

COMMISSIONER CURREY DIVORCE CASE AGAIN IN SESSION AT FREDERICTON

Special to The Standard. Fredericton, N. B., July 29.—The International Commission appointed to inquire into the uses of the St. John River and its tributaries with respect to obstructions to navigation resumed its sittings here this morning and continued the taking of evidence throughout the day.

The morning session was taken up with the reading and the evidence of the various acts of Legislature relating to the Fredericton Boom Company and the St. John River Log Driving Company, the act incorporating the boom company passed in 1844, was submitted by Mr. Gregory, counsel for the Canadian Commissioners.

Mr. Gregory also submitted acts in amendment passed at different times defining the powers vested in the company, the act incorporating the St. John River Log Driving Company passed in 1886 was next put in evidence after a brief discussion, Mr. Gregory explained that all operations on the river could become members of the company by filing a statement before the annual meeting of the quantity of lumber they expected to drive during the year.

He admitted in reply to Mr. Fellows that the company had the exclusive rights to drive all the logs between Grand Falls and Fredericton, and also on the Aroostook River from a boundary line. This, of course cannot apply to rafted logs.

Unchanged Conditions. Lewis H. Bliss informed the commission that people living along the river had the same right to raft logs that they had enjoyed before the amalgamation of the Boom Company and the St. John River Log Driving Company.

An act passed in 1907 authorizing the transfer of property of the Fredericton Boom Company to the St. John River Log Driving Company was put in evidence as also was the act passed in last session consolidating various acts relating to both companies.
