

CAPITAL PRIZE, \$75,000. Tickets only 25¢. Shares in proportion.

Louisiana State Lottery Company. We do hereby certify that we supervise the drawings for all the Monthly and Semi-Monthly Drawings of the Louisiana State Lottery Company...

Special Arrangement. We have made an arrangement for supplying our readers with general news and other matter, which with the local news in our own columns will give our subscribers a wider and more acceptable range of reading matter than has ever before been offered to the local public at the same cost.

For one subscription price we thus furnish our subscribers with two papers—a metropolitan and a home weekly. By this arrangement our readers are placed in command of the whole situation. All events of interest, local, national, and foreign, will be presented completely and promptly by one or the other of these publications. To those who are not familiar with the character of the Toronto Weekly News we would say it is the best representative of Independent Journalism in Ontario.

The Toronto Weekly News is a thirty-two column paper, "cream full" of telegraph and general news (for advertisement) pictures, humorous sketches, stories, short and witty editorials on the topics of the day, written in a familiar yet incisive style, and in all departments evidently aims to give facts and news, appear to be its motto. We trust that all our readers will avail themselves of this unusual opportunity of securing a general weekly and a first-class local paper at so trifling a cost.

Specimen copies of the Toronto Weekly News may be seen at this office. The Toronto Weekly News and the MICHAMICHI ADVANCE will be sent for one year to every one of our subscribers, who pays his subscription account in full to date, and one year in advance.

This means just what it says—The Toronto Weekly News, one year for nothing. Send in your subscription. Hereafter the names of no new subscribers will be added to our list without payment in advance, but all new subscribers will receive the two papers at the regular rate \$1.50 as well as those who pay arrears and their subscriptions in advance.

Subscribers to the ADVANCE, who prefer the Canadian Dominion and Farmer—a monthly journal—to the Toronto Weekly News may have it on the same terms as above.

Miramichi Advance. CHATHAM, AUGUST 28, 1884.

A Nice Business. Mr. Robert Orr, of Fredericton, visited the S. W. Miramichi last week for the purpose of removing salmon pickets left in position by fishermen and placed there by the numerous class engaged in fishing illegally. It is a commentary on the Miramichi officers' mode of "not doing it" that a man has to be sent from the St. John river to perform their neglected duties. And, yet, each one of them is, no doubt, prepared to abuse and give the lie to those who expose them in systematically shutting their eyes to the illegal work going on around them. We have, in the past, advised that men be specially sent to protect our river, from the month of August until after spawning time and that the services of local officers, who take the Department's pay for doing nothing, be dispensed with. The Department, however, has not the courage to dismiss the do-nothings, but it so manages the special service we recommended as to afford them a premium on their indifference. The visit of the officer from the St. John river, for instance, is made an occasion for extra allowance to the local officers, whose neglect of their duty has necessitated his coming here. They actually, went with him as guides to point out the illegal contrivances, which they themselves had neither the honesty nor industry to remove, their time to be paid for in the form of traveling expenses or, perhaps, disbursements by Mr. Orr. With the Dominion retaining such officers in its service and the local government's effort to protect our river by placing their guardianship in the hands of two gentlemen—one a resident of St. John City and the other of this City of Fredericton, it is no wonder that so many salmon and grisee are being destroyed daily.

G. M. BOSTWICK & CO., St. John.

ways be a suspicion that the officers are afraid to do their whole duty.

The Lobster Fishery. The extension of the Lobster fishing season recently made by the Department of Marine and Fisheries has largely failed in the object for which it was sought, owing to the notice that the extension was granted not having reached many interested until after the regular season had expired and their traps were taken. The result is that operators in many districts have received no benefit whatever from the concession. The petitions for the extension were allowed to lie over for a good while before they were acted on, and favorites of the Department were, meantime, notified privately that they might continue to fish. Others, however, who desired to comply with the law and keep themselves out of the private information, took up their traps, believing the petition was rejected. In many districts it was two days after the season had expired before even the officers were informed of the extension. This is, however, the "spiced oil" with the Fisheries Department.

That Phantom Ship. The sketch in the Editor of the Advance entitled "The Phantom Ship of the Bay" has been a great success. Our readers do not appear to have been disappointed in the picture, and we are glad to hear that it has been so successful. The sketch was written by a St. John correspondent recently. The Telegraph exposed the picture and gave our sketch in full with the following comments: "The sketch is a very good one, and it is a pity that the author should have been so careless as to let it be exposed. The sketch is a very good one, and it is a pity that the author should have been so careless as to let it be exposed."

