Commencement was made today on memoration of the supreme sacrific the biggest section of underground cable work in the city, when the pubcable work in the city, when the public utilities started their two-mile high-tension wire cable from substation two. The work is estimated to cost \$40,000.

The cable will be started at the substation at the corner of Ridout and Horton streets to the substation at Cabell and Kitchener streets. It is expected the cable will be in working order by fall and may be added to from time to time.

Few other cities in Canada have

have put such systems into operations in congested districts.

Peles, now in use for the transmission of power, will be left in place, as they also carry wires for local lines. The high-tension cables now in use will be left on the poles in case of emergency.

"Underground cables_will eliminate stoppages in current caused by lighting running along the wires," the general manager of the public utilities commission stated today.

In the electrical storm of last Friday several short stoppages were
