NEW YORK, Feb. 4.—Movements of

NEW YORK STOCK EXCHANGE.

[Special to H. C. Becher.] NEW YORK, Feb. 4.

NEW YORK, Feb. 4.-Movements of stock were uncertain during the forepart of the day, with some fluctuation. News of the resumption of activities in Address by Dr. Troy. the Balkans was a depressing influence and London sent over a number of inquiries which showed numerous losses. Uncertainty as to the action to bu taken by the American Canning directors later in the day was reflected in the erratic fluctuations of the stock. The chief losses were confined to the specialties, and standard issues showed some independence of the movestrength. Bonds were irregular.

[Canadian Press.]
New York. Feb. 4.—A decline of more than \$50,000,000 in the aggregate marketable value of the seats on the New York is precisely one-half of the high record, reached in 1909. It was learned today that one or more seats are now being offered for sale at \$50,000, with no takers offered for sale at \$50,000, with no takers at that figure. On the assumption that \$8,000 represents the present marketable value of a seat, the total shrinkage, on paper at least, of the 1,100 seats on the stock exchange is \$52,800,000.

Last November a seat was sold for \$69,000. On the same basis, the deeline in about three months is \$23,100,000. Neither during the year of 1907, nor during the "rich man's panic" of 1903, did the price fall so low \$51,000 being the low level at the same of the low level at the same of the professor of medicine at Tours, will have a larger head, fewer teeth, and results at the same of the low level at the same of the low level at the same of the sa

Dwindling business is the explanation of the dead-line in seat prices. The intrinsic value of a seat represents but a small portion of its price. The huge gray stone palace which is the home of the stock exchange, and the land on which it stands, are assessed at \$5,300,000, which represents ar equity for each member of ess than \$5,000. There is also a gratuity of \$10,000 which is paid to the family of a member who dies. More than this, the value of a seat consists merely on the "good-will" or the privilege of trading on the exchange, and the facilities of "forced to traders." Wall street has had three lean years in the business of buying and selling stocks and bonds. Business last year averaged less than 450,000 shares of stock a day, whereas in 1905 the average was 900,000. With the amount of tradwas 900,000. With the amount of trad-ing falling off, and the total of commis-

sions shrinking proportionately, the slump in the price of seats has been a natural London Stock Exchange.
