Cornell Out Rowed Harvard by Three Lengths -Contest Was Exciting From S'art to Fieish

Boston, May 25.-In a magnificent race, which was contested stubbornly throughout, Cornell 'Varsity eight-cared crew defeated Harvard 'Varsity eight, on the Charles river today, by three lengths. The event was a spendid exhibition by two carefully trained and finely balanced sets of oarsmen, especially in view of some adverse conditions, due to wind against the tide, and a bad swell left by pleasure boats which the police had fail-

The 'varsity event was run off with the tide and against the wind. The crews were given a flying start, and both eights caught the water at practically the same moment. Both Harvard and Cornell showed skill in getting away, pulling a slow quarter stroke, then half, and then a three quarter stroke, until the boats were gotten steadily away. Mr. Courtney said he was satis fled with the showing his men had mad and characterized the work of Harvard as "splendid," but he declared the conditions had afforded no satisfactory of what either crew could do.

NELSON AND HERRERA DID NOT MEET LAST NIGHT

ring-side. Later Herrera agreed to weigh in, but Nolan said that Nelson had waited two hours for him to do so and that he was not prepared to go on with the fight, so it was announced to the crowd that the fight was off.

The articles of agreement called for the weighing in at 6 o'clock p.m. Both men were to scale 131 pounds. The men were on hand at the stipulated hour. There were scales there, but Herrera said they were out of order, and could not be adjusted. After half an hour's argument, Jacob sent Herrera to dinner, after that he refused to allow the Galacian to weigh. Nelson offered to go to the baths to weigh in, but Jacob declined. Following stacement was made by Jacob: "I had Herrera at McCarey's office at a quarter to 6 o'clock. The scales were six or seven pounds off. We argued and squabbled until 6.15 and then I sent Herrera to eat. After that I would not consent to weigh. I claim the weight forfeit because I was on hand at the hour to weigh fin and I also claim the appearance money, because I had my man in the ring at 9.30. I lived up to the articles, and I do not think we are to blame for the failure.

Nelson's manager said: "I had Nelson at McCarey's office at 6 o'clock. We found the scales out of order. I wanted to go to the baths and weigh, but Herrera refused. I then stated that I would claim weight forfeit and went back to the baths. Nelson came into the ring as you saw and made the proposition to fight at 140 pounds."

Manager McCarey, of the club, said: "Twice during the afternson the scales were tested and found correct but at 6 o'clock, when they came to be used, they were 15 pounds off, and it was impossible to get the men to come to an agreement. I am very much disappointed to bring them together."

Annual Meeting Held in Toronto—New Directors Elected

Toronto, May 25—At the annual meeting of the Imperial bank, authority was given the directors to increase the capital stock from four to five million dollars and the board of directors was increased from eight to eleven members Authority will be required from parliament to increase the capital, as the four million laready authorized has been issued, the last million having been put out in June. 1905. No announcement was mide as to the future rate of dividend but remarks of the president were taken to mean that no change should be expected. If the new capital is all put out in one issue at 208, it will be in the proportion of one new share to four old, and give rights at current prices worth 12 per sheare.

A bylaw was passed to enable the directors to pay a substantial salary to the president if Mr. Whike at any time considers it necessary to seek relief from the heavier duties of the general managership. But she passage of the bylaw does not contemptate any such change for some time, and was, in fact, precautionary. The imperial bank shock was firmer on the Toronto exchange, indicating that any disappointment about the dividend rate was more than allayed by the prospects of rights.

Among the new directors are William Whyte of Winnipeg Contina Mulock of Toronto, and Mr. Tunner of Quebec.

During the six weeks ending May 15, Wimnipeg received from the south 170 cars of fresh fruits and vegetables or just about four and a haif cars for every working day of that period. Of these shipments of fruit 40 cars were filled with bananas, oranges filled the next largest number, and other ours were composed of lemons, pincapples, and tomatoes. When it is remembered that all this fruit, with the exception of bananas, pays duty, it gives some additional spur to westerners to fight any advance in the fruit tariff. So far no fruit has arrived from British Columbia. It was rather expected that they would be able to forward some to-matoes about the middle of May but no doubt the home market has been too keen to allow any of these to be shipped east for another month at least. MANIAC IS CAPTURED

Chicago, May 25—A despatch to the Record-Herald from Huntington, ind., says An insane telegraph operator blocked the entire Webash railway system in this state for half an hour yesterday by sending out unintelligible messages to train despatchers. All trains had to be stopped.

When chief operator Beauchamp went out to his luncheon be left Everett Keliman in charge of the keyboard which controls all the wires Having been recently overcome by the heat, Keliman unknown to his employers, was in an irresponsible condition, and as soon as the room was vacaited, he, decided that the past methods of train dispatching were all wrong.

Smitten with the idea that it would be entertaining to the rural population to run all passenger rains on a freight schedule and vice versa, with a head on collision or two on every division to give the wreeking crewe practice, he started out to put it into execution.

Kellman sent message after message to the dispatchers, countermanding all standing orders. He requested all passenger trains to run backwirds and to turn to the right at every crossing. He also desired all tracks cleared for a special train of 90 cabooses, which was running through the rapids at 100 miles an hour, carping the president of the United Stures and his cablinet.

Leadville, May 25—When silver touched ff 5-8 today there was a quet smile of settisfaction among mine owners.
