Among the many many person throughout Canada who owe good health-perhaps even life itself-to Dr. Williams' Pink Pills is Mrs. Alex. Fair, a well known and highly esteemed resident of West Williams township, Middlesex Co., Ont. For nearly two years Mrs. Fair was a great sufferer from troubles brought on by a severe attack of la grippe. A reporter who called was cordially received by both Mr. and Mrs. Fair and was given the following facts of the case: "In the spring of 1896 I was attacked by la grippe for which I was treated by our family doctor but instead of getting better I gradually grew worse, until my whole body became racked with pains. I consulted one of the best doctors in Ontario and for nearly eighteen months followed his treatment but without any material ben-efit. I had a terrible cough which ment but without any material ben-efit. I had a terrible cough which caused intense pains in my head and lungs; I became very weak; could not sleep, and for over a year I could only talk in a whisper and some-times my voice left me entirely.

times my voice left me entirely. I came to regard my condition as hopeless, but my husband urged further treatment and on his advice our family doctor, with two others, held a consultation the result of which was that they pronounced my case neurable. Neighbors advised me to try Dr. Williams' Pink Pills, but after having already spent over \$500 in doctor's bills. I did not have much faith left in any medicine but as a last resort I finally decided to give them a trial. I had not taken many boxes of the pills before I noticed an improvement in my condition and this encouraged me to continue their use. After taking the pills for several months I was completely re-stored to health. The cough disapstored to health. The cough disappeared. I no longer suffered from the terrible pains I once endured; my voice became strong again; my appetite improved, and I was able to obtain restful sleep once more. While taking the pills I gained 37 pounds in weight. All this I owe to Dr. Williams' Pink Pills and I feel that I cannot say enough in their favor for I know that they have certainly saved my life."

have certainly saved my life."
In cases of this kind Dr. Williams Pink Fills will give more certain and speedy results than any other medicine. They act directly on the blood thus reaching the root of the trouble and driving every vestige of disease from the system. Sold by all dealers in medicine or sent post paid at 50 cents a box, or six boxes for \$2.50, by addressing the Dr. Wil-liams' Medicine Co., Brockville, Ont.

### SOTHERN'S LITTLE JOKE.

How the Comedian Won a Name as Ventriloquist.

Ventriloquist.

One of the peculiarities of Sothern's elaborate Jokes was the way in which he worked up to them. He pretended to have accidentally discovered that he possessed the gift of the born ventriloquist, and arranged an experiment on the occasion of a supper party given in his honor at a pleasant house in a London suburb. There was a foolish kind of hanger-om of Sothern's, who loved to boast of his intimacy with the famous comedian. He had often said: "I wish youwould let me help you in one of your practical jokes, Mr. Sothern." Sothern humored his desire. Mr. Edgar Pemberton tells the story in his "Memoirs of Soththe story in his. "Memoirs of Soth-

The comedy must, for my purpose be reduced to a paragraph. You know how fond the professional ventrilo-quist is of talking up the chimney to an imaginary man on the roof. Soth ern had arranged for his slavish con ern had arranged for his stavish con-federate to mount the roof by a lad-der and play the part of the voice on the roof, which he did to perfec-tion, and Sothern's success as a ven-trilouist was voted nothing short of marvellous. Supper being over, the party adjourned to another room, at which point Sothern said "Goodnight" to his friend above, at which seance should be concluded. Sothern had, however, plotted against his man, who, when he wished to descend, found that the ladder was gone.

By hook or by crook the deceived confederate found his way to the chimney of the smeking room, where the supper party were setting down for a long evening. Presently a voice was heard calling down the chimney: "Sothern, Sothern! For heaven's sake come ap and help me! I can't get down and it's raining like mad!" Sothern was taken aback for a mo-ment, but only to be in ecstasies the next at the exclamations of his friends, who considered the voice only another example of Sothern's skill. "You said you could do no more, your voice was tired, and here it is stronger than ever!"

