PARENT'S DOOM WAS SOUNDED BY ALARM

Daughter Gave Father Time Limit to Sign Confession Then Killed Him.

Atlantic City, N. J., Aug. 6.—Ten minutes by the clock was the time limit set by Mabel Coleman, seventeen-year-old daughter of Nathaniel Coleman, for her father to sign a paper setting forth what he had attempted to do when he entered her bedroom. Failure of Coleman to have signed the paper when the alarm went off as it had been set, resulted in three shots being fired at him, two of which took effect and resulted in his death.

Half an hour after the tragedy at the Coleman home in Pleasantville yesterday morning the girl was taken into custody by Magistrate Brown. She virtually confessed committing the crime and was immediately sent to Mays landing and locked up in the county jail.

Acting Assistant Prosecutor Burton Gaskill, accompanied by Chief of County Detectives John F. Wilson and A. R. Littlefield, court stenographer, went to the county seat early this afternoon.

The investigation made by Detectives Wilson and Mays disclosed that the girl stood in fear of her father because of forced relations which she resented. She had lived with her father since the separation of her parents seven years ago.

According to her story, her father entered her bedroom early yesterday morning and, upon seeing him, the girl hurriedly obtained a revolver, which had been owned by her father. She ordered him out of the room under pain of being shot. The man left the room.

For fully forty-five minutes the girl kept the father under cover of the weapon. He had gone out into the yard, but returned to procure food for chickens.

The girl still fondled the revolver. After feeding the poultry the man came into the kitchen and began preparing breakfast for himself. It was then that the girl informed her parent of her purpose.

DO TELEPHONE WIRERS REDUCE NUMBER OF LIGHTNING STORMS?

Regina, Sask., Aug. 6.—(By Canadian Press)—Is there any connection between the extension in the west of rural telephone lines and the alleged decrease in rainfall? This question is raised in a letter from G. W. Booth, of Seaman's, Sask., to the Regina Leader. Mr. Booth writes as follows:—There is considerable comment on the decrease in rainfall throughout the west, each year seems a little drier.

"I have been a resident of the Seaman's district for fourteen years and know that severe electric storms are very rare of late years, whilst in the early days we used to get every year a number of heavy rainfalls accompanied with severe electrical disturbances.

"There is, I believe, a possibility that electric wiring and rodding is doing much to lessen disturbance in the sky, for instance read Professor Doid on letting electricity escape from ground to sky through his lightning rods, and also his remarks on groundings.

"I cannot remember one close violent display of lightning or thunder near our home since 1912, when our first rural line was built. It would be interesting to know if there is anything in this."
