Exercising

THE Directors of the above Company have not spared anything in the building of this new Horse Exchange. The stables which are built of cement and brick, will stall between 200 and 300 head of horses, and are considered by judges who have seen them, to be the most sanitary they have yet seen. We have sold on an average of 100 horses per week since the opening of this great Horse Market, and now that the success of the Horse business is assured, we are in a position to handle

Breeders' Stock Sales

of all kinds, Cattle, Sheep and Hogs. Breeders will find that advertising from a central place like Toronto will be advantageous in many ways, as this is unquestionably the most complete market of its kind in America for both buyer and seller. We have our own Railway Chutes, which are the finest, and can load any number of cars at once on both G. T. R. and C. P. R. No charge for loading or unloading stock of any kind.

THE MCCORMICK

THE
BINDER
THAT
MAKES
PROSPEROUS
FARMERS

HARVESTS
GRAIN
WITHOUT
ANNOYANCE
OR
DELAY

If you have a McCormick binder you know you have a right working machine.

There is no question about it. It was among the first successful binders in the field. Today it is called "the standard of its line." Farmers everywhere bear testimony to its good work and durability.

You have no trouble with its knottor. It is exceedingly simple and positive working, having only two moving parts. The adjustable reel enables you to handle the grain in all conditions—tall, short, down or tangled.

The handles are squarely butted and tightly bound. The two tension handles it so there is no knocking and no breaking.

The binder has a strong main wheel, and an exceedingly strong, solid main frame. Yet the machine is of light draft.

All shafts carrying heavy loads run

on roller bearings. There is great range of adjustment everywhere. The draft is low and direct. Machine balances perfectly, no neck weight or side draft. Machine is easily mounted on trucks for transporting.

Binders are made in both right-hand and left-hand, in standard and wide (8-foot) cut.

The McCormick line also includes binder twine mowers, tedders, sweep rakes, side delivery rakes, hay loaders, stackers. Also a complete line of tillage implements and seeding machines, comprising disk drills, shoe drills, hoe drills, cultivators and seeders, smoothing, spring-tooth and disk harrows, land rollers and scufflers, also gasoline engines, cream separators, hay presses, wagons, sleighs and manure spreaders.

For particulars about binders or any other machine call on local McCormick agents, or write the nearest branch house for catalogs.