Sothern, accepting the compliments of his friends, managed in a short conversation with the voice on the roof, to let his unhappy confederate understand that as soon as possible he would go out and help him down. After a time, just when Sothern was about to slip out and release his friend, the host went to the chimney, and, all the more to emphasize Sothern's success, as he thought, called out: "Are you still there?" This was the last straw upon the rain-drenched back of the sufferer. understand that as soon as possible rain-drenhed back of the sufferer.
"Oh, go to blazes!" came the angry reply, and with it a piece of mortar that rattled in the grate; "you're a beast!"—The People.

Writing for Money.

It is said that a young officer at he front recently wrote to his ather: "Dear Father,—Kindly send me \$100 at once; lost another leg in

a stiff engagement, and am in hos-pital without means."

The answer was: "My Dear Son,— As this is the fourth leg you have lost according to your letters, you ought to be accustomed to it by this time.

Try and hobble along on any others Try and hobble along on any others

IN MODERN DAIRYING It is Necessary to Use Scientific

When we contemplate the low average that falls to the lot of the majority of those engaged in the dairy work in the production of butter, is it any wonder that there is discour-agement in the ranks of the owners of dairy cows?

agement in the ranks of the owners of dairy cows?
Statistics put the annual output of all the cows, good, bad and indifferent, close to 130 pounds of butter each. At an average of 16 cents a pound, that income for butter alone would be a little short of \$21 per cow. This is far below the low average of \$25 a cow for her keeping. This means that here is a wide range of values, comparing the best with the poorest dairies in the same locality.

with the poorest dairies in the same locality.

One man has lifted himself out of financial distress, and placed his herd far beyond the danger line, and makes money out of dairy work.

Another with the same opportunity stays on the other side of the danger line by against a appropriate. ger line by neglecting to appropriate the means for the betterment of his herd and finances. One produces 350 lbs. of butter for each cow with an average price of 25 cents a pound for the year, which means a gross receipt of nearly \$90 for butter receipt of nearly \$90 for butter alone, without a reckoning for the value on the skim milk, buttermilk and the calf. I know where he lives, and have reason to know that he does it, and will doubtless do better in the future. I know the other man, who makes less than one thundred pounds of butter a year per cow and sells his butter to a grocery in trade that averages him 15 cents a pound for the year. The figures in the first case may seem large to the average dairyman, and those of the latter exceedingly low, yet they are to be found almost everywhere in

these ratios.

What can be done to induce those who have persistently failed to make a success of dairy work upon their farms? It is not out of place to say that brain power counts far more than any other single element in than any other single clement, building up a profitable herd of cows. Without considerable thought cows. Without considerable thought and observation it is doubtful whether some of the obstacles that confront the thoughtless and carcless dairymen can be overcome.

There is an avenue of escape for all from the bondage that is yet holding so many. There are two ways of owning a herd of cows that may be made to pay. The quickest is by pur-chase outright; the shortest route to success will require excellent judg-ment in selection of dams and care n providing sires to mate with them. The ignorant man has no business with registered dairy animals. Unless he has judgment in the correct mating of those animals, his success is jeopardized and in the end the whole fabric will be over-

A man does not succeed sometimes simply because the combination fails to work right. He does not comprehend the principles that must come into play if a herd is to be made better each year. The dairyman who has not a boundless faith in himself and hope for the future cannot expect to himself the possessor of a grand herd of cows. That must come through his own resources and man-agement of breeding. The man who has a fairly good herd of cows—high grades of one of the popular dairy breeds—can rapidly improve their off-spring by the introduction of sires whose dams for several generations past have been producers. The bet-ter the record the better and swiftter the record the better and swifter will be the progress toward success in improvement for better dairy cows. The offspring from only high grade cattle, of course, will not bring the price that pure bred cows will sell for; but the advance in price for unregistered animals will always be commensurate with the producing value of such cows.

In making selections for improvement, the same requirements belong

ment, the same requirements belong to all dairy breeds, regardless of whether or not they belong to the registered class or high grades. It is a mistake to mix breeds even though they should take on the same lairy outline. If your good, reliable ow is high-grade Avrshire, do rot offspring by eopardize her future breeding her to the Holstein, but use a pure bred sire of the breed in which her best blood predominates. But make sure that the sire has dams to back him up with better record than the cow in question herself has shown. I have found that the great-est success is achieved by those who practice keeping within the bounds of a prescribed breet, and above all else, keeping in view the special purpose cow, and the presentation of her

pose cow, and the presentation of her best dairy qualities even at the expense of all others.

