

DENT'S SCHOOL PAMPHLETS.

Edited by Richard Wilson, D.Litt.

A new series of School Reading designed to impress young pupils with the significance and importance of the time in which they live; and dealing not so much with the incidents of the Great War as with the History and Literature which lie behind it, the Geography and Science which it suggests, the spirit of determination and heroic sacrifice which distinguished it, and the New Age which lies ahead of it. The value and importance of citizenship within the Empire.
