## ACCORDING TO LAW.

THE WORLD NOT GOVERNED IN A HAPHAZARD WAY.

REINS HELD BY DIVINE RULE.

duct of Muman Affairs-Nations, as Well as Individuals, Feel His Con-

no being such as you or I have ever seen could have lived on it a minute. down is the dominant wish of most of those who are not as high as you are. The carth's crevolution has shifted. The earth's center of gravity is changed. Once flowers grew in the arctic and there was snow in the tropic. There has been a redistribution of land and sea, the land crumbling into the sea, the sea swallowing the land. Ice and fire have fought for the possession of this planet. The chemical composition of it is different now from what it once was. Volcanoes once terribly alive are dead, not one breath of vapor—the ocean changing its amount of saline qualities. The internal fires of the earth are gradually cating their way to the surfaces—upheaval and subsidence of vast realms of continent.

Moravians in Greenland have re-Moravians in Greenland have re-

moved their boat poles because the advancing sea submerged them. Linnaeus records that in 87 years a great stone was 100 feet nearer the a store, and when the September great stone was 100 feet nearer the water than when he wrote. Forests have been buried by the sea, and land that was cultured by farmer's nocan be touched only by sailor's and that was cultured by farmer's nocan be touched only by sailor's and Dingle Bay of Ireland and the fiords of Norway, where pleasure boats now float, were once valleys and glens. Many of the islands of the sea are the tops of sunken mountains. Six thousand miles of the Pacific Ocean are sinking. The diameter of the earth, according to scientific announcement, is 189 miles less than it was. The entire configuration of the earth is altered. Hills are denuded of their forests. The frosts and the waters and the air bombard the earth till it surrenders to the assault. The so-called "everlast-ing hills" do not last. Many railroad companies cease to build iron the assault. The so-called "everlasting hills" do not last. Many railroad companies cease to build iron bridges because the iron has a life of its own, not a vegetable life or an animal life, but a matellia life. an animal life, but a metallic life, and when that dies the bridge goes down. Oxidation of minerals is only Mosses and seaweeds help destroy the rocks they decorate.

The changes of the inanimate earth only symbolize the moral changes. Society ever becomes different for Society ever becomes different for better or worse. Boundary lines between nations are settled until the next war unsettles them. Uncertainty strikes through laws and customs and legislation. The characteristic and legislation. The characteristic of this world is that nothing in it is that the arbitration planned last would forever sheathe the sword and appike the gun and dismantle the fortress the world has on hand two wars which are digging graves for the flower of English and American soldiery. From the presence of such geological and social and national and international unrest we turn with thanksgiving and exultation to the flower of settled, but in higher thattudes than we have ever trod.

hations which go continuously and persistently wrong perish; that happiness is the result of spiritual condition and not of earthly environment; that this world is a school-touse for splendid or disgraceful raduation; that with or without us

ish? We have in this American na-tion all the elements of permanence row from others any trowels for upbuilding or torches for demolition. Elements of ruin—nihilism, infidelity, agnosticism, Sabbath desecration, iny, sensuality, extravagance, they are all here. Elements of safety—God worshiping men and women by the scores of millions, honesty, benevolence, truthfulness, self sacrifice, industry, sobriety and more religion than has characterized any nation that has ever existed; they are all here. The only question is as to which of the forces will gain dominancy—the one class ascendant, and this United States Government, I think, will continue as long as the world exists; the other class ascend-world exists; the other class ascendiged in the limited States goes into the defeated.

ment of spittle, then God can do anything he says he will do. As yet he has taken only one sword out of a whole armory of weapons. Do not get nervous, as if the Lord were godiented.

Christ's triumph will be satan and his cohorts tied to our Lord's chariot wheel, with all the abominations of all the earth bound for an eternal of all the earth e is as to which of the forces will gain such small pieces that other govern-ments would hardly think them

been more surely in the balances than it is this minute. Do right, and we go up. Do wrong, and we go down.

Another thing decided in the same Another thing decided in the same high place is that happiness is the result of spiritual condition and not of earthly environment. If we who may sometimes have a thousand dol
We enter among groups filled with of earthly environment. If we who may sometimes have a thousand dollars to invest find it such a perplexity to know what to do with it and soon after find that we invested it where principal and interest have gone down through roguery or panic, what must be the worriment of those having millions to invest and whose having millions to invest and whose here correspond in magnitude with

well as Individuals, Feel His Controlling Power For Good.

