to help me, to send some Zam-Buk.
The boys here say it is very good, and it is much in demand." is an extract from a letter received from Pte. J. R. Smith of "The Princess Pats" in France.

There is certainly nothing so good as Zam-Buk for the accidents and ailments incidental to a soldier's life. It is splendid for all kinds of sores, blisters, burns and cuts, and it is equally good for frost bites, chilblains, cold cracks and chapped hands. Nothing ends pain and heals so quickly, and being antiseptic, an application of Zam-Buk to a wound as soon as sustained, will prevent all danger.

of blood-poisoning. If you want to send your soldier friend something he is sure to appreciate-put a box or two of Zam-Buk in your next parcel. All druggists, or Zam-Buk Co.

The Danish steamer Tabor has been sunk by a submarine, Lloyds Shipping Agency announces. The crew was saved.

A considerable number of the Ruman-lan prisoners of war have been sent to the occupied part of Northern France by the Germans, according to the Rhen-ishe Westphalische Zeitung, as quoted in an Amsterdam dispatch to Reuter's. The paper says that these prisoners will be employed as agricultural laborers.

Brisk artillery duels on the Struma River were recorded by the official French Macedonian statement of yes-terday. Raids by British troops were

A NERVOUS WRECK AT 46--A MIRACLE OF STRENGTH AND VITALITY AT 50-TAXING

Doctor Says Nuxated Iron Is Greatest of All Strength Builders-Often Increases the Strength and Endurance of Delicate. Nervous Folks 200 Per Cent in Two Weeks' Time.

NEW YORK, N. Y .- Not long ago a man came to me who was nearly half a century old, and asked me to give Mr. Putnam said that, as a man com- him a preliminary examination for life insurance. I was g from a city, he did not feel like astonished to find him with the blood pressure of a boy elling an audience of farmers that they of 20, and as full of vigor, vim and vitality as a young man; in fact, a young man he really was, notwithstanding his age. The secret, he said, was taking iron-nuxated harder than any other class of men. What he did suggest, however, was that iron had filled him with renewed life. At 30 he was in the same amount of work should be bad health; at 46 he was careworn and nearly all in.

Now at 50, after taking nuxated iron, a miracle of vitality and his face beaming with the buoyancy of youth. As 1 In this connection he mentioned that have said a hundred times over, iron is the greatest of all he had seen during the past year in large fields two or three teams plowing a single medicines and nauseous concoctions and take simple nuxat one time, each team drawing a single ated iron, I am convinced that the lives of thousands of at one time, each team drawing a single plow. Proper equipment would have re-leased two or three of the men for other work. He added: "You can apply other work. He added: "You can apply the principle in other directions for yourselves."

Referring to pleas for economy which had been made to the farmers, Mr. Putnam said he did not feel justified in preaching economy to the farmers while so many people in the cities were giving evidences of extravagance. Tradesmen reported that their returns in the cities and towns during 1916 were from 30 to 40 per cent greater than in 1915. When he saw a woman in the city going to some meeting in connection with patriotic work in her \$6.000 or \$1.000 automobile, and contrasted this condition with conditions in the country districts, where many women, having given every cent they could afford for patriotic purposes, were asking for materials and yarns in order that, though they could not give, they might work, he felt that preaching economy to the people of the rural districts, would be an insuit.

Co-operation Counts.

He said dairymen were among the first of the farmers to realize the advantage of co-operative work. There is still room for progress, and he declared his conviction that, had the dairymen got together six months ago to consider the question of securing the conditions and the proper form. And filed his bioded with from hefore he went into done the proper form. And filed his bioded with from hefore he went into done the proper form and filed his bioded with from hefore he went into consider the question of securing to consider the question of securing the many another has gone down to include the proper form. Some consideration of securing to consider the question of securing the many another has gone down to include the proper form. And file his bioded with from hefore he went into down the proper form. And this after they had in some cases because he knew the secret of great strength and endurance and entirely get rid of all sy the principle in other directions for trouble, etc. The real and true cause which started their
