The
KENNEDY SCHOOL

THE Kennedy School is unique among educational institutions. It is the only school in Canada devoted exclusively to the higher and more thorough education of stenographers.

It appeals to only the better class of pupils, from a social as well as an educational point of view. A large percentage of our students are University graduates.

We have on our staff the most prominent and expert authors and teachers in America. They have had a vast experience. The majority of Toronto's stenographers are our pupils.

Stenographic work is most congenial and remunerative; particularly the higher grades. Expert workers are always eagerly sought for. During the past year we have had more than fifty opportunities of placing every graduate, and six times as many requests as we have been able to fill.

Our work is radically different from and greatly superior to that of business colleges. Write for our new prospectus, the most interesting yet issued. If convenient, visit the school.
