COMING EVENTS

At the Goold, Shapley and Muir Works Yesterday.

我是 George Lennox Caught in a Shaft and Whirled to His Death.

A very sad fatality occurred yes terday at the plant of the Goold, Shapley and Muir Company, when Mr. George Lennox, of William St. was whirled to his death.

Deceased was working in the too room, together with some eight or ten other men, and at the time of the fatality was engaged in oiling a It is supposed that his shafting. sleeve caught and he was dragged in and whirled around at a terrific rate having one arm and one leg severed and sustaining other severe hurts His companions rushed to throw th belt, but the unfortunate man drop ped to the floor before this could b done. Dr. Stinson was called, by death had been almost instantane ous. Later, Dr. Hicks, coroner, wa called but decided that an inque

was not necessary. Deceased was fifty-four years age, and was most highly thought of by all with whom he came in con tact. He had resided in the city fo some twelve years, and had been en ployed at Pratt and Letchworth's and the Grand Trunk. He leaves a wif and three children to mourn his great loss, Idella, Irving and Gordon

Routine Meeting of Library Board

The meeting of the Library Board which was postponed from last week was held last evening, in the Board Room of the Public Library, with Rev. G. A. Woodside in the chair. Judge Hardy, F. W. Ryerson, T. Hendry, Mayor Bowlby, E. G. Carlin, G. E. Quinlan were the other mer bers present.

Little important business was transacted, routine matters occupy-ing the most of the attention of the Board. Accounts to the amount of \$559.78 were passed and ordered to be paid. The book committee submitted a list of three or four hun-dred works which they recommend. The report was adopted and an ordwill be given for the selected

A meeting of the Library Institute of this district will be held tomorrow at Tavistock, and it was de cided to appoint Miss Carter as delegate to represent the Brantford Library at this convention.

