The handsome cathedral at Nicolet, Que., the covent and the Bishop's palace were burned Thursday. The loss is about \$400,000.

BY-LAW NO. 2, 1906.

A By-law to repair the drain from lot 12, in Township of Warwick, westward to outlet, along the Boundary line between the Township of Brooke and Warwick, in the County of Lambton.

Whereas complaint has been made to the Municipal Council of the Township of Warwick by residents of saud Township that the ditch or drain along the Beundary line between said Township and the Township of Brooke is out of repair.

And whereas said ditch or drain was originally constructed and improved partly by funds of both Townships interested, and partly by statute labor and subscriptions from parties benefitted.

And whereas the said Council of the Township of Warwick acting under Section 76 of the Municipal Drainage Act, has procured an examination to be made by C. A. Jones, Eq., D. L. S., being a person competent for such purpose of the ditch or drain proposed to be repaired and of the lands and roads liable to assessment under the "Municipal Drainage Act" and has also procured plans, specifications and estimates of the drainage work to be made by the procured plans, specifications and estimates of the drainage work to be made by the said C. A. Jones, Esq., and an assessment to be made by him of the lands and roads to be benefitted by such drainage work and of other lands and roads liable for contribution other lands and roads liable for contribution thereto, stating as nearly as he can the proportion of benefit, outlet liability and injuring liability, which in his opinion will be derived or incurred in consequence of such drainage work by every road and lot or portion of lot the said assessment so made being the fassessment hereinafter by this By law enacted to be assessed and levied upon the roads and lots or parts of lots hereinafter in that behalf specially set forth hereinafter in that behalf specially set forth and described and the report of the said C. A. Jones, E-q., in respect thereof and of the said drainage work being as follows:

To the Municipal Council, Township of War-

wick.
GENTLEMEN:—In compliance with instructions received from your Honorable Body I have made an examination of the drain on the Township of Warwick and Brooke in front of Lots 3 to 11 inclusive of Warwick and extending a short distance in on to Lot No. 2 of the same township, with a view to repairing and improving the said drain to be known hereafter as the "McGill Drain."

known hereafter as the "McGill Drain."

I learned that this drain has been constructed and repaired by various means such as statute labor, private contributions, grants ont of general funds &c., but I believe without any definite system of levels so that in some places it is quite a large drain and in others quite small and insufficient to prevent it overflowing and flooding in times of freshet.

I consider it would have been better, had the upper portion of this drain not been carried so far west along the highway without allowing it to follow more closely the natural trend of the water as it has necessitated cutting through a couple of pronounced ridges, one near the 9-10 side road of Warwick and the other near the 6-7 side road of Brooke, whereas had the drain at some point a little east of each of these ridges been carried southerly or south-westerly, these deep cuts which are objectionable, particularly on the highway, would have been avoided, and this drain from a point near the 6-7 side road of Brooke could have continued westerly along the highway to its present outlet without any serious objection. However as these cuts are already made and only require a little deepening for the efficient working of the drain I have made no change of outlet or location for the present proposed repair and improvement.

I also find that the Branch Drain on the northerly side of the townline opposite the easterly part of lot no. 8 and the westerly part of lot no. 9 requires repairing and improving as in its present coudition it is not capable of carrying the waters brought to it by the Leach award drain and other private drains and I have included this in my scheme for the proposed work and have designated the drains as "Main Drain" and "Branch Drain."

I have staked out and levelled the Main Drain in stations of 2 chains or 8 rods each for the most part, commencing with stake "0" at the head of the proposed work which is opposite the line between lots 11 and 12 of Warwick, where the drain enters upon the highway from s

on same where, as above mentioned, it crosses from the south to the north side of the highway. This makes a total of 1292 rods in both. The culverts across the townline at stations 53½ and 13¾ are both in good condition and being comparatively new ones and of sufficient size will not require any work done on them, the one opposite the 6-7 side road of Warwick is in very fair condition and wide enough, but the covering is about a foot too low and will require to be raised.

covering is about a foot too low and will require to be raised.

In my estimate of the cost of the proposed work, I have net included the construction or repair of any of the culverts or bridges over the drain leading from the private land to the highway as all the parties, either prefer or are agreeable to build or repair their own bridge or culvert and I have kept this fact in view in making my assessment on the lands affected for the cost of the work. There should, however, be a certain uniformity in these bridges or culverts and I would recommend that where they are built with posts and stringers they conform to the following regulations, viz:—

St. 0 to 52 they be at least 5 ft. wide and 3½ ft high in clear.

St 114 to 154 they be at least 7 ft wide and 3½ ft high in clear.

St 154 to 276 they be at least 8 ft wide and 3½ ft high in clear.

St 154 to 276 they be at least 8 ft wide and 3½ ft high in clear.

St 154 to 276 they be at least 8 ft wide and 3½ ft high in clear.