She must go one way or the other, either to beef or toward the production of butter. If the tendency is for more butter, then the beef characteristic must be neglected and every distinct principle of the dairy type cultivated in both breeding and in its feed.

Our cow is for the dairy; she is

Our cow is for the dairy; she is Our cow is for the dairy; she is angular; double wedged, not beefy, large of hip and deep in flank. She has a large udder and four well placed teats; large barrel, with plenty of food room, and great digsstive powers. With bright, sparkling eyes, well set apart, and a handsome, slightly dished face, she fills the bill for a desirable, profitable cow, upon which her owner can bank for years of desirable work.

The sire to mate with this cow

of desirable work.

The sire to mate with this cow should be handsome, with large heart girth, making room for lungs and heart action. It is from this source that progeny must get its constitutional vigor, unless these are dominant in a sire, a lack of stamina will show up in his off-spring.—George E. Scott, in New York Tribune.

Things That a Hen Should Have.

Things That a Hen Should Have. In order for a hen of a certain weight to produce an egg of a cer-tain size or weight she must have just enough wholesome food. Her sysmuch or starved by two little. In fact, everything must be conducive to the comfort of the hen if a continuous yield of eggs is expected. The quarters must be dry, warm and learn the hear wart to the conductive to the confort of the hear if a continuous yield of eggs is expected. clean; the hen must not be allowed to remain in idleness, for this will surely lead to bad habits. Besides, it is contrary to nature for a hen to have nothing to do, and nothing tem's to produce good health and to keep a hen in a laying condition like exercise. It brightens her up, makes her thrilty and vigorous, and in se-

vere cold weather lively exercise helps to keep her warm. The egg contains a variety of substance, and so the food of the hen must be varied accordingly—grain of different kinds, bone and meat, vegetables, lime, and one other article which should never be overlooked, and that is grit. If you wish hens to do their best in producing eggs all winter, see that the flocks are not too large or too many crowded in the house. Fifty good flocks are not too large or too many-crowded in the house. Fifty good hens well cared for will give better satisfaction and greater returns than 100 half kept. As a general thing, it is not the large flock that is making the clear profit for the poultry raiser, but the small lots that are well kept.—V. M. Crouch.

#### \*\*\*\*\* Jefferson

Out West. 

"One of the many laughable incldents of a more or less recent tour
in the west," said Joe Jefferson to
a writer in Sucress, "took place at
Grays End, Mo. You probably don't
know the place, and couldn't find
it on the map. All the same, the
people thereabout are very good
friends of mine, and, what is more,
invariably make an eminently respectable showing at the box office, which increases my regard for
them. Now, the opera house at the
End began life as a big barn. As is
the custom in that section of the
State, the building is raised on
pillars, some three and four feet.
This, in its barny days, was to
prevent its contents from being
harmed during the annual spring
overflow of the adjacent river. Well,
on the occasion of which I speak,
we reached the town early in the overflow of the adjacent river. Well, on the occasion of which I speak, we reached the town early in the day, filness had depleted the ranks of my supers, and I found that I needed at least a dozen more men in the Catskill scene of 'Rip Van Winkle.' But I couldn't get any of the local talent to help me. 'They either wanted to see the show from the front or were shy of making a professional debut. Finally, I appealed to the sheriff of the coutny, a very excellent person who, I vera very excellent person who, I ver-ibly believe, slept with a small ar-seual buckled around him. "You shall have all the boys you