At the time the sketch appeared in the Advance it seemed to attract the attention of the world, but that paper, with its usual energy and misanthropy, endeavored to convey the impression that someone else had, at some time or other, produced the sketch. That kind of detection, however, appears to be a natural outgrowth of the mind that "regulates" Mr. Fielding in connection with the Halifax election, and reproduced, as original, the plea of a distinguished member of a fraternal organization for full fellowship with the down-trodden African.

WAR.—France has declared war against China.

ABSD.—The Sun has an absurd despatch from Ottawa to the effect that Hon. Alex. Mackenzie is to be named as Sir John A. Macdonald's successor as Minister of Railways.

THE HALIFAX ELECTION gave a greater victory to the Local Government candidate than at first announced. Mr. Fielding's majority being about 200. The Conservatives injudiciously introduced Dominion politics into the contest.

ANNEXATION.—The Conservative C. O. Cook is out in favor of annexation. It says: "The latest scheme talked of is the annexation of Jamaica to Canada. Let us have the United States and Mexico first—then Jamaica and the West Indies."

IN THE WEST.—Subscribers in the United States and the Western section of the Dominion will please take notice that no papers will be sent from this office after the present issue unless their subscriptions are prepaid. The address slips indicate the date to which the paper is paid for, so that those who do not receive the ADVANCE after that date will know the reason.

TARDY JUSTICE.—We are gradually regaining some of the privileges of which the Fisheries Inspector at St. John caused our fishermen to be deprived a few years ago. A recent order of the Department allows herring fishing with nets, from the 15th September instead of, from 1st October, as heretofore. The net must, of course, be duly licensed by the Overseers of the districts where fished.

THE LATE DR. DOW.—Dr. Dow, of Fredericton, died on Wednesday morning of last week at his home in Lindenville, Vermont, U. S., on Christmas, 1825, and was therefore in his fifty-ninth year. He came to Fredericton about 1848 and practiced his profession with marked success for 30 years. In 1822 he was elected to the Legislative Assembly for York, leading the poll, and sat without interruption till 1870, when he was defeated. He was again re-elected in 1874 and defeated in 1878. He was a kindly man, with a good word for everybody, and an honest man in politics.

Old Yellowskip. The Sovereign Grand Lodge L. O. F., will meet this year at Miramichi, Minn., on the 15th of September. The Maritime Provinces will be represented by Mr. Andrus of St. John, and Mr. Benjamin of Charlottetown. Extensive preparations are being made in the West for the entertainment of the delegates. A reception will be tendered the members of Sovereign Grand Lodge and their ladies at Chicago. Leaving the depot of the Chicago, Milwaukee and St. Paul Railway on Thursday, 11th, at nine o'clock by special train, the delegates will reach Tomah, Wis., early Friday morning, where dining cars will be attached for the benefit of the delegates. The party can await arrival at La Crosse for breakfast. At La Crosse the party will be met by the Reception Committee of the Grand Lodge of Minnesota. The train will reach Winona at nine o'clock, where two hours will be devoted to a drive around the city. On Saturday, September 13th, there will be an excursion and lunch, with speeches at Lake Minnetonka. On Sunday, at Minneapolis, services will be held at St. Mark's Episcopal Church, Rev. Dr. J. W. Venable, Grand Chaplain of the Sovereign Grand Lodge, officiating. On Monday, September 15th, the Sovereign Grand Lodge will be escorted to the Grand Opera House, where addresses of welcome will be delivered by the governor of Minnesota, the Mayor of Minneapolis, and the Grand Master and Grand Patriarch of that jurisdiction; followed by responses by the

Grand Sirs. Citizens will tender a carriage ride to points of interest, followed by a banquet. Tuesday afternoon there will be a special train from Minneapolis to St. Paul, a carriage ride in St. Paul, and a banquet. The lodge of Stillwater will tender an excursion to the Dalles of St. Croix on Wednesday, and the ladies of the party; and other trips will be made. Lake White Bear, Calhoun, &c.—St. John Globe.

