DETROIT WON.

In the second match of the series between Detroit and Windsor rinks on Monday night, Detroit made 32, Windsor 23; at Windsor, Windsor 29, Detroit 32.

HOCKEY.

AT LISTOWEL.

The Intermediate O. H. A. match Monday night, between Harrison and Listowel, was one of the fastest and best games ever played on Listowel ice. The visitors scored two goals in five minutes. Listowel pulled together, and scored until they had 14. Harrison managed to score two more.

AT MONTREAL.

The Montreal Hockey team was defeated by the Victorias in the senior championship series last night by 4 to 2.

AT PARIS.

Paris lost to Stratford in the splendid exhibition game of hockey last night. Score, 6 to 4. The score at half-time was 3 to 2 in favor of Paris. The last half was rougher, and the visitors had much the better of it, scoring 4 goals to Paris' 1.

BASEBALL.

EASTERN LEAGUE.

The twice adjourned annual meeting of the Eastern Baseball League was resumed in New York yesterday. A number of disputes were acted upon, and a committee, consisting of Messrs. Powers, Shear, Kuntz and O'Neill, will report on the financial standing of the clubs which have applied for membership, and also recommend a circuit.

AT NEW ORLEANS.

New Orleans, Jan. 11.—Track heavy yesterday.

First race, 1 mile—Sailor King won.

Some women at the critical period of approaching motherhood fortunately receive every care and attention which abundant means can bestow, but the vast majority of them are obliged to take care of themselves and do their own work, in the bargain; and what woman with family duties de-

pendent upon her can be expected to patiently endure the long-drawn-out weariness of waiting and hoping in sickness and wretchedness for a recovery that seems to come on leaden wings?

"My wife has been a great sufferer from troubles incident to approaching motherhood," says Rev. E. R. Nelson, of Darville, New Hampshire. "She suffered with such distressing sickness that she could not take food; what little was forced down could not be retained. Her breath was very offensive and indicated a bad state of the stomach. The digestive organs refused to work. The trouble became so severe and obstinate that I was really alarmed. She began taking Dr. Pierce's Favorite Prescription, 'Golden Medical Discovery' and 'Pellies' and about the same time I wrote to Dr. Pierce for particular advice. He promptly and very courteously replied, saying that he felt sure a persistent use of these remedies would prove effectual."

"By the time the letter was received she was improving fast and before all of one bottle of the 'Favorite Prescription' and 'Golden Medical Discovery' had been taken she was up, able to eat, retain and digest her food. She continued to improve until entirely well without taking more than the two bottles mentioned, and some of the 'Pellies.'"

Accept no substitutes for these world-famous medicines, that may be urged upon you, not for your good, but that the dealer may make a little extra profit.

These remedies contain no trace of alcohol, nor opium, nor any of the dangerous drugs which enter so largely into many advertised "compounds," recommended for the cure of invalid women. They will not create craving for stimulant.

A novel flower has been found at the Isthmus of Tehuantepec. It has a faculty of changing its color during the day. In the morning it is white, when the sun is at its zenith it is red, and at night it is blue. Only at noon does it give out any perfume.

The sea cucumber, one of the curious jelly fishes that inhabit the ocean, can practically efface itself when in danger by squeezing the water out of its body and forcing itself into a narrow crack.

Assist Nursing Mothers and to help women generally. It should be taken at meal-time and before going to bed, about a bottle of it. It will brace you right up.

All druggists sell it.

THE WORLD'S WHEAT CROP

The Total Yield Is 2,567,000,000 Bushels.

The Greatest Since 1894—The Crop in Each Country.