want, said he, 'or'—
"I don't know what the 'or' implied, but I do know that an hour plied, but I do know that an hour or so later, he appeared with several strapping young fellows, on whom he kept a strenuous eye. He also offered to himself become one of Hendrick Hudson's ghostly crew, which suggestion I gladly accepted. "The curtain finally rose, and my volunteer aids acquitted themselves nobly. It had been with some difficulty that I had persuaded the Sheriff to doff his guns, but he finally nony. It had been with some difficulty that I had persuaded the Sheriff to doff his guns, but he finally
consented to do so, with the proviso
that they were to be kept handy at
the wings. All went swimmingly until Rip's return home after his long
sleep. In the midst of one of the
most puthetic situations in this scene
there came from beneath the theatre the strident squals of razorback hogs, fighting for a choice morsel. The audience tittered. I continued, but then was heard a volleying
chorus of grunts, squeals and screams
that told of a general engagement
in the space beneath the floor. The
Sheriff who was standing at the
wings, hissed in a stage whisper:
'All right, Mr. Jefferson, I'll make
the pesky critters quit.'

"He grabbed his pistols and disappeared. A few seconds later there
came a muffield hang! hang!

"He grabbed his pistols and disappeared. A few seconds later there came a muffled bang! bang! bang! bang! followed by the agonized howls of the wounded pigs. I stopped. I just had to. Fortunately, the spectators did not laugh, It was a familiar sound to them, and they remained impassive. The Sherlif re-appeared, and then the play ran its course without further interruption. We had fresh pork chops for breakfast next day, but I'll never forget that night."

Still an Unknown Land.

Large areas of the South American continent have never yet been trodden by the foot of civilized man. It will surprise many to learn that there are larger tracts unexplored in that region than in darkest Africa,

A large majority of the cities along the coasts of South America, known to every pupil in the Public school, were settled in the Columbian era. Civilization is in fact much older there than in North America. Yet for nearly 300 years there has been not nearly 300 years there has been not much organized attempt to explore the interior. The first expedition sent out by a South American Government was in 1875. Many of these countries are without exact maps of their own territory. Most of the maps in use have been made by explorers from Europe or the United plorers from Europe or the United

plorers from Europe or the United States.

The greater part of the immense tract of land in the middle of the continent from Venezuela to Chill has not yet reached the roughest pioneer not yet reached the roughest pioneer state of settlement. A considerable part of Colombia is still wholly unknown. The several Atlantic states, even as far north as Uruguay, have many blank sections on their maps. The Guian's except for a strip along the coast, are practically unknown. The condition of affairs in Brazilias scarcely better. The Brazilian Government has no department corresponding to our geographical or coast and geodetic surveys. The only ex-

an I geodetic surveys. The only ex-ploring done has been carried on by the States. There are large tracts in the northern part of Brazil which have never been crossed, as far as is known, by any white man.

Crazy People's Cutlery. Cutlery for lunatics was recently advertised for by the British Admiralty Office, and it brought to light some unusual cuttery that, while made regularly in Sheffield for the past twenty years or more, is but little known. The knives have perfectly dull, round blades, with a small cutting area about an inch long situated in such a way that it can be the pred except for the purpose not be used except for the purpose intended. The fork terminates in a small round ball, on which there are three prongs about half an inch long. The idea in the manufacture of this unique cutlery, of course, was to devise knives and forks that could not be used as instruments of attacks. upon attendants nor for self-mutila-

## PITIFUL CASE OF A LITTLE GIBL.

Child at the Age of Two a Crippled Victim of Disease.

Edna Rathbun of Hampstead, N.B., Fell and Broke Two Ribs—lajur-ed the Kidneys and Diabetes Developed—Dodd's Kidney Pilis in Curing Kidneys Straightened injured Spine. Hampstead, N. B., June 22.—(Jal)—Little Edna Rathburn, of

place, has had a sad experience for a child so young. She is now nearly eleven years old. Eight of her few short years have been passed under the saddest cloud possible in life. At the age of two the child met with an accident which left her with two ribs broken, split off at the backbone. Though they were set and healed her little body did not straighten. For eight years she could hardly walk, being almost doubled up. The accident affected her Kidneys and Diabetes set in. Diabetes is a particularly dangerous form of place, has had a sad experience for

is a particularly dangerous form of Kidney trouble, in this case particularly severe by nature of the injuries to the spine.

