## Short Interest is Stampeded And All Grains Go Soaring

Bullish Interpretation Placed on Govt. Report Gives Big Lift to Chicago Market.

CHICAGO, March 9 .- Short sellers of of big export sales made bull sentiment rampant. Latest figures were 1%c to 1%c higher than last night. Corn scored a net gain of 1%c to 1%c; oats finished %c to %c up, and hog products at 7%c to 22%c advance.

Wheat closed strong at the highes demonstrated their superiority in courage and resources by taking all that was for sale and then lifting prices in a ment report showing farm reserves of wheat to be nearly 41,000,000 bushels less than a year ago had brought about firmness in foreign markets, the gains there were too small to excite enthusiasm here, and the result was over-confident and fairly general short selldisappeared, and the bulls had up-hill work until export talk began and Kansas City sent word of millers buying.

High Record for Corn.

Corn reached the highest price of the season just as the gong struck at the close. This result was immediately due to persistent buying for leading speculators in the face of even more aggressive selling than was witnessed in wheat. A forecast of unsettled weather wheat. A forecast of unsettled weather helped the bulls and so too did the government report. May fluctuated between 70%c and 72%c, closing strong at 72%c, a rise of 1%c as compared with 24 hours before. Cash grades were firm. In oats, likewise, the feature of new top figures for the crop went on record. Texas reported considerable winter killing in fall-sown fields. Farmers further porth were said to be getting further north were said to be getting uneasy over late seeding. Upper and lower levels touched for May were, 53½c and 52%c, with the close ½c up at

Strength of grain and hogs put up-the price of provisions. Quite a good speculative business was done. When the day ended, pork was higher by 20c to 22½c, and other products 7½c to 10c.

Northwest Receipts,

To-day. ago. ago. 233 504 European Markets.

The Liverpool market closed to-day on wheat ¼d to %d higher than yesterday, and on corn ¼d to %d higher. Berlin wheat closed ½c higher, Budapest %c higher, Antwerp unchanged to 1¼c high-Winnipeeg Inspection:

## Desultory Trading In Effect But Market Holds Up Firmly At present market price and rate dividend yields about 20 per cent. So for circular giving the salient point taken from last annual report.

Hollinger Makes Good Recovery, But General Porcupine List Does J. L. MITCHELL & CO. Nothing At All-Week-End Goasin.

World Office,
Saturday Evening, March 9.
Nothing but desultory trading characterized the mining exchanges at the week-end, and to such an extent was this carried on that the list succeeded in accomplishing nothing whatever but the maintenance of its former position. In the Porcupine socks prices drifted idly with a narrow range, and at the close quotations showed practically no alterations in the majority of instances from the preceding day's

hand, the demand showed a falling off-from its recent active nature, and consequently there was no incentive for floor traders to work prices either way. Generally speaking stocks were left pretty much to their own devices. The big issues, Hollinger and Rea, maintained quietly around their previous records. Hollinger in the early dealings showed a tendency to recover,

The bulge in Porcupine Central, Southern and Northern was carried

further, the action in these issues being about the only interesting point in further, the action in these lesses in about the only interesting point in the trading. The former stock sold up to \$3.95. Southern was up to \$1.54 and Northern to \$1.08. The public interest in these three securities is practically nil as far as Toronto is concerned, so the movement attracted nothing like the attention which might seem warranted to the lay mind.

There was comparatively little doing

ranted to the lay mind.

There was comparatively little doing in the cheaper Porcupines. Dome Extension held between 48 3-4 and 49; Vipond around 44 1-2, and Crown Chartered at 18. At these figures the shares were comparatively on a par with their previous levels. Similar mention might be made of the rest of the list.

The market on the whole showed a firm undertone, and considering the firm undertone, and considering the apathetic nature of the trading, this. was accepted as a favorable augury.

Remarkable Discovery Reported at The Property-Spectacular Ore Taken Out,

# STARTING TO CRUSH ORE

Stamp Mills Have Work Cut Out Phones M. 5402 - 5403 For Twenty-five Years-Valuable Discoveries Made.