W. D. Bear, the English agricultural expert, furnishes the New York Times with the following dispatch:

In spite of some uncertainties as to the crop of certain countries there is no doubt that the wheat production in 1894 was the greatest on record. Taking Europe first into consideration, it is found that all countries contributing materially to the supply, except Roumania, Serbia and Turkey, produce comparatively large crops, nearly all of which were in excess of the average of recent years. Beginning with Great Britain the official estimate is 13,928,856 bushels, the greatest quantity produced since 1885, when the wheat area was considerably larger. The yield per acre is put at 34½ bushels, or 6½ bushels more than the average for the ten preceding years, and is the greatest yield recorded since the official reckonings were first made, fifteen years ago. With the small contribution of Ireland, the Isle of Man, and the Channel Islands, the total for the United Kingdom will come out at about 75,000,000 bushels. France, according to her minister of agriculture, has a crop of 360,000,000 bushels, the greatest produced in any year except 1874, when about 600,000 bushels more were grown. For the whole of the Russian empire the production on the basis of estimate of the minister of agriculture for all but a few provinces will be about 455,000,000 bushels, the greatest crop ever grown in that vast country. It is possible, however, that the early official estimate may prove an exaggeration. For Austro-Hungary the estimate is 164,000,000 bushels, a quantity often exceeded, though much greater than that of 1897. Germany's crop of 110,000,000 bushels is considerably above the average, while Italy's production of 123,000,000 bushels is fair, but not a great crop for that country. Spain and Portugal come out well with 100,000,000 bushels. Roumania stands next in importance, though her crop of 55,000,000 bushels is much smaller than her product in 1896 or 1898. Bulgaria is credited with 35,000,000 bushels, Serbia with 11,500,000, and Turkey in Europe with 22,000,000. Allowing 20,000,000 bushels for Belgium and 23,500,000 for Scandinavia, Holland, Switzerland, etc., we have a total of 1,545,000,000 bushels for Europe. At present the result of special inquiry into the wheat crop of the United States are not known in this country, but the estimate of 650,000,000 bushels is generally accepted. For the whole of Canada (a great part being the official reckoning) it is 55,000,000 bushels; for Mexico, 15,000,000 bushels; for Argentina (it is difficult to estimate, as accounts are constantly varying), 70,000,000 bushels; for other South American countries, 1,240,000 bushels; for India (official account of the crop reaped last spring), 31,000,000 bushels; for other Asiatic countries, 72,000,000 bushels; for Africa, 44,000,000 bushels, and for Australasia, 50,000,000 bushels. The total for countries outside of Europe comes out at 1,021,000,000 bushels, and the world's total at 2,567,000,000 bushels, or about 5,000,000 bushels more than the previous record crop, that of 1894.

THE COLD DIP

Mercury in New York State Reached Thirty-Six Degrees Below Zero.

Utica, N. Y., Jan. 10.—The mercury reached low figures at all places in the morning. Reports from different parts of the state show that the thermometer registered from 17 to 36 degrees below zero.

In Manitoba the weather has moderated and it is now 8 degrees below zero in Winnipeg.

LOSSES BY FIRE

Right House Block at Wallaceburg Burned—Scorcher at Wakefield.

Wallaceburg, Jan. 11.—Fire destroyed the old Right House block, on the south side of the river here, owned by Aaron Gordon. Half the building was occupied by J. C. Sutherland, grocer, and the other part as store rooms. Nothing was saved. Loss, about \$2,500. Partly covered by insurance.

Ottawa, Jan. 11.—Wakefield, on the Gatineau Valley line, was the scene of a most disastrous fire yesterday morning, by which the big store owned by the McLarens of Buckingham, with an immense stock of supplies, was wiped out. In the store were located the telegraph office and postoffice. In the latter many registered letters were burned. The fire was first observed by residents, who were awakened by the explosion of powder in the store. When assistance arrived the store was in flames. The stock amounted to \$20,000. Everything in the postoffice was burned. The building was insured for \$30,000, but the total loss is estimated at a greater amount.

FEATHER WEIGHTS.

Pittsburg, Pa., Jan. 10.—Jack McClelland, of this city, and Luke Stevens, of Buffalo, feather weights, fought thirteen rounds at Homestead last night. McClelland received the decision, because Stevens broke his left arm and could not proceed.

Opening of the Ontario Poultry Show at Toronto.

Toronto, Jan. 11.—The Ontario Poultry Show was opened yesterday at the Horticultural Pavilion with 2,512 employees, 9 collections of pheasants and 90 cats. There were very fine specimens in every class. This is the first occasion on which the American Poultry Association has met here, and many of their exhibits are splendid birds. Previous to the opening the visitors were entertained at luncheon by the mayor. Among those present were Dr. Bell, president of the Ontario Poultry Association; J. J. Withrow, president of the Industrial Exhibition; Hon. John Dryden, minister of agriculture; J. K. Felch, of Natick, Mass., president of the American Poultry Association; Clark Butterfield, of London; Mat. Brown, of Tilsonburg, and others.

A novel flower has been found at the Isthmus of Tehuantepec. It has a faculty of changing its color during the day. In the morning it is white, when the sun is at its zenith it is red, and at night it is blue. Only at noon does it give out any perfume.
