For Our Boys In South Africa.

To the Editor of The Advertiser:

Sir,-The Toronto branch of the Red Cross are preparing for their next shipment to the Canadian soldiers in South Africa, on the 3rd of May. They are asking for large quantities of flannel shirts, socks, handkerchiefs, surgical appliances, and underwear generally. London's first bale, weighing 1,000 pounds, was prepared for, filled and dispatched within 48 hours. A second consignment, more than double its weight, I believe, followed, and now its women have earnestly purposed to send another, if our citizens will again help them to do so, by the 3rd of May. When we read that, owing to the exigencies of the situation, the long enforced marches on insufficient rations, our Canadian boys, in common with their comrades, arrive, not onl yweary and tired, but actually in rags, their garments held together by string, and their boots gone to pieces, surely it is time to give them a further proof of our sympathy, a practical token of our pride in their brave achievements under fire, and of their patient and uncomplaining endurance of hardship. Contributions of money and of material for this "emergency bale" will be gratefully received, and, as before, by the kindness of our city editors. also fully acknowledged.

Company Being Formed to Manufacture Tea Chests Here.

London (Eng.) Specialty Manufacturing Company May Also Locate in the City-Hundreds of Hands Will be Employed.

There are very strong prospects for the establishment in London of an industry that will bring employment to many scores of men, that is backed largely by British capital. A patent has been obtained in Canada and is now held in London for a tea chest, which, it is confidently expected, will supersede all that are used at present. Samples of it have been sent to large tea shippers in India, Japan and China and have proven entirely satisfactory, and orders have been received already from Indian tea merchants for many thousands. A number of local capitalists are interested in the project. If the present arrangements result as satisfactorily as is expected, a large factory will be erected here and the

machinery installed. It will have a capacity for 2,000 chests per day. Several available sights are under consideral eration Another company, capitalized at £1,-000,000 is being floated in London, England, for the purpose of manufacturing specialties, and it is understood among real estate dealers in this city that it will locate here. The building that was occupied by the London Furniture Company, on King street, is said to be held at its option. This con-

HORSE-RAIDING. The Standard's Bloemfontein correspondent says: The most pressing need is a fresh slupply of horses. Gen. Horse raiding is dangerous work, but bushmen are more than a match for the Boers.

MISERY IN INDIA

Destitution is Unparalleled and Relief Inadequate-Cattle Are Starving as Well as the People.

Calcutta. April 23.-The latest official reports from the famine districts say that the misery existing there is indescribable and unparalleled, and that the present relief is quite inadequate. Mortality among the cattle is also so severe that the authorities are trying to adapt farm implements so that human power can replace that of bullocks. Such a drastic measure has never before been necessary even in the greatest scarcity of animals. It is also announced that the natives are developing ugly feelings, and are attacking Europeans. A great crowd on Friday murderously attacked a party of soldiers at Shahpur, the military center of the northwest provinces. The soldiers were rescued with difficulty, and in an unconscious condition. ffi