Washington, Nov. 12.—The idea that things in this world are at loose ends and going at haphazard is in this discourse combated by Dr. Tralmage. The text is Psalms cxix, 89, "Forever. O Lord, thy word is Settled in heaven."

This world has been in process of change ever since it was created—mountains born, mountains dying, and they have both cradle and grave. Once this planet was all fluid, and no being such as you or I have ever the settled in the controlled by the contr have more emoluments or honor or ease than they have. To take you down is the dominant wish of most

illumined souls. They wish every-body well. When the fire bell rings, they do not go to the window at midnight to see if it is their store of it and he just put on the finishing

dollars, for the old man never owned anything more than the farm of seventy-five acres, which yielded only enough plainly to support the household. They, have more happiness in one month than many have in a whole lifetime. Would to God I had the capacity to explain to you on how little a man can be happy and on how much had other people. "But" says some one other people. "But" says some one other people. "But" says some one other people. "But" says some one. explain to you on now little a man can be happy and on how much he may be wretched! Get your heart right and all is right. Keep your heart wrong, and all is wrong. That is a principle settled in heaven.

Some have wondered why graduation day in college is called "comparative number saved and lost?" There satan thrusts in the mathematical profile of redemption. He suggests that you find out the mathematical profile of the people. "But," says some one, "what percentage of the human race will be saved? What will be the comparative number saved and lost?"

Some have wondered why graduation day in college is called "commencement day," when it is the last day of college exercises, but graduation days are properly called commencement day. To all the graduated it is the commencement of active life, and our graduation day from earth will be to us commencement of and most an my text and find that there are things forever settled, but in higher latitudes than we have ever trod. "Forever, O Lord, thy word is settled in heaven."

High up in the palace of the sun at least five things are settled—that hations which go continuously and persistently wrong perish; that happiness is the result of spiritual condition and not of earthly environ—dition and not of earthly environ—directions with garlands to be thrown to us. What a commencement day it was for all of us about to graduate! But mightier day will accarate feet walked this way to accept our salutation.

By the bloody throes of the mountain on which Jesus died, and by the wreaths? Will it be a resounding "Come!" or a reverberating "Depart?"

was inclosed in darkened crypt and by the Olivet from which he arose, while astonished disciples clutched.

while astonished disciples clutched for his robes to detain him in their cause. A large part of the Bible is taken up with telling us what the world will be. There is a large army, human and angelic, now in the field, but God's reserve forces are more numerous and more mights. Worlds. Then you can swing out defiance to all opposition, human and diabolic. In conquering his foes he conquered yours. And have you noticed that passage in Colossians that represent him "having despoiled printing than these." more numerous and more mighty than those now at the front, and if than those now at the front, and if he could in Gideon's time rout the Midianites with a crash of crockery, and if he could in Shamgar's time triumph? But, oh, the difference in triumph? But, oh, the difference in and if he could in Shamgar's time overcome a host with an ox goad, and if in Samson's time he could defeat an army with a bleached jaw-bone, and if the walls of Jericho went down under a blast of perfor-ated ram's horn, and if in Christ's day blind eyes were cured by ointment of spittle, then God can do ment of spittle, then God can do sion of hosannas by millions set for ever free. The only shackled ones of

such small pieces that other governments would hardly think them ments would hardly think them worth picking up.

Walk on in the cemetery of nations and see the long lines of tombs—the long lines of the changed that the sermonology will be so changed that the sermonology will the battles in which the chalices will be filled "with the new wine of the kingdom," Under arches commemorative of all the battles in which the bannered calls to repentance, for all will have been enriched; no more gathering of alms that lived 500 years.

Our own nation will be judged by the same moral laws by, which all other nations have been judged. The judgment day for individuals will probably come far on in the future. Judgment day for individuals will probably come far on in the future. Judgment day for nations is every day may, every day weighed, every day may, every day weighed, every day expressed and the beat afflicted nerve or lung or tooth or eye or lump or tooth or e Oh, that coming day of the world's captivity. Then will come a feast in which the chalices will be filled

NEW MILLINERY.

Jeweled and Metallic Effects For Hats and Bonnets.