******************************** HOW TO KEEP WELL

BY JOHN W. S. McCULLOUGH, M.D., D.P.H., CHIEF OFFICER OF THE PROVINCIAL BOARD OF HEALTH.

~~~~~~<del>~~~~~~~~~~~</del> A NEW SEWAGE TREATMENT.

T THE LAST MEETING of the Health Officers' Association Mr. T. Chalkley Hatton, Engineer to the Sewerage Commission of Milwaukee, described a new treatment of sewage by means of activated sludge which bids fair to outrival the methods of sewage treatment in present use. The method, first outlined by English treatment in present use. sewage experts, consists in treating sewage with old sludge (the solids of sewage) rich in bacteria—about 21,000,000 to the cubic centimetre. The mixture while held in tanks has air in fine bubbles forced through it. This process is continued from two to four hours; the sewage is run into tanks

where it mixes with the activated sludge. In Milwaukee, where the process has been carried on extensively in an experimental way by Mr. Hatton, the proportion of activated sludge used is 20 per cent. and 0.437 cubic feet of air to each gallon of sewage is pumped through the mixture. About 95 per cent. of the purification is accomplished in the first hour. The sewage then flows into another tank and the sludge sedimented out. The sewage liquid from which 95 per cent. of the bacteria is removed flows away continuously, and the sludge is dried, pressed, and

In the Milwaukee plant one million gallons of sewage produces three to sold for fertilizer. five thousand gallons of sludge. This, when dried, is worth \$12.00 per ton as a fertilizer. It costs \$3.00 a ton to dry the sludge, which is worth \$6.00 a ton. It requires a million gallons of sewage to produce a ton of sludge, so that there is a profit of \$3.00 on each million gallons of sewage. This of course does not include the cost of operation, up-keep, and interest
The advantages claimed for this method are, that,—

(1) There are no odors.(2) The effluent is never offensive. The sludge is inoffensive and easily dried.

(4) The sludge makes a certain profit.
(5) The method is cheaper than any other known complete method. This method of sewage treatment is under consideration by several towns in Ontario. It has been shown to operate successfully in zero weather, and is worth the attention of communities contemplating installation of sewage disposal plants.

#### TUBERCULOSIS.

A cold abcess is a collection of pus or matter caused by the bacillus of tuberculosis. It is called "cold" because, while an ordinary abcess has the usual inflammatory symptoms of pain, redness, and tenderness, these are absent in cold abcess. This form of abcess occurs both COLD ABCESS in children and adults; and the patient, in addition to the local treatment of the abcess itself, should be very carefully examined for symptoms of lung or other forms of tuberculosis. If there is any fever he requires rest, the best of food, outdoor life and

If there is any fever he requires rest, the best of food, outdoor life and should abstain from alcoholics. No particular medicine is required, but if any is thought necessary it should be administered under the direction of a skilled physician. There is no danger if the patient with tuberculosis of the lungs does

contain the bacilli.

not expectorate, but it must be remembered that such patients usually have some expectoration, and the sputum contained in the SLEEPING WITH tubercle bacillus constitutes the danger. Such A CONSUMPTIVE patients should sleep alone until it is made certain by repeated examinations that the sputum does not Besides this, patients with tuberculosis are better to sleep alone because they have greater advantages in the way of fresh air

QUESTIONS AND ANSWERS.

J. S. G., Hamilton, E. Q .- Kindly inform me how I can prevent the breeding of flies about

A .- If you have a horse or cow keep the manure in a fly-proof box A.—If you have a noise of cow keep the manufe in a hy-pict both and have the box emptied and the contents taken away at least weekly. The careful disposal of manure is the most important anti-fly measure. If the manure cannot be taken away promptly it should be treated by dissolving borax in water and sprinkling the manure, using one pound of borax to every 16 cubic feet of manure.

Sulphyte of iron is another means of prevention of fly breeding in

Sulphate of iron is another means of prevention of fly breeding in manure. Two pounds (2lb) in one rallon of water is sufficient for the manure from one horse for one day.

rilla has been more successful than any other medicine in expelling humors and removing their inward To remedy the condition that exists at the present time on the city narket, that is, of merchants buying produce by the wholesale from their own places of business at an advanced price, Mayor J. W. Bowlby proposes a re-enactment of by-law number 175, made in December, 1862, which prohibits these transactions taking place until after 11

The Mayor in stating his position to a Courier representative this morning, declared that he expected great opposition, especially from the merchants of the city, but that it was his duty to promote the general welfare of the public and that with the support and co-operation of the council and of the citizens in general. cil and of the citizens in general, that the law would be enforced to the consequent benefit of the people

It was first drawn up and passed in December, 1862, fixing the time at which merchants and farmers could transact business at eleven o'clock. On November 8th, 1886, bylaw Number 318 was introduced, changing the time to 10 o'clock. The merchants, however, exerted their influence again, and, as a result, on the 25th of March, 1895, the hour was reduced to 9 o'clock.

This situation was satisfactory to the merchants until 1907, when the whole system was abolished in bylaw number 916, which was passed in June of that year.

Following is the by-law which the Mayor proposes to re-enact, and thus to reduce, in this instance, the prevailing high prices for food stuffs, by removing one of the middlemen in the handling of goods between the producer and the consumer. The by-law reads:

No person or persons shall sell or offer for sale any vegetables, butchers meat, poultry, eggs, butter, cheese, fruit, fresh fish, hay, straw, oats or live animals, within the Town of Brantford, at any place but the public market, nor without having first paid the market fees threeon as hereinafter mentioned.

No person or persons shall buy,

### AND DESCRIPTION OF PRESENTATION OF PRESENTATIO Complaints Of Non-Delivery

Under ordinary circumstances the distribution of a Daily Newspaper is a big task, even with an organization trained for the purpose. When great numbers of new subscribers come all together, the difficulties become greater. The rush during the Great Prize Contest now on is an illustration.

At this time it will probably be impossible to avoid all mishaps and mistakes, will be taken by the publishers to ensure the delivery of each number of the paper.

The publishers are determined not only to remedy any such mishaps and mistakes, and to reduce them to the lowest degree, but to spare no trouble or expense to prevent them in future.

With this end in view the publishers request subscribers to communicate every complaint regarding late or non-deliveries by letter, card or Phone 139.

THE BRANTFORD COURIER. 

The Accumulated Experience of Over Forty Years' Active Brewing is Utilized in the Production of

(2 1-2 Per Cent. Alcholic Strength)

The result is a Canadian war-time beverage of superior excellence, a light ale which, while mildly stimulating, contains substantial food value.

Unsurpassed for its purity and flavor.

Obtainable everywhere from dealers. Sold in leading cafes and hotels.

Brooklyn Be 3rd Game d

Bill Carrigan Made a W Into the Box-Hitting -The Stor

By Frank G. Menke. Brooklyn, Oct. 11—Bill Car tried a dangerous experiment y day afternoon and it cost his Sox the third game of the series. He sent Mays to the in the hope that his subway d would baffle the Dodgers and Brooklynites promptly maced if four runs and seven hits, which them the battle by a count of 4

Living up to their "never-say reputation, the red-hosed war from Boston tried gamely and perately to overcome the hand but they fell one run short. a ball game featured by plenty clean hitting and devoid of any ing errors; a contest that was by the Dodgers because they of ted their rivals and outplayed and now the series count is Rec 2, Dodgers 1, with the Dodgers oughly recovered from their nervousness: with the clansm C. Hercules Ebbets back on again and playing the kind of ball that lifted them to the cres the National League.

It looked like the Red Sox to in four out of five at the most that first miserable exhibitio Boston with the qualification ' Dodgers don't get hold of thems immediately." But they have that clutch, those Dodgers; the playing now like world's series They have come to r that a titular combat is not one different than any other and are playing it that way. Best o from the Brooklyn viewpoint, is fact that Jacob Daubert, pre swatsmith of the outfit recovere batting vision yesterday, which gurs well for the Dodgers in f But the defeat must not r

upon the Sox. They have not their wallop, their fighting spir their superb ability. They went to defeat because their leader a pitcher who began to wobbl mediately and who for some st reason was permitted to r long after it was to be seen the Dodgers had him measure a severe walloping. Carrigan Blamed for Defea

If any one individual was at on the Sox squad it was Carr for allowing Mays to lingerstill linger.

Ivan Olson, shortstop party for home gang, was the real h-e-rthe fray from the Brooklyn point and all others. By his bri work on the defence he stopped eral assaults of the red-hosed g and with his war club he ham
