MARKET REVIEW

Possibility of Rail Strike Overshadows Whole Outlook in Canada—Report That Coal Prices Already Soaring—Steel Outlook Cheerful

FINANCIAL

(Ottawa Journal.) Whole outlook in Canada is at present overshadowed by the imminent possibility of the railway strikers going out on strike. There can be but little doubt that such a development would precipitate a very grave tie-up. The railways maintain that they have in reserve a large number of locomotives which they can place in commission as the old ones play out. But it is a matter of common knowledge that for years past the extent to which they have carried this policy will be quickly revealed under the searching test provided by a shutdown of the regular repair shops.

One ray of hope pierces the general gloom of the labor situation. This is provided by the prospect that the settlement of the shopmen's strike in the United States may pave the way for solving the difficulties on this side of the line.

How much the railway tie-up is doing to aggravate the coal shortage is indicated by the report that there is an accumulation of 500,000 tons of bituminous coal at non-union mines in the southern states. But there, doubtless, the bulk of it will remain in the hands of the coal distribution and re-exporting.

Coal Prices Soar. General apprehension over the duration of the strikes and the probability of a coal famine is shown by the barometer of prices. In July, the price of coal in the United States was 10 cents a ton. In the first week of August, it was 12 cents a ton. In the second week, it was 14 cents a ton. In the third week, it was 16 cents a ton. In the fourth week, it was 18 cents a ton. In the fifth week, it was 20 cents a ton. In the sixth week, it was 22 cents a ton.