The glittering effects so much desired will be perfected. In that millennial for costumes are carried into millinery. A great many hats and bonnets of black spangles are seen, and gold and silver more sparingly. As for ornaments, they are of like character. Imitation wings, made of gauze, spangles and jewels, are in great demand, and newer yet are the immense butterflies of similar materials, with velvet or chenile bodice and slender antennae. One of these butterflies is almost enough for an ordinary bonnet. of some one's presence because you do not want to know him; each one Velvet and silk flowers, more particular larly roses, are to be very much worn

BUTTERFLY HAT.

during the winter. On some of the most attractive millinery models they are largely massed, not necessarily of the natural colors. Often they are arranged to fall next the hair and appear in combinations with fur, which is also a fash-ionable millinery trimming. Entire hat shapes are covered with short pile fur and are elaborately trimmed for dress

wear.

The hat illustrated today is of heliotrope felt. The round brim is bent sharply down at the right and is edged with a cord of violet velvet. Coques and ends of violet velvet, lined with yellow velvet, form the trimming, in the midst of which is set a huge butterfly of black feathers, the iniddes of white the inside of the wings being of white feathers. At the left side are placed three calla lilies, one white, one black and one yellow. JUDIO CHOLLET.

BELTS AND BUCKLES. Waistbands Newest In Style and

Much has been said concerning the disappearance of the round waist, but the strongest evidence in favor of its con-tinued use is found in the innumerable belts and clasps and buckles which are produced in expensive qualities for win-ter wear. The belts are all rather narsilk elastic and have two clasps just alike, one at the back and one in front. These clasps are broad and suggest a corselet effect. They are of wrought metal or are jeweled and are often made over fine leather or kid, although not ap-

HEAVY CAPE. pearing on a kid belt. There are also velvet belts with cut steel buckles, and belts of the soft, wrinkled variety, which belts of the soft, wrinkled variety, which on a pretty figure are perhaps the most pleasing style. Patent leather belts with leather covered tongued buckle are smart looking and accompany plain tailor made gowns or a fiannel shint waist very appropriately. Belts entirely of metal are becoming out of date.

A picture is given of a cape of gray golf cloaking. It is edged with rows of red stitching, and set same distance

red stitching, and set some distance above the edge is a line of mixed plaid fringe. A wide collar and revers are of plaid edged with fringe, and the strap and high, flaring collar are also of fringe. Pearl buttons ornament the upper part of the cape.

"Foolishest play I ever saw!" exclaimed Mr. Meekton with the air of a man who knows he is going to make a hit. "The heroine walks up stately and emphatic and exclaims, 'Where should a wife be except by her husband's side!' "

"Why, that's the wrong view of the

MILLINERY NOTES. New Ideas For Winter Hats and

Bonnets.

A novelty brought out for winter wear is the felt hat adorned all over or simply upon the brim with lines of stitching. These are appropriate for wear with stitched tailor made gowns. Very large hats with high crowns have

the brim covered with stitched velvet All sorts of headdresses, of all epochs are called upon to satisfy the present

RIDING HABIT. fashion. There are antique bandeaux, mediaeval coronets and diadems for the ballroom, Spanish mantillas for evening use in the carriage, directory felt hats for the street and all sorts of capricious shapes for various occasions.

Felt, velvet, crape, lace, ostrich and other feathers and flowers, especially of silk and velvet, are the chief millinery

materials, with the addition of jet, metal and jeweled effects of all kinds.

The shapes of hats this winter are very odd and striking, especially as regards the crown, which is sometimes small and flat, sometimes immensely tall felt brim frequently has a velvet crown, or vice versa.

A picture is given which shows the newest riding habit. It is of black cloth and has a comparatively short skirt. The tight coat has short coattails and a man's coat collar and revers and is cut away in front to show a plain vest of white pique closed by small pearl buttons. Linen cuffs and a linen collar, with turned down corners, are worn and a plastron cravat of white grosgrain. A silk riding hat accompanies the habit.

MILLINERY NOTES.

Winter Hats and Bonnets and Their

Velvet is strongly to the fore in winter millinery. A novel decoration for a hat is composed of coques of velvet, ar-ranged like the petals of a flower in an enormous chou. In the middle is a jew-eled ornament which represents the pis-

Bigness characterizes most of the ob jects intended for hat trimmings. Mention has several times been made of the gigantic butterflies, composed of feathers or lace and spangles, which are so fash-ionable. Immense flowers are also in fa-

PRINCESS GOWN.

vor, great roses of velvet or immens poppies, one or two of which are suffi-cient for the trimming of a hat.

