

Fig. 1. Schematic diagram of the AMACH system.

The system consists of a pump, filter, mixing chamber, and detector. The pump is connected to the filter which is connected to the mixing chamber. The detector is connected to the mixing chamber.

Fig. 2. Schematic diagram of the AMACH system.

The system consists of a pump, filter, mixing chamber, and detector. The pump is connected to the filter which is connected to the mixing chamber. The detector is connected to the mixing chamber.

Fig. 3. Schematic diagram of the AMACH system.

The system consists of a pump, filter, mixing chamber, and detector. The pump is connected to the filter which is connected to the mixing chamber. The detector is connected to the mixing chamber.

DISCUSSION OF THE AMACH SYSTEM

DESIGN AND CONSTRUCTION

The AMACH system was designed to be a compact unit consisting of a pump, filter, mixing chamber, and detector. The pump is connected to the filter which is connected to the mixing chamber. The detector is connected to the mixing chamber.