Should they be built with long stringers resting on the ground at the edge of the drain, the ends of the stringers should project at least 2 ft beyond the edge of the drain and the underside of the stringers be at least 3f 9 in above the bottom of the drain.

Many of the present bridges I find are even larger than the minimum I have specified particularly in the lower portion while some of them at the upper end are smaller, but where they are new they might be left for a time to test whether or not they are capable of carrying the water. The one at st. 179 opposite the west ½ lot 6 is a comparatively new one but is about a fost too low and should be raised and the one at st. 1794 opposite the east ½ lot 5 is also too low and if not replaced with a new one should at least be raised to the required height.

I have prepared plans, profiles and specifications of the proposed work and schedule of assessment on the lands affected all in duplicate, one copy being for service on the Township of Brooke and all of which I herewith submit.

ESTIMATE OF COST.

Total Assessment, Brooke and Warwick \$1018.00 SPECIFICATIONS.

The drain is to be dug to the depths and dimensions shown and figured on the accompanying profile with sides sloped 1 horizontal to vertical and the bottom an even grade between ESTIMATE OF COST.

ing profile with sides sloped 1 horizontal to retrical and the bottom an even grade between stations. The finished depth of the ditch is to be measured from the ground beside the stake on the side next the drain.

Should any error appear in the figured depth at any stake the grade of the bottom is to be made to conform with that shown on the profile. From st to 276 on the Main Drain and q to 31 on the Branch, all the earth is to be cast between the drain and the fence and evenly spread, at least 3 ft clear of the edge of the drain when practicable. From st 276 to 282 on the Main Drain the earth is to be cast about equally on each side of the drain and from 282 to 292 it is to be placed in the lowest ground, filing the old channel where it is shandoned by the new course of the drain.

The covering of the bridge or culvert opposite the 6-7 sideroad of Warwick is to be raised 1 foot and made prefetly solid again.

All the work to be done to the entire satisfaction of the Commissioner in charge of the work. I have the honor to remain, Your obedient servant, C. A. Jones, O. L. S. & C. E. And whereas the said Council are of opinion that ESTIMATE OF COST.

East Lambton Farmers' Institute-

SCHEDULE OF ASSESSMENT!

The annual meeting of the East Lymbton Farmers' Institute was held in Wyoming, Friday 15th inst., with a very large attendance in the afternoon. A stock judging class was held in Witty's yards. T. McMillan, Huron, was the attraction in judging points of the different breeds of horses and cattle. In cuttle G. G. Hartley put on triel a thoroughbred Jersey cow, and John Robertson a couple of Shorthorns. Mr. McMillan showed accurate knowledge both in cattle and horses. Peter McEwen put on hard a span of horses and at the close all present seemed to be very well satisfied with the expert's decision—

In the election of officers John Hunter, off Wygang, was elected president; Mitom Moorehouse, Shetland, vice president; W. J. MacAlpine, Warwick, reelected sectreas; the directors the same as before with tits seddition of P. McEwen and Robt McGregor, of Plympton.

The President E. J. McCormick, president The annual meeting of the East Lambton

McGregor, of Plympton.

The President, R. J. McCormick, presid-McGreyor, of Plympton.

The President, R. J. McCormick, presided and with a few introductory remarks, and after the minutes of the last annoal meeting was read and adopted, called for the report of the auditors, which was read by the secretary, W. J. MacAlpine. This showed the Institute to be in good condition financially, with a balance on hand of \$224.34, with an assessment for general expenses by the department yet to be paid. The Directors' report showed that a greater number of meetings were held during the past year, thereby incurring additional expense; also expenses and a grant to the Women's Institute lately organized. The membership is somewhat in advance of former years being the second largest in the history of the Institute, still, it is not half what it ought to be, and farmers are standing in their own light in not becoming members for the small nominal figure of 250.

The places suggested for holding meetings

members for the small nominal figure of 25c.

The places suggested for holding meetings during the coming year are as follows:—
Regular meeting, Inwood, two day's meeting. Supplementary meetings,—Shetland, Alvinston, Warwick, Wyoming, Camlachie and Thedford.

The Women's Institute held at the same time was well attended by the ladies of the vicinity. An address was given and demonstrations in cooking by Miss Gray, of Toronto, which proved very interesting to all present, after which a very enjoyable lunch was served by the ladies to all who would come to the hall and partake. Mrs. John Hunter was elected president. While the attendance at the business meeting was small, this was certainly the best annual meeting ever held by the East Lambton Farmers' Institute since its organization 21 years ago.

years ago.

A vote of thanks was tendered to the retiring president, R. J. McCormick, who has occupied the position for the past five years and during that time attended nearly all the meetings held in his division.

Where can I get some of Holloway's Corn Cure? I was entirely cured of my corns by this remedy and I wish some more of it for my friends. So writes Mr. J. W. Brown, CHICAGO.
