FOUNDERED AT THE DOCK

Steamer Ainsworth Got Beached Just

width, and to have covered the track to a depth of nearly, if not quite, 20 feet in places. It bore with it a great quantity of earth, rock and trees and the foot of it spread out over the ice on the lake. This slide came from the south side of the lake, and none had been known to occur previously at that point as it came for a portion previously at that point as it came for a portion of its course through green timber. On Sunday another slide is said to have taken place in the same vicinity, but somewhat further east. The injured bridge near McGuigan will be repaired in a day or two, but until the engine may run over it, the transfer is somewhat long. All the men that can be worked are engaged in clearing away the slides, and the management is making every possible effort to open the line. Passengers are taken through daily, but freight is not re-ceived for immediate transportation.

Mining News and Transfers. C. L. Webb, of the Kaslo-Montezuma Mining and Milling company, was in the city during a portion of the past week and left for Seattle on Monday morning. The organization of the company is practically complete, only some minor matters needing adjustment. The capital has been fixed at \$1,250,000 in shares of \$1 each. The erection of the tramway and concentrator this property will be commenced as soon as for this property will be commenced as soon as the season will permit the construction of a road. Wilhelm Hanson, of Kaslo, has transferred to the Silver Bear Mining and Concentrating com-pany, the Cub Fraction mineral claim lately located on the south fork of Kaslo creek and adjoining the Silver Bear mineral claim.

In con-ideration of the sum of \$5,000, Eleanor McKinnon and A. A. McKinnon. of Ainsworth have transferred to Charles R. Connor, of Spokane, all their interest in an undivided one-half in the Lucky Boy and Liberty, of which Mr. Connor owns the other half. They have also conveyed to him the Margaret Dora and Bonanza, which were subsequently located. All these claims are on the south fork of Woodberry creek about two miles from Kootenay lake.

An agreement has been recorded by which R. P Briggs, Joshua Briggs and B. R. Briggs bind themselves to transfer to the Briggs-Phillips Mining company of Spokane, the mineral claims Phillips, Ben Hur, Josh Collins, Essex and Bedrock, all situated on the south fork of Kaslo creek. The Ben Hur of this group has had considerable development and some very promising ore has been taken from it.

Steamer Ainsworth Sunk. joining the Silver Bear mineral claim.

Steamer Ainsworth Sunk. The steamer Ainsworth took a surveying party in charge of J. H. McGregor, to the townsite of Lardo on Sunday morning last to survey the Cop Giant. mineral claims Uncle Mike, Silver Tip, Vaiparaiso, Crescoe and '49, lately transferred by C. A. Freeman, F. W. Rolt and Henry Croft of Rossland in trust for all parties interested. Returning to Kaslo in the afternoon the steamer was taken to the east side of the lake and loaded with lime rock for E. E. Traves. About thirty tons of rock were placed on board, afterwards three or four cords of wood placed on the forward deck, and the boat started on her journey.

She was in the middle of the lake, when, either from bad storage or some other unknown cause, She was in the middle of the lake, when, either from bad storage or some other unknown cause, the boat listed, and began to take in water. The water gained so quickly that it was deemed advisable to beach her. She reached Kaslo and was swinging to the wharf when she sank, and now lies submerged with the exception of the pilot house and a portion of the hurricane deck. An effort will at once be made to put her afloat with the aid of scows placed alongside and hawsers run under her hull. It is not thought the work will be unduly difficult.

The steamer Kaslo, belonging to the Kootenay Smelting company, at Pilot bay, is again in commission and yesterday brought a barge laden with lime rock from the quarry at Schroeder ereek. It will go to the smelter of the Hall Mines at Nelson.

Municipal Affairs.

A bylaw has been introduced in the city coun- Big Three Bluebird cil by Alderman Garland, chairman of the finance BC Gold King committee, authorizing a temporary loan of Bruce \$4,000 to be paid out of the revenues for the current year. It is understood that either of the local banks is ready to make the loan.

The council also at a meeting on Saturday evening adopted a report of the public works committee recommending that a qualified engineer be employed to establish centre lines on the principal streets in conformity to the original stakes, with instructions to put in permauent iron hubs at the intersections, and also there was some discussion amongst the aldermen as to

was some discussion amongst the aldermen as to whether the work might be done by a civil engineer or require the services of an authorized provincial land surveyor. No conclusion, however, was reached upon the question. Personals and Brevities.

Eastern Star the reclamation works, at which it has been engaged for several years. On Friday a barge Enterprise laden with supplies and material was dispatched Evening Star for the scene of operations in tow of a tug. Two local sports, without any known previous pugilistic record, are said to have fought out their differences in scientific style at an early hour last Saturday morning on the sand flats east of the city. It was the old story of a woman in the case. There is, however, no official record of the performance either in the police office or else-

merformance either in the police office or elsewhere.

Representatives from Rossland, Spokane and Sandon are expected in Kaslo today, Tuesday, to confer with a similar representative of the city with reference to the formation of an international baseball league for the inland empire. There are many enthusiasts who predict an abundant success for the league, if formed, while there are others who doubt if the enterprise can be made to pay running expenses.

D. C. McGregor left on Tuesday morning for Spokane to secure an ample supply of seasoned lumber for the various building enterprises in which he is largely engaged. He is constructing three or four large buildings, besides the warehouse and store for himself, and finds it profitable to import the higher grades of lumber. to import the higher grades of lumber.

MINING AROUND GREENWOOD. Big Contract to be Let on Sunset and

Big Contract to be Let on Sunset and Silver Crown.

Greenwood, April 10.—Tenders are asked for goo feet of tunneling on the Sunset and Silver Crown mineral claims in Deadwood camp, under bond to Montreal parties. The Sunset lies practically between the Great Hopes and Mother Lode. It is known to have one very large ledge of ore, but the exact width is not known, and the tunnelling proposed will determine it. The proof of 203 feet of ledge on the Mother Lode has demonstrated the possibilities of the camp.

Ou the Summit claim in Summit camp Archie Connors has been doing good work. He has now two shafts 25 and 12 feet deep and has exposed a splendid body of chalcopyrite, but the size of the ore body is not yet known. The Roundary Falls

clossing quotations on the exchange today were as follows: Butte. 3½ bid; Commander, 15 bid; Deer Park, 20 asked; Evening Star, 11 asked; Great Western, 15 asked; Monthe Cristo, 14 asked; Monthe Cristo, 14 asked; Monthe Cristo, 14 asked; Phoenix, 10 asked; Poorman, 0. K., 27% asked; Phoenix, 10 asked; Phoenix, 1 The assessment work on the Boundary Falls laim is finished and has made a very satisfacre body is not yet known.

There will be hosts of prospectors on the upper waters of the Kettle river this summer, and to meet the demand for supplies G. B. Taylor will open a general store at the mouth of Rock creek this coming week. The people here now understand the railway scheme and whilst we want a railway very badly and it would be a great convenience, yet if this is a sop to soothe whilst the British Pacific deal is being consummated the price can be too dear. On the St. Maurice, in Central camp, the ledge has been struck and the Paris syndicate owning it and several adjoining claims will put in improved machinery and do much work this summer. E. A. Bielenburg commences work on the Anaconda group on Monday next.
