300,000 BUSHELS ADDITION MAKES LARGEST TOTAL ST. ALBAN'S TO BE RAISED

Canadian Press Despatch.
Fort William, April 20.—An addition of 300,000 bushels to the stock of store at the head of the lakes during the past week has brought them up to the largest grand total of the season, which will probably be considerably reduced a week hence, as it is expected that havigation will have opened and permitted the shipping out of sufficient grain to reduce the stock materially. The total now on hand is 64,348,891 bushels of all grains. Receipts and shipments were all light, only half a million bushels being taken in and a quarter of a million sent out. There were no shipments of either flax or rye.

INDIA'S WHEAT OUTPUT IS GREATLY INCREASED

Ottawa, April 19.—According to a pablegram received today at the department of agriculture from the international Institute of Agriculture in Rome, an official report, referring to 85 per cent of the wheat territory of India, states that the production of wheat in that territory is 321,400,000 bushels against 313,000,000 for the same territory last year. This would indicate a crop of 378,000,000 bushels for all India, against 369,000,000 last year. The first report for India last year was 425,000,000 bushels.

Then there is the tired businessman. With electrical discharges playing over him he can be as lively as a cricket for months and months. Here again a rather unfortunate feature presents itself. The business-man, never having a chance to be-come tired, will not be able to seek solace for his nerves in the bald-

headed row. For the reporter, however, the new invention promises to be disastrous. The only reason he is not kept working for forty-eight hours at a stretch is that, occasionally, he requires a nap. With the city editor directing electrical currents at him every time he comes in the office, his lot will

"Nothing doing," bawls the fero-cious editor, as he shoots a few electrical discharges into the reporter. "You're not tired now. Go out an get an interview with Madame Polinski. She's just come into town of her private train."

A local physician seriously be-lieves that the anti-sleep idea will amount to something, however.

"Fatigue is just a condition of tiredness in the brain and nerve ells," he explained. "When the body becomes tired, the cells are a dark sluggish color. When the body is refreshed with sleep they become white. There is no doubt but that electrical currents can rid the blood stream of fatigue poisons and so keep the nerves in a perpetual state of
