

Time of going through the Falls.

THE Falls are level (or still water) about three hours and an half on the Flood, and about two hours and an half on the ebb, which makes it passable four times in 24 hours, about 10 or 15 minutes each time. No other rule can be given, as much depends on the floods in the river St. John, and the time of high water or full sea, which is often hastened by winds, and in proportion to the height of them.

Mail Days.

The Eastern and St. John, N. B. Mail arrives in Halifax on Saturday at 3 o'clock, P. M. and leaves do. Wednesday at 1 p. m.

Western do. arrives on Wednesday at 7 o'clock, p. m. and closes on Monday, at 4 p. m.

The Croup — For this disorder, so fatal for children, M. Bretonneau, a medical man at Tours, who has long made the subject his study, appears to have at length discovered a certain cure. It consists of blowing alum powder into the throat of the child by means of an instrument which M. Bretonneau has invented for the purpose. In some cases two or three repetitions of this treatment are sufficient; in others, five or six are necessary. Numerous children, who were rapidly falling victims to this frightful disorder, after the exhibition of the antiphlogistic and other supposed remedies have been cured by M. Bretonneau.
