The Fire Patrol.

"The Fire Patrol," a new melodrama with sensational stage effects, will be presented at the Grand to-morrow night. It was written by the author of "The Midnight Alarm." It is claimed for "The Fire Patrol" that it introduces a seene that is entirely new and novel, viz, the interior of a gold stamp mill in Deadwood, South Dakota, where the ore is brought from the mines, previous to being smelted, with the big ore crushers in actual operation. Incident to the play there is also a gennine fire patrol wagon and a scene representing Union Square, New York city, in a snow storm. What more can be asked for in the way of realism? storm. What m

On the Ground Floor.

What this town seems specially to need is a better supply of societies, benefit and otherwise. This long felt want is now—in a measure at least—to be filled by the establishment of a local branch or lodge of the Ohio Benefical Society, in the interest of which Alexander Gardner, district deputy for Ontario, London, is now visiting Berlin. His society is something like that of Tonti, only where the latter keeps you waiting seven years for the return, with interest of your money, the former gives it back in one year. Anyone wishing to ginto this new association should come in on the ground floor.—[Berlin News.

A Discouraging Report as to the Condition of the Nicaragua Canal Enterprise.

Enterprise.

San Francisco, Feb. S.—R. T. Sharks, a
reputable business man of San Francisco, T
who has recently returned to this city after
six months' residence in Managua, says of
the Nicaragua Canal:
"It is all nonsense to say the canal has
progressed very fair, or is being carried,
forward at all. All that has been done is a
few miles of clearing and a little work on
the harbor at Greytown. C. A. Davis,
chief engineer under Menocal, accompanied me part of the way on
my return journey, and teld me he
had received orders to discharge all of the
men employed except two or three. This, had received orders to discharge all of the men employed except two or three. This, I understand, is owing to lack of funds. The people in the country have no faith in canal schemes. Several million feet of lumber is rotting and useless at Greytown. It was supplied by Warner Miller, as were four dredges. The dredges are also rotting and rusting away, only one having done any work, dredging itself a little way up the river. Many people were ruined by buying large tracts of land along the proposed line of the canal. One prominent was also that if they got a railroad there would be an end to the canal scheme, and his remark met with the retort that if this was so the canal scheme was ended now, as it was a doad sure thing they was ended now, as it was a doad sure thing they have now the canal scheme was ended now, as it was a doad sure thing they have now the canal scheme was ended now, as it was a doad sure thing they have now the canal scheme was ended now, as