Tulle and mousseline, so universally used as summer millinery decoration, are now associating themselves with felt and

now associating themselves with felt and velvet shapes for winter.

White lace veils with application designs remain in the van of fashion.

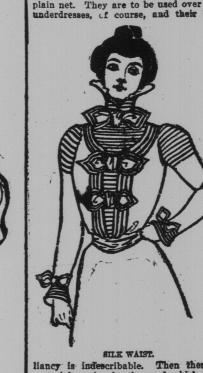

The picture shows a princess gown of steel grat cloth. It is crossed and draped at the waist under a gold buckle. The curved front of the skirt is edged by a ruffle of black mousseline de soie, and around the foot of the skirt are lines of black braiding. The bodice has a wide plastron with horisontal groups of platts, and bretelles, composed of ruffles of black mousseline de soie frame it and pass around the back, forming a bertha. The tight sler, wes have groups of circular plaits. The hat, which is of black veltet, is 'trimmed with black ostrich feathers ar,d a bow of pale pink velvet seared by a gold and jeweled buckle.

Judia Challer.

METALLIC EFFECTS.

Continued and Increased Favor of Brilliant Trimmings.

For the past two or three years span-gles of all colors and metallic embroider-ies have been in great demand, but it appears that the past is as nothing compared with what is to be expected during the coming winter. The latest importations show not merely braid and narrow bands of metals and beading with passementerie and detached motifs, not merely yokes, boleros and revers heavy with glittering embroidery, but entire gown shapes which are a mass of spangles and jewels. These are in princess form, with or without sleeves, the foundation being plain net. They are to be used over silk

liancy is indescribable. Then there is material coming by the yard which is of generous width and is most elaborately embroidered. In fact, it is all embroidembroidered. In fact, it is all embroidery and so intricately constructed that is is difficult to tell whether net, moussaling de soie or lace, all of which appear in it, is the actual groundwork upon which the metal and jeweled effects are founded.

A waist is shown which is made of changeable taffeta. The back is plain, and the front is full and is opened over a guimpe and plastron of taffeta horisontally plaited. The waist is trimmed with bands of narrow black velvet and has three bows of silk trimmed with velvet. The high collar and the top of the sleever. The high collar and the top of the sleeves are plaited, and at the wrists are velvet bands and sikk bows. The belt is of black velvet.

JUDIO CHOLLET.

FASHION HINTS.

Great Variety In the Details of Cos-

Fashion is in many ways eelectic this season. Anything that is new and attractive is acceptable, provided it does not run counter to the main lines of the mode. The general tendency is, however, to return toward the period of the empire and the directory. The softness of materials, clinging methods of design and molding of the figure by the gown, with the floating tunies which yet do not conceal the form, all show the influence of that time.

Valenciennes lace, wide or narrow; English point and point d'alencon are greatly employed upon elegant costumes,

greatly employed upon elegant costumes, and evening wraps also display the fa-voritism which lace has so long enjoyed

DINNER GOWN. and which shows no signs of abating. In a many cases the lace is combined with magnificent incrustations of embroidery in which metallic and jeweled effects ap-

The sketch shows a dinner gown. The redingote skirt has a train and is of black velvet, opening over a front of cream satin covered with point de venise and terminated by a flounce of mousseline de soie. The black velvet bodice is line de soie. The black velvet bonce is laced with velvet bands over a plastron matching the skirt front. The elbow sleeves are of black chenille net work, with velvet bands, and are finished with a frill of lace. The belt is entirely of fligree and jewels. White kid gloves are worn.

Nice, Easy Going Trains. A gentleman who has been traveling in Java thus writes about the Dutch coloni-Java thus writes about the Dutch colonial railways. He says: "Trains are used in Java not on account of their speed, but on account of the long distances one has to cover. If you are in a hurry and you haven't more than five miles to go, walk. You may find some difficulty in keeping up to the train if it is going down a stiff gradient but you will more than make up to the train if it is going down a stiff gradient, but you will more than make this up on the flat, and you'll romp past it on coming to the slightest ascept.

"It is a solemn fact," he continues, "that once in the course of a mile walk along a highwar running parallel with the railway line I caught up to and passed a 'snell' (express train). Toward the end of the walk I entered a shop to purchase some cigars, and only after I had been in the shop ten minutes did the train again pass me."

Pygmy Camels of Persia. The western part of Persia is inhabited by a species of camel which is the pysmiotits kind. They are snow white and after on that account almost worshiped by the people.
