J. A. McMARTIN & CO.

SOLE MANUFACTURER OF THE

McMartin Patent Double and Single Acting Lift and Force Pumps

For Ships, Barges, Railroads, Factories, Mills, Cisterns, Dec. Wells (non freezing), and
Hand Fire Engines, and Wind-Mills for pumping water. Also geared windmills for
cutting straw, roots and grinding grain for feed.

Factory and Office, 637 Craig Street, MONTREAL.

The above cut shows our Double Acting Brass-Lined Horizontal Suction and Force Pump, mounted on a
Cast Iron Bed Plate with tight and loose pulleys, 4 inch face, 18 inch diameter. This is one of the most compact
and powerful pumps of the kind yet out, with Bed 4 feet long and 2 feet 2 inches, where the pulleys are placed,
all being in good proportion. The pump has a guide to the piston rod, and is driven by the connection rod
attached to the disc with steel pin and wrought iron connections. The valve seats and valve are made of gun
metal, and easily got at by bolts on either side of the pump, so that access to the bottom or top valve can be
had without any difficulty. We make two sizes of these pumps, which are adapted for mills, factories or
janneries. We make these pumps with a clutch to drive them direct, when so ordered, and dispose of the
pulleys and belt. All enquiries will be promptly answered, by addressing the above, and catalogues of our
pumps sent out.

LUMBER DRIVERS' CALKS

Our CALKS are made with small trip
hammers from the best quality of steel
and tempered in oil. The quality and
temper can be tested by driving them
into a bar of wrought iron.

These calks are now used by all the
principal Drivers in Maine and New
Brunswick. Kept by dealers in Lum-
berman's Supplies.
