

SAVES TIME AND PATIENTS

The greatest auxiliary to any form of medication in anaemic and consumptive cases is live, healthy blood.

BOVININE

is the arterial blood of the vigorous bullock, antiseptically prepared by cold process, and sterilized. It makes new and enriched blood quicker and better than any other known agent. There is a prompt increase of red cells and haemoglobin in the blood, together with rapidly improving strength and functions, shortly after administration is begun. A postal will bring you our scientific treatise on topical and internal administration, and reports of hundreds of clinical cases.
