SEES CANADA AS LEADER IN WORLD

Must Utilize All Available Natural Resources, Dr. Powell Tells Empire Club.

Ellis T. Powell, LL.B., D.Sc., editor of The London Financial News, addressed the members of the Empire Club on "Scientific Imperialism" at a luncheon in the King Edward Hotel yesterday.

"There is a tendency in some directions, but not in Canada," said Dr. Powell, "to confer imperialism to be an exploded force. Of course it was so in the ancient sense of arbitrary and tyrannical domination, but it is acquiring new senses for this generation. Canada is reducing the powerful forces of nature into subservience to mankind." He declared that it would be a magnificent world when the elemental natural forces were harnessed and made to do a vast amount of work that now had to be done by men. People would then be freer to acquire a deeper knowledge of the spiritual, moral and social laws laid down by the Creator. In the relief from the pressure of physical work men would find new problems to solve, he said.

Dr. Ellis said that long ago climatic, political and economic considerations had forced the conclusion on him that Canada was destined to dominate the future of the North American continent. And not only would she become a leader in the western hemisphere but also in

the civilization of the future world. In that role, he said, she would need all her energies to solve the great political and social problems which will confront her. Therefore she must utilize all available natural forces and resources. What has been done already in this direction Dr. Powell described as a flash of social imperialism in the very highest sense.

"With the resources you have in Canada there is nothing you cannot do with the aid of modern machinery," stated Dr. Powell. "You have assets here already visible that ought to enable you to finance yourselves to any extent."

Dr. Powell stated that the resources of this country were not understood in Great Britain and that the people in the old country knew far less about Canada than Canadians knew about Britain. He had suggested to government ministers that tours should be arranged so that the average British business man might learn of Canada's potential power in the world's business.

OSGOODE HALL NEWS

CANADIAN NATIONAL RAILWAYS' MUSKOKA SERVICE.

The last trip of special week-end train, northbound, Toronto to Parry Sound, Saturdays 12.15 noon, will be September 11th; southbound, Sunday, September 12th.

DAYLIGHT SAVING WILL END SUNDAY

Expect Announcement of Acquiring Mackenzie and Mann Interests.

The board of control yesterday unanimously passed a resolution that daylight saving time in Toronto should end on Sunday next at 2 o'clock a.m., instead of on September 25. On January 1 next the citizens will have an opportunity of declaring for or against daylight saving next year.

In reply to a question of Controller Ramsden, Mayor Church informed the board that he expected an announcement would be made in a few days regarding the acquisition of the Mackenzie and Mann. The mayor blamed the Drury government for holding up the acquisition of the Metropolitan in North Toronto by the city.

For the arrest of the murderer of the 11-year-old boy, Philip Goldberg, who met his death at High Park recently, the board agreed to submit a request to the police commissioners to order an award of \$500.

Notwithstanding the opposition of Controller Cameron, who objected to procuring entertainments at the expense of the city, it was decided that the members of the Loyol Order of the Moose should be entertained at the Exhibition, coupled with a motor ride thru the city.

That a cut of five cents a quart on the delivery of milk in the city could be effected was the opinion given by Ald. Risk to the board. He said that

milk was being retailed at seven cents a quart within a hundred miles of Toronto. A committee composed of Controller Cameron, Aldermen Risk, Hamilton, Plewman and the mayor will make a survey of the milk supply situation in the city.

It was decided to obtain the opinion of the city solicitor regarding a proposed bylaw to induce cigarette smokers to destroy their "butts." Such a bylaw was asked for by W. H. Smith, of the social services commission, who volunteered the statement that many small boys started the smoking habit by picking up cigarette butts thrown away, especially at street car stopping places.

Cheques for War Bonus.

The board ruled that war bonus should be paid to all civic employees who went to the front up to the time that they left the city's service, and instructed Finance Commissioner Ross to issue the cheques.

Relatives of men who fell in action will receive the amount of the war bonus due to the soldier up to the time he was killed, while those who did not return to the city's employ after the war will be paid the war bonus up to the date of their discharge from the army.

Former policemen who had to resign to join the army will also receive the bonus.

T. S. R. Percentages.

That unless the monthly percentages accruing to the city from the operation of the Toronto street railway are paid to the city within the calendar year, there would be a very serious shortage in the revenue as anticipated in the estimates, necessitating an overdraft, was the opinion furnished to the board by Finance Commissioner Ross.

