

I am asking Dr. Ewe and Dr. Johnson to send a letter to the Principal of the Westmount High School in confirmation of this last statement, and I am quite sure they will send it. I am wondering whether you and Professor Simpson would think it worth while to send a letter advocating - for those students, at least, who show talent in that direction, - the study of Greek, Latin and Mathematics at High School on the part of those who contemplate going on later into Medicine. (I am sending a copy of this letter to Professor Simpson.)

I make bold to ask this because just at present there are many movements afoot, indicating a willingness to cooperate with us, on the part of those teaching in the secondary schools; and we should not discourage any enthusiasm of the kind.

Yours faithfully,