The first battery of stamps of the Big fore the stamps are started.

In No. 1 shaft at Three Nations Lake operation one after another and withwhere everything in connection Mining Co.'s property, it is reported, in two weeks the entire mill will be in with the mill completed except the wiring for electrical power and the the vein was again broken into from full operation. This great mill has a classic of the motors. There are also the foot-wall side, exposing very hand-capacity for crushing and treating pro-

with the mill completed except the wiring for electrical power and the placing of the motors. There are also a few details in connection with the tables to be attended to, and then we are thru," said Supt. Hansen.

"There is no reason as I can see now why the mill should not start for good of the biggest stamp mill structures on the continent is about to begin work.

A Proper Milling Plant.

The ore to be put thru the mill from the beginning will be the general run, as it comes from the drifts, a mixture of quartz and schist with the low and high-grades unseparated. Not all sulphides nor all hard rock will be sent into the heavy rock crushers at one er: time, but rather a mixture of the two mans.

With the completed except the wiring for electrical power and the viel was again broken into from the beginning will be the general run, as depth is made, and there is every encouragement for others who into the heavy rock crushers at one er: time, but rather a mixture of the two dates and the every encouragement for others who into the heavy rock crushers at one er: time, but rather a mixture of the two dates and the every encouragement for others who is to the heavy rock crushers at one er: time, but rather a mixture of the two dates and the every encouragement for others who is the shafts.

The Haileybury Silver Mining Co.'s lots to the west, till said, will be put under development this spring. The lots of the ore body was available for sampled. The ore body was av ich is F. W. DUNCAN & CO.

work will be resorted to in tracing out the underground. In a large number of instances, as in the Whitney-Tisdale sections, the shears appear in the here and in addition, numerous diamond tofore much despised swamps, where drills have bored down as low as 1200 work could proceed economically only feet, finding values as consistent as they are in the upper levels. No one with drills. Not until tests have been made can who has seen and examined the Big any one logically condemn the Porcu-Dome, has any doubt that it is one of pine swamps, as illustrated in the Three the greatest mines in the world, as it Chas. Fox, is well known that there is ore in property in such vast quantities as w Vein Series Found.

Extension. It was known that the 500-foot wide mineralized zone of the Big Dome swept east with a northern trend thru Dome Extension, but it was not so easy to definitely locate the veins. Diamond drills have been employed for many months and have been employed for many months and have been employed for many months. Man Up North.)—New camp buildings ployed for many months and have at last been successful in finding the preparation for the deeper mining vein series. They have been located at the south of the Big Dome, are to be constructed, the work of laying the walls to begin Monday. Diamond drilling has been stopped, as three ore zones have been located. Shafts may now be the forthers to said the highest values are considerably higher than the second last bore hole went \$63 to the forthers to said the highest values.

of all were encountered. The workings from No. 4shaft are fully equal in im buildings, shaft work will proceed. Dome series. The cross-cut from the Manager John Wilson is detained in 100-foot level is now in 65 feet and is Toronto on account of sickness, but will still in milling ore of high quality-be here by the time the buildings are

prospects, the Big Dome forming the centre of the crescent, will be completed. The Standard and the Dome Lake close the gap on the south and west.

This section, in anticipation of an early start on the Martin, may aptly be termed "the golden circle."

Chas. Fox.

and west. The drifts are in 35 feet and the drills are still in ore. Samplings from the buckets of muck as they come up show values much beyond expectation. Some of them are running up to \$70 a ton. What an enormous body of ore of this character means can better be understood when it is stated that an ore body 60 feet Dome Buys Power Plant?

PORCUPINE, March 8.—(From Our Man Up North.)—Word is out here to the effect that the Wellberg power plant is stated that an ore body 60 feet wide, 100 feet deep and 500 feet long, averaging \$10 a ton in value, would contain a total value in place of \$2,310-

Limited, and that all power for the operating of the Dome Mines will be is so wide there is no doubt that it will continue hundreds of feet down.

Chas. Fex.

Both in the No. 4 shaft workings and of snow.
