

Reapers, Mowers, Combined Machines, &c.

THE subscribers would respectfully call the attention of the farming community to their REAPING AND MOWING MACHINES, and other Agricultural Implements, which they are prepared to supply at the shortest notice, and with the fullest assurance of satisfaction.

THE CAYUGA CHIEF JUNIOR MOWER.

This Machine, for cheapness, lightness of draught, durability and convenience, has proved itself, after three years' trial, the best Mower yet introduced into the Province. Respecting its merits, we quote from the *Leader* of June 15th, 1866:—

"Of this Machine, we can speak from personal observation, having used one made at these Works (the subscribers) during the summer of 1865, and we have no hesitation in saying that it is superior to any Mowing Machine, the operation of which we have ever witnessed. Its lightness of draught, the rapidity and excellence of its work, the readiness with which it adapts itself to uneven surfaces, and the ease with which it may be adjusted to cut lodged and tangled grass, place it in advance of all other Mowers."

A table for cutting short or lodged barley may be attached to this Mower, at an extra charge of two dollars.

We take pleasure in offering to the public our well-known

OHIO COMBINED MACHINE,

with several important improvements, which render it equally as well adapted to cutting the shortest barley as the heaviest wheat, and make it the most convenient and durable Ohio Machine offered in our markets. These improvements are not known to other manufacturers, being of our own invention; consequently, intending purchasers will find a decided advantage in dealing with us.

We continue largely a manufacturer of the CANADIAN REAPER, which we cordially recommend to the grain-growing farmer. We are also prepared to supply large quantities of STEEL PLOUGHS, GANG PLOUGHS, CULTIVATORS, HORSE HOES, WEEDERS, ROAD SCRAPERS, FAN MILLS, STRAW CUTTERS, &c. &c.

We give special attention to the manufacture of STEEL MOULD BOARD for the Trade. All work warranted. Catalogues sent post-paid to all applicants. For further particulars, apply to July 1, 1866. v3-13-11

SHEEP MARKS.

THE ATTENTION OF WOOL GROWERS IS INVITED TO A NEW AND IMPROVED METHOD OF MARKING, NUMBERING AND REGISTERING SHEEP, INTRODUCED BY C. H. DANA.

THIS method consists in attaching a label to the sheep's ear, as represented in the cut. These labels are made of iron wire rolled flat, and washed with tin, and stamped with numbers from 1 upward to a 1,000, and with any name ordered. Then they are bent into link shape, and left open, as seen in the cut in ring No. 1. It is attached to the sheep by passing it through a hole punched in the ear, then the long end is to be bent down with the short end as seen in ring No. 2. It is important to punch the hole the length of the label from the edge of the ear, that when the ring is closed it may be filed by the ear, thus preventing it from turning in the ear, or the liability of catching in the bushes.

The label may be put in at the time of punching the hole, and, if properly adjusted, is entirely free from objection, and is superior in every respect to the point mark in general use.

It is more reliable. When applied it will remain permanently—its letters and figures remaining for years as distinct as at the first; while letters and figures applied by means of paint after a brief time become indistinct, and difficult or impossible to read.

It is more convenient. It can be applied at any time, while the point mark must be applied immediately after shearing, thus occupying valuable time.

It is cheaper. It requires to be applied but once, and costs less than the application of paint or tar.

The many flattering testimonials daily received from the thousands who are now using these labels, show that while the name on the label proves to be a great security against the loss of sheep, the numbers in connection with the Sheep Registers (which are got up specially to accompany these labels) furnish a facility never before attained for keeping a record of the flock. The Sheep Registers are arranged with numbers corresponding to those on the labels, and ruled with headings, under which to note the age, pedigree, weight of fleece, and various other items important for one to note who would improve his flock.

The Sheep Registers are arranged to keep the record of a flock of 100 sheep for five years. The sheet Registers, which are sent free to those owners, 100 or more labels, are arranged to keep record of a flock of 100 for one year.

Spring Punches, manufactured for punching the ear, with tube fitted to the shape of the wire, and geared to reach just the right distance upon the ear, for the label, and the handles arranged so as to answer as pinchers to close the label in the ear.