He recommended that before any policy was decided that unbiased and independent reports be secured which would show the financial position of the railway company, as well as the parent company's position with re-

gard to allied or subsidiary companies.

The board decided to obtain the opinions of Messrs. Tilley & Kilmer in regard to the deferring of the payment of the percentages, and also to ensure that the city was safeguarded.

Acting on the advice of Commissioner Chambers, the board decided to fence Rosedale athletic field, at a cost of \$4,267, and to erect a bleacher stand to seat 3,800, at a cost of \$11,400. Controllers Ramsden and Cameron opposed the motion, the former declaring that he was opposed to any scheme that gave certain people the privilege of collecting the fees. The mayor said, after discussion, that the city would get a percentage of the gate receipts of the championship games. He added that the Rosedale field would provide a home for all soccer, lacrosse and rugby clubs in the city.

WORKER ELECTROCUTED AT TORONTO PLANT

Matthew Caruna, a Maltese, living at 2372 St. Clair avenue, was instantly electrocuted yesterday when 5500 volts passed thru his body at the Swift Canadian plant, St. Clair avenue.

The man was putting a plug in a transmitter in the building when he came in contact with the live power.

John Gormannin, his helper, bravely took his own life in his hands in trying to save Caruna.

Men worked over Caruna for some time. The pulmotor was applied but unavailingly, and life was pronounced extinct by Dr. W. M. Martyn, 558 St. Clair avenue.

P. E. I. TIMBER.

Only a small part of Prince Edward Island is covered with saw-timber. The annual cut is about equal to seven and a half million feet, board measure.

LIQUIDATOR GIVES ANSWER TO LABOR

Report on Dominion Company Based Upon Records, Mr. Wade Says.

Asked as to a statement in The World in which members of the International Brotherhood of Boilermakers and Shipbuilders take exception to the report of Oser Wade, the liquidator, ascribing the assignment of the Dominion Shipbuilding Company to "the attitude of labor," Mr. Wade said:

"The report was not based upon opinion, but upon statistical records or facts. If confirmation was necessary, the liquidator could not have asked for anything better than the admissions being made by labor representatives themselves, appearing in the press.

"For the information of those who are not aware of the facts, I wish to say that, several months ago, when labor advocated a universal standard of Canadian shipyards, it advanced an argument the wages being paid in Toronto yards, and was informed in reply that the other plants would have to go out of business if those conditions were established. Following that warning, given to labor, they asked for and received another advance from the Dominion Shipbuilding and Repair Co. last spring.

"The result is quite obvious. There were formerly two large shipyards in Toronto. Both are now in liquidation."

Too Fat?

EASY, HOME SELF TREATMENT

Overstoutness weakens, the liver becomes sluggish, fat accumulates, heart action becomes weak, energy fails, work is an effort and the beauty of the figure is destroyed.

