommended as being of any value.—Dr. J. H. O. A. College, Guelph.

Oyster-shell canning insect. This is a very common pest which also attacks not only oysters but also pears, pines, currants and other ornamental and shade trees and bushes. Full grown scales are almost exclusively on the bark and are easily recognized by their oyster-shell appearance. They are about an inch long, 1-24 inch wide, and towards one end and in color resemble closely the bark.

The injury is caused by their sucking the juices out of the bark and thus weakening the trees. When abundant they almost completely cover the bark and in that case will kill either the whole tree or portions of the branches. Most infested trees, however, are not killed but are weakened.

Control.—Spraying the trees before or just after the buds have with lime-sulphur solution, 1 gallon to 8 or 9 gallons of water, is a satisfactory remedy. The regular oyster-shell spray with one gallon of sulphur to about 39 gallons of water to which two pounds of arsenic lead paste or one pound arsenic lead powder is added will also be greatly effective because it will hit the scale insects just after they have hatched, while they are still unprotected and easily destroyed. The scales may remain on the trees for several years after date of killing. Pruning the trees early makes it safer and cheaper to spray them.

TO PETITION GOVERNMENT

NIAGARA FALLS, Ont. Feb. 3.—Niagara Falls will unite with West Ontario municipalities in petitioning the Ontario Government to give part of the motor license fees toward the upkeep of roads.

Tenders for Jubee roadmaking contracts will be put together, in an effort to get a big contractor and to build permanent street for this year.

The Hydro has appealed to the Ontario Railway Board against the payment of Ontario Power Company bonds in Niagara Falls. The city solicitor has been instructed to employ a counsel and to carry the case to the highest court, if necessary.

THE DOMINION BANK

At the Forty-Ninth Annual Shareholders of The Dominion Office, in Toronto, on 28th statement of the affairs of December, 1919, was submitted.