Double Spring Toe Shoes, a superior article for trimming sheep's toes.

PRICES.—Sheep Labels, per hundred, \$3. Spring Punches, each \$1.25. Toe Shoes, \$2. Bound Sheep Registers, each 60c. All orders for less than 50 labels, ten cents additional.

Can stamp whole name, if not more than nine letters. In sending orders, the name should be written with great distinctness, to avoid mistakes. Money should accompany the orders for each of the above articles, and may be sent by mail at my risk in registered letters. Agents wanted in every Township to solicit orders, to whom a liberal discount will be made. See *Canada Farmer* of May 15, 1866, page 150, for editorial recommendation.—Address

v3-13-11.

TO AGRICULTURAL SOCIETIES,

AND ALL INTELLIGENT AGRICULTURISTS.

PERUVIAN GOVERNMENT GUANO.

THE undersigned have arranged with the British Agents for the Peruvian Government to receive a consignment of this superior manure direct from the Chincha Islands, provided orders for 300 tons can be obtained.

As it is necessary that the cargo should be arranged for as soon as possible, the undersigned will be glad to receive orders at once. The price will be \$58 per ton over ship's side, or \$60 if required to be stored before taken.

PRIZES! PRIZES! PRIZES! PRIZES! PRIZES

CANADA AHEAD, THE WORLD OVER!

THE BEST TOOL IS THE CHEAPEST

A. S. Whiting & Co., Oshawa, C. W.,

Manufacturers of the Celebrated Premium

SCYTHES, FORKS, HOES, &c., &c.

THE superior excellence of these Tools is indicated by their high and unequalled popularity, and their rapid growth. Every article from this establishment is SPECIALLY MADE FOR USE. They have invariably won the HIGHEST HONORS at Exhibitions, and amongst their many prizes are the following:—

First Prizes at Provincial Exhibition in Toronto... in 1858.

First Prizes at Provincial Exhibition in Kingston... in 1859.

First Prizes at Provincial Exhibition in Hamilton... in 1860.

First Prizes at Provincial Exhibition in London... in 1861.

First Prizes at Provincial Exhibition in Toronto... in 1862.

Did not exhibit, there being no competition at the Provincial Exhibition in Kingston... in 1863.

First Prizes at Provincial Exhibition in Hamilton... in 1864.

First Prizes at Provincial Exhibition in London... in 1865.

Medal and Diploma for First Prizes at the Provincial Practical Test Exhibition, or grand special trial of Agricultural Implements at work, held under the direction of the Board of Agriculture on Mr. Logan's Farm, near Montreal, in August, 1859, at which these TOOLS COMPETED VICTORIOUSLY, not only with Canadian makes, but with those from some of the best makers in New York, Vermont, and others of the United States.

The Proprietors have also the honor to state that these Tools obtained the FIRST PRIZE at THE WORLD'S FAIR or Exhibition of all Nations in London, England, in 1862, for which they now hold the Bronze Medal. Also First Prize and Medal at the International Exhibition in Dublin, Ireland, in 1865, at which they were specially commended for "their excellence of manufacture and their moderate price."

Caution to Farmers.—As every tool of this make is thoroughly reliable, purchasers should always be particular in seeing to the stamp, (A. S. Whiting & Co., Oshawa, C. W.,) to make certain of getting the genuine article.

A. S. WHITING, & Co., PROPRIETORS.

REAPING MACHINES!

THE NEW YORKER!

THIS well known Machine is manufactured by Seymour, Morgan & Allen, of Brockport, N. Y.; it is the result of twenty years' careful practical and successful experience; it is a combined self raking reaper and mower. The self rake saves one man in delivering the gavel, and much labor in the binding, by the perfect manner in which it does its work. Price of Machines, \$155, delivered per railroad; extra knives and pieces liable to wear, sent on with the machines, and is warranted in every particular, and to perform well in every capacity. A fair trial is given with all machines, and if they do not perform as represented, they will be removed free of expense to the person ordering them.

All orders and letters promptly attended to by

SAMUEL FOWLIS, Peterboro',

Agent for Canada.
