### THE GUIDE-ADVOCATE, WATFORD

WANSTEAD The sleighing is wonderful around these parts, but it's dangerous for pedestrians on account of the ice. Mr. and Mrs. Jas. Capes, townline, were at Aberarder on Wednes-day visiting Mrs. Walter Jardine, Mrs. Capes' mother, who is very ill at the present time. Mr. Orville Ramsay gave a splen-did report of the U.F.O. convention

on Thursday evening; Mr. Ramsay being the delegate from the local club. Someone has said that if the Wanstead United Farmers with its three thriving branches had a com-munity hall. It would be doubtless in the best position to succeed and co-operate of any Club in the province. All there is to it, there needs some-body who will start the enterprise and ( as everybody knows around Wanstead) everything will go ahead until it is a completed undertaking. Now then, who will be the first to break the ice. The banquet given by the boys

Williamson, president and sec-retary respectively of the Farmers' Club, also by Mr. Macdonald, agricultural representative and Mr. Ross assistant. It was an evening pleas-antly spent and a fitting conclusion fortunate enough to take it.

The regular meeting of the Wan-stead Farmers' Club held Thursday evening, Feb. 1st with a good attendance. Mr. Ovrille Ramsay who was the club's delegate to the annual convention in Toronto gave a com-prehensive report of that gather-ing. A delegation from the local Orange Lodge also attended. The Wanstead Club since its inception and girls who have been taking the short courses in agriculture and in the Orange Hall, paying a yeardomestic science was held in the ly rental for the use thereof. What one Medical Doctor writes:

The practice of straight Chiropractic consists of the ad-justments with hands, of the movable segments of the spinal column to normal position for the purpose of releasing the impinged (pinched) impulses. Notice cut.

No He did not.

healing science in the world.

When we break a bone, nature is the only power under heaven that can make it knit together (ever stop to think of that.) The same is true when we are sick, nature does her best to bring us back to health, but we think we know best and keep adding more poison to our system (drugs).

Exactly what God's power is, no man can tell, any more than he can define electricity. At any rate we term this power within us nerve force, the centre of which is the brain. Every part of the body is controlled by this power (nerve force).

When you have a toothache what's the cause? The nerve. Remove the nerve and the tooth is dead, cut the nerves of the arm and the arm is paralyzed.

You must surely realize that the nerve force given us by our Creator absolutely controls the body.

You all know what happens when a man's limb becomes paralyzed. Then, you see very forcibly the result of lack of nerve force, but did it ever occur to you that when your lungs were weak, your kidneys bothered you, your eyes or hearing affected, your heart not working quite right, your appendix diseased or your tonsils affected, that it was lack of nerve force that was the real cause of your sickness. The second as a low fill the second sec

#### THAT IS THE CAUSE-Lack of Nerve Force.

Then you will ask how does this lack of nerve force come about to these organs. In this way-the spine (back bone) is made up of 24 movable vertebrae (bones) which are ring shaped and placed on top of each other, and held in place by the muscles of the back. These vertebrae with their many peculiar elevations and depressions form the wall or tube which encloses the passageway of the nerves. Taking them together, these nerves make up the spinal cord, which is a direct continuation of the brain. The individual nerve fibres emerge on either side of the various vertebrae of the entire spine, carrying their life-giving and health maintaining force to all the organs, muscles and bones.

The Chiropractic theory is based on the fact that a slippage (termed sublaxation) of the vertebrae of the spine impinges (pinches) the nerve at that point where they leave the spine, cutting off the nerve force to the various organs of the body, which results in disease. The Chiropractor does nothing but locate and adjust sublaxation, releasing the nerve force and permitting Nature to heal, cure and restore the diseased member.

The wonderful results of Chiropractic in all diseases has proven over and over again that with proper nerve control the body is better equipped to prepare its own medicines than any man living.

After reading this, you may say, that all sounds too good to be true. I admit that these statements may seem broad to you, but I make them because they are facts, and facts are hard to contradict, you do not have to take my word for this. Think it over. and if it seems practical to you, investigate. Chiropractic will stand investigation. Investigation always makes more friends.
