THE CLIMAX MILK HEATER

Even Heating The desirability of even heating is well understood. With the Climax heater the temperature can be regulated exactly. Every particle of milk that passes through it is heated to just the temperature desired.

Rapid and Thorough This heater operates on the correct principle

to accomplish rapid and thorough heating. The milk is distributed in a thin sheet or layer, and the heating medium is caused to circulate continuously, producing an even distribution of heat.

No Steam in Contact with Milk The outer cylinder is filled with water and steam applied to its entire length, heating the water and thus heating the thin sheet of milk. No steam comes in contact with the milk, as this has been found quite objectionable, especially where foul water and boiler compounds are used.

Very little steam is required for its use.

Either Pump or Gravity System The heater may be attached to a force pump, or connected direct to the vat, where the gravity system is used.

SIZES AND PRICES

- No. 1, Capacity 1,500 lbs. milk per hour.....\$7.50
- No. 2, " 3,000 " " 8.50

'He who by the plow would thrive
Must never walk but always drive'

BE UP-TO-DATE.....

Save MONEY, LABOR and
TEAM by using the

Ontario Riding Plow

This plow has a lighter draft than any other plow doing the same work. Anything a plow should be asked to do it can do with less strain on team or ploughman.

It is the simplest plow made and can be run by any man, woman, boy or girl who knows how to manage a team.

We make single and double Riding Plows with mouldboards adapted for any soil and cutting any width of furrow.
