F. J. NISBET, Exchange Manager

June 1st, 1912.

A five year old boy living on Brussels street fell into a trench filled with water, on Union street, on Saturday morning. Had it not been for the timely assistance of James G. Trainor, who pulled the boy out of the trench, the little fellow might have drowned.

Torpid Liver in the Spring

In the spring both the liver and kidneys are overworked in an effort to remove the poisonous impurities which accumulate in the system during the winter and in overcoming the trying effect of the change of temperature.

Once the liver gets sluggish and torpid, there are all sorts of troubles with the digestive system. Sour stomach, flatulency, wind on the stomach, acute indigestion, irregularity of the bowels and bilious headache are among the symptoms.

The liver must have assistance. The process of restoration will be hastened if the kidneys are also invigorated and strengthened, for on these two organs depends entirely the purification of the blood. Both these filtering organs are acted on directly and promptly by Dr. Chase's Kidney-Liver Pills. For this reason there is no treatment which will more quickly rid the blood of poisonous waste matter than this great prescription of Dr. Chase. Put it to the test this spring and escape the tired, languid feelings consequent on a poisoned system.

Tired Women

Many a woman is doctoring for neuralgia, rheumatism, other pains and aches, when the cause is a torpid liver. Take a box of Dr. Chase's Kidney-Liver Pills and get a pair of Sobell's Foot-Easers. These will hasten the recovery. Even suppose you honestly believe you are sick, get a pair of Sobell's Foot-Easers and wear them for ten days. If you feel better, you have not acted the part of a selfish and back-tired body and general weakness. Take the "Foot-Easers" back, and the price will be cheerfully refunded. Sold by all druggists and shoe dealers and made by The Sobell Mfg. Co., Ltd., 478 King Street, W. Toronto.

Should Mrs. Pankhurst Have Gone to Prison?

Rev. H. S. Mahood Preaches Strong Sermon in Favor of English Suffragette Movement.

Rev. H. S. Mahood preached an interesting sermon based on the suffragette movement before a large audience in the Congregational church last evening. He said every great movement in history had a cause, and he believed the suffragette movement represented a just and national cause. The women of England saw the social injustices and moral evils of the times, and they were determined to secure political power in order to use their influence to improve matters. The appalling conditions surrounding the women of England were due to the fact that women had not been given the right to possess their own souls. The uprising of the suffragettes was a protest against these infernal conditions. The preacher wished them God's speed in their effort to get their rights and rectify the evil conditions of the time.

Who gave man a monopoly of everything, he added. The members of the British parliament should have been sent to jail instead of Mrs. Pankhurst, for the politicians against which Mrs. Pankhurst was protesting. It was a shame and disgrace that a woman of Mrs. Pankhurst's intelligence and ability should be in jail, while so many patriots watched representatives of the people in the British parliament went scot free. Women had proved their intelligence and ability in other departments of life, why should she be denied the right to vote? It would be a poor woman who could not make better use of the ballot than 90 per cent. of the male voters did. In the great work of upbuilding Christianity women had done infinitely more than men.

CANADA BRICK COMPANY, LTD

Million Dollar Company to Manufacture Brick.

A public offering of \$100,000 of 7 per cent. cumulative preference stock of the Canada Brick Company Limited, is being made by the Montreal Bond Company, Limited. This stock carries with it a bonus of 40 per cent. of common stock. The capitalization of the Canada Brick Company is \$1,000,000, divided into 400,000 shares of 2.50 per cent. cumulative preference stock of which \$200,000 will be issued. Of the preference stock to be issued one half or 100,000 has been taken firm, leaving only 100,000 for public subscription. The Canada Brick Company, Limited, are erecting two plants at Montreal, one being located at Mile End and the other at St. Lambert. The two plants will have a total capacity of 15,000,000 bricks per year. The St. Lambert plant will be operating early in June and will commence by producing 20,000 bricks per day. The brick will be manufactured by what is known as the sand-line process, which is of comparatively recent date. It was first discovered in Germany in 1880. There are now 280 plants in that country manufacturing this kind of brick. In the United States the first plant was built in 1901. In 1909 the number of plants had increased to 74. In Canada there are 19 companies manufacturing this kind of brick.