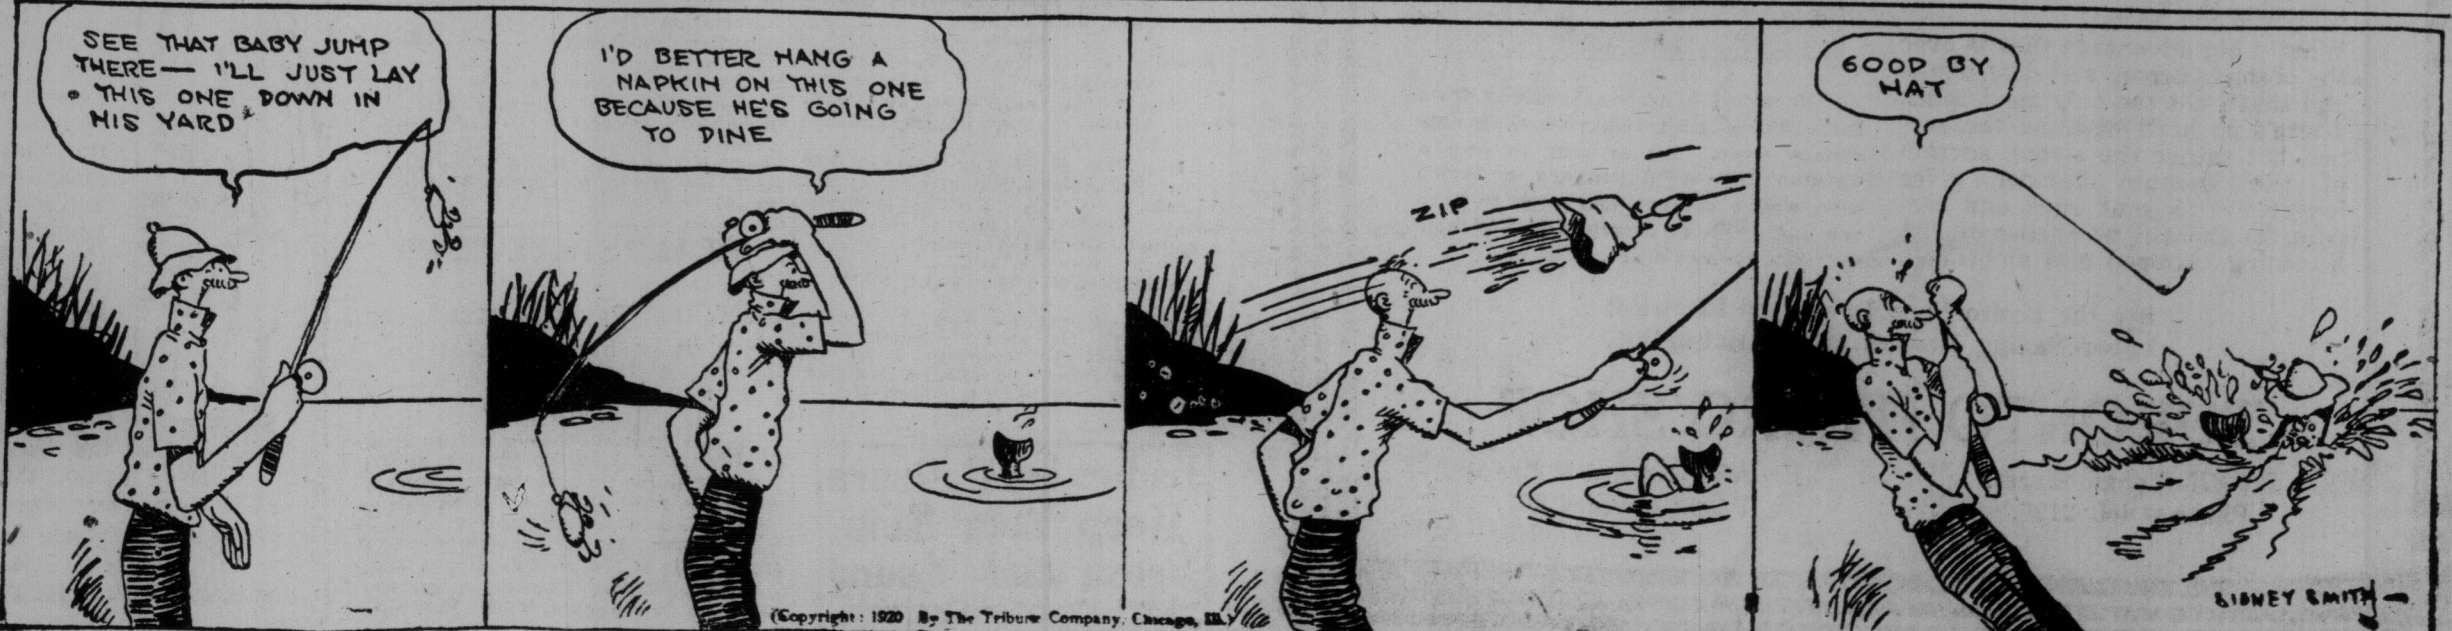

Fat excess is unhealthy, it shortens lives of many.

Don't allow your health to be ruined through a burden of unhealthy fat. Exercise alone does not remove it. Get from any drug store a bottle of Korein and follow Korein system simple directions that come with it.

Weigh yourself and take your measurements every week. Continue reducing until you are down to normal. Korein system is harmless, is pleasant, and even a few days' treatment is likely to show a noticeable reduction. Legions of testimonials.

Korein system (pronounced kor-ayn) has succeeded where other remedies, etc., have failed. It is the delight of those who wish to improve their figure and to acquire a young, active appearance.

Guarantee that you reduce 10 to 60 pounds, (whatever you need to) or cost you nothing! Buy Korein at any local pharmacy; follow directions. Or write for free booklet to Korein Company, 2525, Toronto, Ont.

THE GUMPS—IS A HAT BAIT OR WEARING APPAREL?
