It's Worth Something to You to Know Where to Buy These Goods at These Prices.

STUDY OF GROWING BABIES

Restless Children Become Men of Action.

U. S. Commissioner of Education Makes Interesting Report.

Washington, Sept. 4.—The commissioner of education has been collecting data on the development of the child mind, which, with some remarkably interesting deductions therefrom, will be published in his forthcoming annual report.

The article is entitled, "Inhibition: A Study of Child Character." It deals with the idea that in the brain of the infant, their development into thought and the means of guiding this development. For the purpose of hundreds of children at play and at work have been observed.

The result of these observations is summed up in the statement that over-exertion, particularly of a mental nature, is injurious to the child; that the young mind may be permanently injured by over-study; that a rapidly-growing child is disinclined to exercise and that too much exercise will check growth.

Restlessness, it says, in children up to 6 or 7 years of age, is a good sign, but after that age a bad one.

"The restless child," says the report, "should naturally develop into a man of action. Mothers who have restless children can get comfort out of the fact that this condition shows a normal and desirable development. The boldest child is, as a rule, a peculiarly good child."

"A quiet child is not necessarily one that will develop into a bright man or woman. Such a condition in a child is the result of rapid growth or of sickness."

"We are suffering from a false idea of education, which has been handed down to us from the Renaissance," is the closing observation of the report. "We seem to think that to master books is the only way to become learned, and that to become learned is the object of education. One can gain nothing by second-hand observation from books, and the object of education is not to make men scholars."

"The time when a man can become learned from books alone is already passed. We live in an age of science, and observation and experiment are fundamental methods. Our ideal student is no longer an emaciated consumptive, with a wet towel about his brow, bending over his books in the small hours of the morning, but rather a well-rounded man of the world, one who knows books, but who knows men and affairs as well; one who has drunk deeply from every experience honorable life can offer him; one who has ideals of action as well as of thought."

CHOLERA MORBUS, cramps and kindred complaints annually make their appearance at the same time as the hot weather, green fruit, cucumbers, melons, etc., and many persons are debilitated from these summer fruits, by eating them without moderation. One need not abstain if they have Dr. J. D. Kelley's Dysentery Cordial, and take a few drops in water. It cures the cramps and cholera in a remarkable manner, and is sure to check every disturbance of the bowels.

ONLY THOSE who have had experience can tell the torturing pains with your boots on, pains with them off—pain night and day; but relief is sure to those who use Holloway's Corn Cure.

DOUKHOBORS IN BAD WAY

Peculiar Religious Mania in Yorkton Settlement.

No Preparations Made for the Coming Winter.

Montreal, Sept. 4.—According to a dispatch from the Star, speaking of a dispendous 4,000 Doukhobors who settled in the Yorkton district, N. W. T., will starve or freeze to death, or be on the verge of starvation this year. If the government does not take active steps to prevent their present religious mania from going further. The dispatch says: "The Star correspondents traveled through a wide area, settled by the Doukhobors. He found that a religious mania, the like of which has perhaps never been seen in this country, had possessed the people and made them completely oblivious to the severe winter ahead of them."

"Their fields were lying idle, although a rule was laid down that harvests, and their horses and cattle were running at large through them, sleek and fat. Nearly every one of the Doukhobors seen was clad in the lightest of cotton garments. They would afford no protection from an October breeze, to say nothing of a severe winter blast, and they say they will wear no other. In many of the houses visited a bag of flour was the only food visible."

"The Doukhobors will eat a few vegetables, but in a few instances had they even brought them into their homes. Men originally strong were now, hungry, weak, and physical exhaustion and starvation. The women so far have escaped any of the work that must fall on the men since they have discarded the use of animals, but if this year's crops is to be harvested they will soon have to harness themselves up to the heavy wagons as the men do. I found that they have made absolutely no provision for the future, and what is perhaps worse, the religious mania that possesses them is becoming more intense, and is spreading."

"The attempt by the Dominion government to help these people has apparently had no effect. How it will end will probably be determined by the cold of that district set in. Responsible men in the district say that if the mania does not abate before October hundreds will starve, and the wrecks before January, on account of lack of clothing and little food."

Climbed Pole to See Dead Wife Arise.