Diocesan Circular. His Lordship the Bishop of Chatham has issued the following Circular to the clergy of his Diocese.— CHATHAM, N. B., Aug. 22nd, 1884. REV. AND DEAR SIR— Our Holy Father Pope Leo XIII. now happily governing the Church, special prayers and devotions, be celebrated this year, on occasion of the Feast of the Nativity of the B. V. Mary. And our revered Metropolitan, the Most Rev. Archbishop of Halifax, has addressed to his flock a Pastoral Letter on this subject, of which we send you a copy herewith. We also send you a copy of the same programme ordained in the Archbishop's said Pastoral Letter by his Archdiocese, contained in the following extract: "I beg to call your attention to the instructions of the Holy Father, who ordains that in each church in this Diocese, where a Priest is residing, a solemn Triduum in honor of the Blessed Virgin, shall be celebrated on the 27th, 28th and 29th of September of this year. The devotions to consist of the recitation of five decades of the Rosary, after which the Blessed Sacrament will be exposed, and the Holy Eucharist administered by the Priest for each time on the three days. On each day a Plenary Indulgence, applicable to the souls in Purgatory, shall be granted, and the Holy Communion within the Triduum and praying according to the intention of the Holy Father."

power would not have been used so soon, were it not for the request of our dear Mother. And still men, whose knowledge is just sufficient to enable them to blaspheme, would have us believe that her intercession is of no avail, and that God never exercises His omnipotence, in modifying the forces of nature, at the prayer of the just man. God abrogates no law when working a miracle; he who is the author of natural forces and as a consequence of natural laws, has not abdicated his mastery over them; they exist because he has willed it; they act in this or that manner because he gave them that initial direction. As the skilled engineer, by a slight movement of his finger, can, without changing or destroying the laws of nature, arrest the steam clock, or send to pieces a complicated machine, produce various and, apparently, contradictory effects, can make the huge hammer or threatening saw arrest its destructive course, and turn back when within an inch of a human head; so God, the architect and engineer of the universe, without destroying his own laws, can guide and govern their action, can stay the march of disease, arrest the storm clock, or send to pieces a complicated machine, produce various and, apparently, contradictory effects, can make the huge hammer or threatening saw arrest its destructive course, and turn back when within an inch of a human head; so God, the architect and engineer of the universe, without destroying his own laws, can guide and govern their action, can stay the march of disease, arrest the storm clock, or send to pieces a complicated machine, produce various and, apparently, contradictory effects, can make the huge hammer or threatening saw arrest its destructive course, and turn back when within an inch of a human head; so God, the architect and engineer of the universe, without destroying his own laws, can guide and govern their action, can stay the march of disease, arrest the storm clock, or send to pieces a complicated machine, produce various and, apparently, contradictory effects, can make the huge hammer or threatening saw arrest its destructive course, and turn back when within an inch of a human head; so God, the architect and engineer of the universe, without destroying his own laws, can guide and govern their action, can stay the march of disease, arrest the storm clock, or send to pieces a complicated machine, produce various and, apparently, contradictory effects, can make the huge hammer or threatening saw arrest its destructive course, and turn back when within an inch of a human head; so God, the architect and engineer of the universe, without destroying his own laws, can guide and govern their action, can stay the march of disease, arrest the storm clock, or send to pieces a complicated machine, produce various and, apparently, contradictory effects, can make the huge hammer or threatening saw arrest its destructive course, and turn back when within an inch of a human head; so God, the architect and engineer of the universe, without destroying his own laws, can guide and govern their action, can stay the march of disease, arrest the storm clock, or send to pieces a complicated machine, produce various and, apparently, contradictory effects, can make the huge hammer or threatening saw arrest its destructive course, and turn back when within an inch of a human head; so God, the architect and engineer of the universe, without destroying his own laws, can guide and govern their action, can stay the march of disease, arrest the storm clock, or send to pieces a complicated machine, produce various and, apparently, contradictory effects, can make the huge hammer or threatening saw arrest its destructive course, and turn back when within an inch of a human head; so God, the architect and engineer of the universe, without destroying his own laws, can guide and govern their action, can stay the march of disease, arrest the storm clock, or send to pieces a complicated machine, produce various and, apparently, contradictory effects, can make the huge hammer or threatening saw arrest its destructive course, and turn back when within an inch of a human head; so God, the architect and engineer of the universe, without destroying his own laws, can guide and govern their action, can stay the march of disease, arrest the storm clock, or send to pieces a complicated machine, produce various and, apparently, contradictory effects, can make the huge hammer or threatening saw arrest its destructive course, and turn back when within an inch of a human head;