The family dootor was, of course, consulted. He diagnosed her case correctly, but couldn't cure it. She was sent to the Public Heartfal at. St sent to the Public Hospital at St.
John in the hopes that the greater
skill and facilities there would avail.
They could do nothing for her. The
authorities advised the mother to take the child home to nurse her and

take the child home to nurse her and give her good care while she lived, which would not be very long.

The suffering of the little one was heart-rending to the. mother and friends. She cried with pain night and day. The mother grew desperate and determined she would find a cure for her child if it took every cent she possessed.

She saw Dodd's Kidney Pills adver-

She saw Dodd's Kidney Pills advertised and immediately purchased some. From the first they were beneficial. The little girl commenced get better. Every day saw an improvement. Dodd's Kidney Pills were doing the work. Six boxes in all were used, and come more Diabetes was conquered. Not only that, but with the return

Not only that, but with the return of health the spine commenced to straighten. The little girl is now almost physically perfect. Says the grateful mother in her own words: "There is nothing to be compared to Dodd's Kidney Pills. We thank God we ever heard of them. Edna is now full of color time, and plays now full of color, runs and plays about as smart as a whip, where once she was a puny little thing as pale as a ghost."

The Longest Line.

He was a jolly sailor lad and had come to spend a few days in his native city of York.
"Yes," he remarked proudly, as his steamship company was being referred to in complimentary terms, "ours is the longest line in the world, stretching as it does from America to China." There was a moment's silence, and

then the hostess-a hard working Scot—chimed in:
"Weel, I dinna ken if ye've cause
the bounce sae much, for does not
my claes (clothes) line no' stretch frae

pole tae pole?"
And Jack good humoredly took a
back seat.—London Auswers.

NIAGARA TO THE SEA.

No finer trip can be taken than the water route down the St. Lawrence, passing through the Bay of Quinte, Thousand Islands, and running the rapids of the St. Lawrence River to Montreal. The Hamilton Montreal Line steamers leave Hamilton at 1 p. m. and Toronto at 7 p. m. Tuesdays and Thursdays. After June 5th, the boats will make three trips per week, the additional boat on Saturder Worldows when the for both single and return tick

ets.
The Toronto Montreal Line steamers leave Toronto at 3.30 p. m. Tues days. Thursdays and Saturdays from 1st to June 15th, inclusive. June 1st to June 15th, inclusive, and from June 17th daily, except Sunday. Steamer Toronto and the new steamer Kingston will make the service on this line. They are the finest boats in fresh water. After leaving Toronto the first port is Rochester, Kingston, Thousand Islands, and the ra-pids of the St. Lawrence to Mont-real. Between Montreal, Quebec, Mur-ray Bay, Tadousac, and the Sague-nay River, and it is the finest trip on the continent. The boats on this ine cannot be surpassed. The Manor line cannot be surpassed. The Manor Richelieu Hotel at Murray Bay and the Tadousac Hotel at Tadousac are the flaest summer resorts in Canada. Both of these hotels are owned and operated by this company. For further information as to tickets, folders, etc., apply to H. Foster, Chaffee, Western Passenger Agent. Richelieu & Ontario Navigation Company.

HOW TO BECOME WEALTHY.

Advice a Young Man Received From

an Elderly Physician. In a New Hampshire city there

In a New Hampshire city there dwells an octogenarian physician who, in addition to his wide medical skill, is known far and wide as a dispenser of blunt philosophy. The other day a young man of his acquaintance called at his office.

"I have not come for pills this time, doctor," said the visitor, "but for advice. You have lived many years in this world of toil and trouble, and have had much experience. I am young, and want you to tell me how to get rich."

young, and want you to tell me how to get rich."

The aged practitioner gazed through his glasses at the young man and in a deliberate tone said:

"Yes, I can'tell you. You are young and can accomplish your object if you will. Your plan is this: First, be industrious and economical. Save as much as possible and spend as little. Pile up the dollars and put them at interest. If you follow out these instructions, by the time you reach my age you'll be as rich as Croesus and as mean as h-l."—Buffalo Commercial.
