London, Dec. 28.—The Times correspondent telegraphs from Petrograd: "Operations of the German army on the front at Roshchew Rava on Christmas Day slackened at all points except on the right. This looks as if they were seriously alarmed for the safety of their flank."

"Heavy guns, including 11-inch howitzers, have been brought up to the German line, and the Russians are making a considerable effort to bring their own heavy guns into action."

"The Russian line is being shelled by the German heavy guns, and the Russians are making a considerable effort to bring their own heavy guns into action."

The Seats of the Mighty
and Near-MightyIrresponsible Chatter About Municipal Affairs, Fourth
Termers, Campaign Promises, and Some
Inspired "Pomes."

Mayor Graham once wrote a paper on "The City Manager." It would be cruel to hint at the fine gentleman who had a centre seat in the chamber of Charles's mind.

And the city manager idea is all right—if the city can manage the city manager.

One of the candidates for alderman is Mr. Lerner, who may, or may not be able to teach the present council something.

One of the mayor's numerous front names is Milton. And that reminds us all of Paradise Lost.

Dr. H. A. Stevenson has a reputation as an administrator of anaesthetics. Do you get the idea, C. M. R.? The central thought is chloroform.

And another thing about the little doctor—he's probably done more personal favors for everyone than any of those who carry on their public life. A P. T. Barrum. He would have the same attitude toward the city.

Other would-be fourth-termers: T. Rowell, O. Twist, N. Cooper, J. Keenan and Father—winner overcoat.

"Another slice of public life." "Milton" Graham says to the city manager. "Just cut off another bunch. And you will make me punch. For isn't Hugh the selfish thing?"

The whole big cake belongs to me. Boo Hoo! Boo Hoo! Boo Hoo!

There's one school trustee who always comes through clean. He's Strong.

Officer, stop the controller's coach! Neil Cooper's not up with the driver!

We believe this is the first time Neil missed being nominated for everything since we graduated from the town pump stage.

Of all the candidates running in gloomiest Toronto, almost one per cent were born in the Porcine City. The others couldn't help it.

Look out for the guy who promises to cut this town a Utopia. His idea of Utopia is usually a P. M. way station in Michigan.

It may be said that London could be paved with the good intentions of those who have promised us good roads.

The tired taxpayer becomes slightly cynical as he reads the election cards. He begins to realize what a fine crop of promises such nomination brings and how little even mediocre ability has been displayed by any of the crowd in years past.

And yet on every page of the telephone book one can find more of more.

At 6:30 o'clock Chairman A. J. Hunt will entertain the members of the club at a dinner in the Travellers' Club.

St. Marys Man Takes Bride While on Furlough.

Pte. Sydney Featherstone of the Eighteenth Battalion, took advantage of his holiday leave to take unto himself a wife. He was married at St. Marys by Rev. James Martin, by Rev. Dean Taylor. Pte. James D. A. Law, also of the Eighteenth, was best man.

HOME FOR HOMELESS

Institution in Connection With City Mission Accommodating Out-of-Works.

The Home for Men, in connection with the City Mission, is now accommodating 23 homeless, out-of-work men. It is located at 191 York street, and is under the supervision of Hiram Mussen, a returned missionary from China. Mr. Mussen's idea in organizing the home was to provide the men with Christian influence. No obligations are placed on the inmates, he says, to become Christians.

"We are looking after their temporal requirements and giving them the right kind of influence," said Mr. Mussen. "The men are not encouraged to stay in the house and loaf. They had to go out and hustle for work. Even Christmas Day we made them go out."

A number of firms have been assisting the mission house with provisions. These include the D. S. Perin Company, A. McCormick & Sons, T. E. Scott & Co., Edward Adams & Co., Steele Fruit Company, Johnson Bros. (bakers), Elliott, Marr & Co., T. A. Rowat & Co., and others.

The furniture for the house was secured through a soliciting campaign. A large quantity of clothing was secured in the same manner.

NEW INDUSTRY STARTING

Specialty Company, Which Will Employ 25 Men, to Start Early in Year.

A new London industry, employing 25 men at the start, will commence on January 5, when the De Luxe Specialty Company will start the manufacture of cleaning compounds in this city. The manager of this new company is William Brock, a London boy, and it is proposed to make it an exclusive London company.

Arrangements have already been perfected for the entertainment of work and large contracts have been given to local firms for supplies.

Medical reciprocity between Ontario and Great Britain, the issue which occupied the attention of the Ontario Medical Association at a special meeting held in Toronto last week has been much in the minds of the medical profession in London and throughout the province.

While loyalty to the Empire and a desire to serve its best interests was responsible for the unanimous resolutions passed by the council, "That we affirm the principle of reciprocity with Great Britain and Ireland on the basis of our register and their register," apart from practical patriotism, a number of physicians are of the opinion that old country men would be more greatly benefited after the war than the graduates of Ontario colleges.

An already stated in this paper, the legislative committee to which details have been referred has been instructed to proceed with caution and to accept reciprocity only upon equitable terms.

It is pointed out, particularly by the older men who are prominent in the profession in London, that the average annual income of a doctor in the old country is considerably lower than in Ontario. British doctors are urging the benefit from the pension and to accept reciprocity only upon equitable terms.