Louisville, Sept. 5.—Possessed of an hallucination that his dead wife would arise from the dead, William Vogdes, aged 50 years and infirm, climbed a high telephone pole, from which he could command a view of St. Louis Cemetery, where she had been buried for many years. How so feeble a man could climb the pole is a mystery, yet the old man did so. He had been on the crossarm some time, when he was noticed to be in danger of falling to his death, as he was well high exhausted. Harvey Huey, an employee of the telephone company, was called to the scene. He had just about given up in despair when he secured a clew that led to success.

BLACK DEATH IN ALASKA

Plague Epidemic Raging Among the Eskimos.

Natives Abandon Everything—Half the Population Carried Off.

Windsor, Ont., Sept. 4.—A terrible condition of affairs among the Eskimos of Alaska is revealed in a letter received by J. D. Grace, editor of United Canada, from the Rev. Father Lucchesi, who is in charge of the Jesuit mission of the Holy Cross in that country. Sixteen priests are acting as missionaries within the Arctic Circle, and they have had a most trying time. A devastating plague has raged among the Eskimos, and in a few months has carried off one-half of the native population.

Father Lucchesi says: "It would take too long to describe the scenes of horror witnessed by many of our brave missionaries since the outbreak of the plague, six or seven months ago."

"Suffice it to say that those who were not attacked by the plague fled from shelter, from food and from home, abandoning the sick to their fate and the unburied remains of the dead."

"The missionaries exerted themselves to their utmost nursing the sick, assisting the dying, burying the dead and distributing with an unflinching hand every means at their command, leaving the mission to the mercy of fate and in a very cruel and struggling to keep on with its schools and its work."

Father Lucchesi says the disease is something like the black death which ravaged all Europe a quarter of a century ago. The victim is stricken down without warning, but does not die for several days. Recoveries are few, about 20 per cent, and the disease is highly contagious. This frightens a family is attacked the others immediately decamp, leaving the patient to his fate, without food or attention of any kind.

A SENSATION IN 'FRISCO

Prominent Sporting Men Avenue Alleged Libel.

Bullets Instead of a Suit for Damages—Lady in the Case.

San Francisco, Sept. 4.—Fred Marriott, the publisher of the San Francisco News Letter, was shot three times and seriously wounded at his home last night. His assailants were Thos. H. Williams, jun., president of the California Jockey Club, and Truxton Beale, a former United States minister to Persia and Greece, and a well known clubman of this city. Neither man knew who did the shooting, but Marriott says it was Williams.

The following account of the shooting was given by Marriott: "An appointment was made by telephone for a meeting by Truxton Beale. About 9 o'clock Beale and Williams came to the house and I answered the door myself. When reaching to take their hats, Beale struck me a heavy blow in the face, and made another slash at me with his fist. 'Smash him, the—' cried Williams. I retreated, as the blow on the forehead almost blinded me. I then started up stairs and Williams began shooting."

The first shot fired shattered Marriott's left leg below the knee, and he fell to the steps. As he rolled to the bottom of the stairs two more bullets struck him, one in the chest, and the thigh a few inches below the hip, passing clear through the leg. The other struck him in the right hand. Mrs. Marriott, hearing the first shot, came to the head of the stairs in time to see her husband fall. She started down to him. Then, it is claimed, the revolver was turned in her direction, and two more shots were fired. Williams said: 'We considered it our duty to punish Marriott for publishing an article last week reflecting on the reputation of a young lady. Beale said that although the lady's name was not mentioned that they felt bound to resent the publication. After the shooting Williams and Beale went to the Pacific Union Club, where they were placed under arrest. Marriott's wounds, it is thought, will not result fatally.

Beale said that although the lady's name was not mentioned that they felt bound to resent the publication. After the shooting Williams and Beale went to the Pacific Union Club, where they were placed under arrest. Marriott's wounds, it is thought, will not result fatally.

The first shot fired shattered Marriott's left leg below the knee, and he fell to the steps. As he rolled to the bottom of the stairs two more bullets struck him, one in the chest, and the thigh a few inches below the hip, passing clear through the leg. The other struck him in the right hand. Mrs. Marriott, hearing the first shot, came to the head of the stairs in time to see her husband fall. She started down to him. Then, it is claimed, the revolver was turned in her direction, and two more shots were fired. Williams said: 'We considered it our duty to punish Marriott for publishing an article last week reflecting on the reputation of a young lady. Beale said that although the lady's name was not mentioned that they felt bound to resent the publication.