According to tests made by Milton, Hersey & Company it is shown that sand-line brick is equal in strength and quality to the best kind of pressed brick and possesses greater regularity of form and uniformity of dimensions than the ordinary clay brick. The brick is in much demand for facings and general superstructural work for foundations, fireplaces and all structural work where a high class brick is required. The machinery for the manufacture of the brick is being supplied by the Berg Machinery Manufacturing Company of Toronto, who will supervise the installation, and have agreed as a condition precedent to payment for the machinery to produce at each plant 200,000 bricks at the rate of 20,000 per day.

There is almost an unlimited market for brick in Montreal and vicinity and at the present time the demand far exceeds the supply. It is estimated that this year there will be 325,000,000 bricks required for this city. The National Brick Company and the Laurier Brick Company, which are now one concern, estimate their combined production for 1912 at 135,000,000 bricks. As this company controls all the available supply of clay for brick making in Montreal and vicinity any further increase in the number of bricks manufactured must come from some other material than clay.

As a matter of fact contracts have already been closed by the Canada Brick Company for the sale of over half of their first year's estimated output at prices in excess of the minimum price given in the statement of the estimated earnings. The entire output could have been sold had the company desired to guarantee delivery. The raw materials for the manufacture of the brick have been secured by contracts in perpetuity from the Joliette Sand and Gravel Company and the Dominion Sand and Stone Co.

At the present time high class bricks are selling in Montreal at \$18 per thousand. The Canada Brick Company estimate the cost of manufacturing their brick at \$7 per thousand, and have put the net selling price at \$12 per thousand, which is considerably less than the price specified in the contracts now made. The output is placed at two-thirds of the entire capacity. On this basis the net income will be \$120,000 per year, the expenses of manufacturing \$70,000 and preferred dividends \$14,200, which leaves a balance of \$35,800 available for common stock, being equal to 12 per cent. on the stock. The company is fortunate in having on the board of directors some of the best known business men in Montreal, among whom are C. H. Cahane, K. C., P. Loomis, H. A. Lovett, K. C., G. E. Giles and A. G. Cameron. The tremendous activity in building which is now going on in Montreal and which promises to increase in volume during the next few years, has created a tremendous demand for all kinds of high class building material. It is largely to meet this demand that the present company was organized and everything points to a most successful career.

VIGOROUS ADDRESS BY TORONTO ORATOR

Protestant Missions in Quebec the Theme of H. C. Hocken, at Mass Meeting Yesterday Afternoon.

A vigorous plea for greater support for the Protestant missions in the province of Quebec was made by H. C. Hocken, editor of the Orange and a controller of the city of Toronto, in the course of an interesting address delivered in the Opera House yesterday afternoon. The speaker was given a great reception and his remarks provoked a good deal of applause.

Col. A. J. Armstrong presided over the meeting and Rev. L. A. McLean read a portion of Scripture and offered prayer. Many prominent members of the Orange Order were on the platform and there was a large audience in attendance.

In opening the speaker said the thing that impressed him most, coming from the West, was the thorough British character of the people of St. John.

Up in Toronto there were some people who thought the people down here were not as British as they might be. But the fact seemed to be that the people of the Maritime Province were a good, or better than the people of any part of Canada.

One question he was interested in was the maintenance of British ideals. To prevent the French-Canadian idealism being set up, the brethren should give more liberal support to those institutions engaged in evangelizing and spreading the spirit of Protestantism in Quebec.

"Our business is to make our cit-

Schlitz could give you

LIGHT BUT BEER

keeps best in BROWN BOTTLES

When beer in light bottles is exposed to light, the beer develops a disagreeable odor and "skunky" taste.

All brewers even cover the hand-holes of the case before shipping, to keep out the light.

Schlitz in Brown Bottles won't spoil after the case is open.

Pure beer, properly aged, will not cause biliousness.

Physicians and surgeons prescribe Schlitz, instead of malt tonics, as a builder of health.

See that crown or cork is branded "Schlitz."
